A research report written by someone who has an insider view on PCOS & Depression, focusing on the real reasons for these 2 disorders. An amazing discovery from this research journey is that we can heal the root causes of both these disorders simultaneously through an easy and natural 1 step 4 supplements approach. This research report is a culmination of years of personal research, a journey prompted by the author's family's battle with mental health [i.e. Depression] which propelled the author to find the root cause and holistic solutions to their mental health challenge and in doing so, helped the author to discover the root cause and holistic solutions to the author's own infertility [Polycystic Ovarian Syndrome (PCOS)] challenge. With a strong conviction that we are all "fearfully and wonderfully made" by God, the author believes that there is an intelligence in our bodies to heal, as long as we find the root cause to our health imbalances. In stumbling through this journey to find long lasting natural healing for both PCOS and Depression (focusing on Borderline depression/Borderline Personality Disorder (BPD), Dysthymia, Bipolar and Major depression), the author discovered that both of these seemingly disparate disorders are in fact interrelated and that there are 4 easy concise natural ways to heal both disorders simultaneously within a relatively short duration of 3-6 months. Do go to You Tube and search for "The Fruitful Society" to view the following 3 video commentaries which will enhance your understanding of this research report: 1. Basics to "A radical theory on women endocrine issues/infertility (PCOS) & Depression" 2. Impaired women endocrine, infertility (PCOS) symptoms and reasons. 3. Depression in women (BPD/Dysthymia/Bipolar/Major) symptoms and reasons. In undertaking this research, the author attempted to seek answers to questions such as: - What is PCOS and Depression? - Why the symptoms are so wide ranging and what are the root cause(s) for the symptoms? - Are there quantifiable methods to measure the disorders? - Why do some individuals have both PCOS and mental health issues (i.e. Depression) while some display either PCOS or Depression only? - Are there alternative natural/holistic solutions to healing instead of conventional methods that may employ aggressive methods to healing? Disclaimer: The author of this report is not trained in the health field. However, perhaps because of this, there is an advantage to relook at the problem and solutions from an entirely unbiased new perspective. It is the author's hope that you may find the answers you are seeking for in this research report and that it will help you or your family member to lead an amazing fruitful life. Truly, there is hope! Just believe! With love, the author. PS: If you find this book useful, please consider leaving a short review on Amazon.

Out of the 100 million women—almost 11 million in the United States alone—who are on the pill, roughly 60 percent take it for non-contraceptive reasons like painful periods, endometriosis, PCOS, and acne. While the birth control pill is widely prescribed as a quick-fix solution to a variety of women's health conditions, taking it can also result in other more serious and dangerous health consequences. Did you know that women on the pill are more likely to be prescribed an antidepressant? That they are at significantly increased risk for autoimmune disease, heart attack, thyroid and adrenal disorders, and even breast and cervical cancer? That the pill can even cause vaginal dryness, unexplained hair loss, flagging libido, extreme fatigue, and chronic infection. As if women didn't have enough to worry about, that little pill we're taking to manage our symptoms is only making things worse. Jolene Brighten, ND, author of the groundbreaking new book BEYOND THE PILL, specializes in treating women's hormone imbalances caused by the pill and shares her proven 30-day program designed to reverse the myriad of symptoms women experience every day—whether you choose to stay on the pill or not. The first book of its kind to target the birth control pill and the scientifically-proven symptoms associated with taking it, BEYOND THE PILL is an actionable plan for taking control, and will help readers:

- Locate the root cause of their hormonal issues, like estrogen dominance, low testosterone, and low progesterone
- Discover a pain-free, manageable period free of cramps, acne, stress, or PMS without the harmful side effects that come with the pill
- Detox the liver, support the adrenals and thyroid, heal the gut, reverse metabolic mayhem, boost fertility, and enhance mood
- Transition into a nutrition and supplement program, with more than 30 hormone-balancing recipes

Featuring simple diet and lifestyle interventions, BEYOND THE PILL is the first step to reversing the risky side effects of the pill, finally finding hormonal health, and getting your badass self back.

