Visual History of World National Geographic, National Geographic Society (U.S.), 2005
Glorious photographs of every part of the world. Delving deeply into century-old picture archive National Geographic presents the world's hugely diverse places with epic grandeur, unparalleled intimacy, romantic beauty, and gritty realism. The photographs are landscapes, cityscapes, famous landmarks, and unfamiliar spots that reveal special qualities of geography or culture one might otherwise never see. National Geographic's quest since its founding in 1888 has been to describe the world and all that's in it. To fulfill that quest, photographers set out to document every imaginable place on earth, from the most remote to the most familiar; from the most primitive to the most sophisticated. National Geographic photographers have recorded the world's places close up, in sweeping breadth, in depth, and over time. Twelve chapters each depict a unique geography, the culture and nature that inhabit it. Chapters are introduced by short, 1,500-word essays and look carefully and deeply at a region's special qualities. The geography and the life within it comes forward with its own unique character, its own special and unforgettable sense of place.

Visions of Earth National Geographic, Susan Tyler Hitchcock, 2011
Visions of Earth raises a curtain on the wonders of the world and thrills us with nature's opulence and humanity's splendor. Each image alone exposes a nugget of our planet's magnificence; the totality of the collection goes beyond our imagination. Turning the pages, viewers are struck by the richness of life on Earth. One photograph is more awe-inspiring than the next--chosen by veteran National Geographic Magazine photo editors to present what is visually incredible. The photographs are drawn from the popular *Visions of Earth*

feature in the magazine, (rated #1 by readers), from our own storied Image Collection, and from renowned photographers throughout the world, many never-before published. Enthralling images fill the book in a gallery of stunning landscapes, fascinating people, amazing animals, and unexpected glimpses of the usual and unusual. Puffins' beaks signal breeding time in Norway and a speckled emperor moth in South Africa diverts predators with an illusion. An elephant takes a morning dip in India's Andaman Sea while Siamese crocodiles race in Thailand and surfers in Australia relish a perfect day. Monks in Bhutan run to dinner and a little girl in red stands out among white-robed women in an Indonesian mosque. Spanish youth decked in colorful, oversize papier-mâché heads celebrate a festival in Catalonia and a flower of flame blooms from a man's kerosene-filled mouth in a Sikh celebration in India. Around the globe, amazing moments are captured in time, from a spray of flash frozen petal fragments in California to a truck show of chrome-covered and gleaming neon rigs half the world away in Japan. Visions of Earth is a welcome escape from the news of natural disasters, conflict, political upheaval, and social unrest that fills our lives. The book delights our senses, ignites our emotions, and renews our optimism, showcasing the many ways that our world is a marvel to behold and a privilege to call home.