Alisa Vitti found herself suffering through the symptoms of polycystic ovarian syndrome (PCOS), and was able to heal herself through food and lifestyle changes. Relieved and reborn, she made it her mission to empower other women to be able to do the same. As she says, 'Hormones affect everything. Have you ever struggled with acne, oily hair, dandruff, dry skin, cramps, headaches, irritability, exhaustion, constipation, irregular cycles, heavy bleeding, clotting, shedding hair, weight gain, anxiety, insomnia, infertility, lowered sex drive, or bizarre food cravings and felt like your body was just irrational?' With this breadth of symptoms, improving hormonal health is a goal for women at every stage of their lives Alisa Vitti says that medication and antidepressants aren't the only solutions. The thousands of women she has treated in her Manhattan clinic know the power of her process that focuses on uncovering your unique biological make up. Groundbreaking and informative, WomanCode educates women about hormone health in a way that's relevant and easy to understand. Bestselling author and women's health expert Christiane Northrup, who has called WomanCode the 'Our Bodies, Ourselves of this generation', provides an insightful foreword.

The Harvard-educated physician and New York Times bestselling author of The Hormone Cure shows you how to grow new receptors for your seven metabolic hormones, making you lose

weight and feel great fast! When it comes to weight loss, most people don't think about hormones. But when you develop resistance to your seven major metabolic hormones—cortisol, thyroid, testosterone, growth hormone, leptin, insulin, and estrogen—your body adjusts by increasingly raising your hormone levels and ultimately slowing down your metabolism. And a slower metabolism leads to weight gain and difficulty losing weight. The solution, Dr. Sara Gottfried contends, is to reset the efficiency of your hormones by repairing and growing new hormone receptors. Based on leading scientific research, The Hormone Reset Diet is her proven weight loss and energy program to reverse hormone resistance in just three weeks. It will help you: Boost your metabolism and calorie burning by growing new and fresh thyroid receptors; Increase your weight loss by re-balancing estrogen and progesterone receptors; Reverse your aging by resetting glucocorticoid receptors (for better processing cortisol). For the last twenty years, this Harvard-MIT educated physician has helped thousands of women address the root hormonal causes of what bothers them most: excess weight, lack of energy, aging, and illness. Going beyond her bestselling The Hormone Cure, this program is the next generation of her deep understanding of hormonal optimization for rapid weight loss.

Natural Alternatives to Sugar will show you how to quit sugar without any cravings. The vast majority of us are addicted to sugar, there is evidence to show that our bodies react to it much as they do to crack cocaine, so it's no wonder we find it so hard to stick to a no sugar diet. And the more sugar we have, the more our bodies crave as they become sensitized. Sadly, food manufacturers, the media and even the health service have helped to ladle more and more sugar into our diet. Given this it's no wonder we love sugar but unfortunately our bodies don't. The overload of sugar in our diet is putting our health and even our lives at risk. Even moderate sugar intake on a regular basis can create or exacerbate a huge number of conditions. Quite apart from heart disease, cancer and Alzheimer's, sugar is implicated in fungal infections, mood swings, mucous production, low energy and libido, brain fog and memory problems, inflammation and general lowered immunity It's time to ditch the sugar and save our bodies; time to beat sugar cravings and learn how to eat real food, rather than empty, harmful calories by adopting a no sugar diet. Without sugar in your diet, you will feel better, brighter, clearer in mind and body. You will protect yourself from a large number of serious health conditions and many old aches, pains and niggling health concerns may disappear as if by magic. Once your blood sugar levels stabilize, you will have more energy and you will undoubtedly sleep better. You will also notice a huge array of cosmetic effects - losing sugar will gain you a slimmer body and a clearer, brighter complexion. Backed by scientific references, Natural Alternatives to Sugar answers questions such as: What do we mean by 'sugar'? What effects does sugar have on our health? Is sugar really to blame for the increase in heart disease, cancer, diabetes and obesity? Are any

forms of sugar safe to eat? Are there any good substitutes or alternatives to sugar? If we do cut out or reduce sugar, with what do we replace it? Can supplements help curb cravings? A simple 4-week sugar detox plan If you've been wondering how to quit sugar without the cravings this book will show you how. To live healthy, happy and long lives it is absolutely essential that we get to grips with our sugar habit. Marilyn Glenville has been warning about the risks of sugar since she published her first book back in 1997. Sugar, she warns, is largely to blame for the obesity and Type 2 diabetes crises we have, both in the UK and around the world. In addition, sugar is a contributing factor in cancer, Alzheimer's and dementia, and heart disease. It is strongly linked with our rising levels of stress and also premature ageing. This clear, straight-talking book from one of the UK's leading nutritional experts sets the record straight. Natural Alternatives to Sugar is your essential guide on how to quit sugar and live a no sugar diet. It offers a 4-week sugar detox plan and also a gentler plan for easing sugar out of your life. Sugar-free recipes show that you can have your (sugar-free) cake and eat it too, while a Resources section gives information on where to go for further support on your sugar-free journey.

NEW YORK TIMES BESTSELLER The New York Times bestselling author of The Hormone Cure and The Hormone Reset Diet shows every woman how to create a lifestyle that will help her look great, feel energized, and slow down the effects of aging. Feel destined for cellulite, saddle bags, and belly fat? Does your family come from a long line of Alzheimer's, cancer, or heart disease? Will nothing help your aging skin or declining libido or flagging energy? This book is for you. The body is magnificent but it doesn't come with a lifetime warranty, or an operating manual. You're the result of millions of years of evolution, but many of the adaptations that helped your ancestors survive are now working overtime to accelerate the aging process. The assumption here is that we are our genes and therefore trapped by the past. The good news is that your genetic code—the DNA sequence that is the biochemical basis of heredity—can play a minor role in the way you age. The scientific reality is that 90 percent of the signs of aging and disease are caused by lifestyle choices, not your genes. In other words, you have the capability to overcome and transform your genetic history and tendencies. Harvard/MIT—trained physician Sara Gottfried, M.D. has created a revolutionary 7-week program that empowers us to make the critical choices necessary to not just look young, but also feel young. Dr. Gottfried identifies and builds this book around the five-key factors that lead to accelerated aging -the muscle factor, the brain factor, the hormone factor, the gut factor, and the toxic fat factor. The 7-week program addresses these factors and treats them in an accessible and highly practical protocol and is as follows: Feed—Week 1 Sleep—Week 2 Move—Week 3 Release—Week 4 Expose—Week 5 Soothe—Week 6 Think—Week 7 Younger increases not only your lifespan, but also your healthspan. Dr. Gottfried's program makes it possible to change the way you age, stay younger longer, and remain healthy and vibrant for all of your days.

The utilization of herbal medicine to treat endocrine and metabolic disorders has garnered much attention within the past few decades. Specifically, the popularity of using dietary supplements for the management of chronic disorders has drastically increased, with a wide variety of these products available over the counter. They represent an attractive adjuvant to traditional therapy for their lower toxicity and their easy accessibility. The identification of such dietary compounds has prompted researchers to explore the vast array of their beneficial effects. However, despite their widespread use, there is still limited data on the safety and efficacy of the products currently on the market. Current research on the side effects and safe usage of herbal medicines is necessary for providing optimal care and counseling for patients. Treating Endocrine and Metabolic Disorders With Herbal Medicines is a comprehensive reference book focused on spreading awareness on the safety, potential harmful effects, and rational use of herbal medicines. The chapters within explore and provide insight on the effectiveness, versatility, and side effects of various herbal medicines across a range of different diseases and conditions. While highlighting herbal medicine in areas such as diabetes, cancer, infertility, and endocrine disorders, this publication is ideally intended for clinical practitioners, pharmaceutical scientists, doctors, practitioners, stakeholders, researchers, academicians, and students interested in enhancing their knowledge and awareness in the field of complementary medicine.
