Maverick, innovator, entrepreneur, environmentalist and sheer force of nature, Francis Toribiong would have been a unique and significant individual no matter where in the world he was born. As it turned out, he was born in the island nation of Palau in the Western Pacific at just the right time to apply his special set of skills and attributes to the task of helping his country find its place in the world. In the 1980s and 1990s, he arguably did more than anyone to build Palau's economy and help it develop into an independent, forward-looking nation. And, improbably, he achieved this via the sport of scuba diving. Francis Toribiong is a Pacific Islander like no other. He is the father of Palau tourism, a scuba diving pioneer, and an effective, tireless ambassador for both his country and its abundant marine and land resources. He was born poor and had no academic leanings. Yet he was driven to succeed by a combination of duty, faith, a deep-seated determination to do the right thing and an absolute refusal ever to compromise his values. For his whole life, he has been a devoted friend to strangers and an implacable opponent to anybody who, through malevolence or negligence, threatens Palau's considerable natural treasures. He has also been the perfect host to generations of scuba divers from all over the world, who have visited Palau to see those treasures for themselves. And, as well as all that, he was Palau's first ever parachutist – known throughout the islands as the Palauan who fell from the sky. They were speaking both literally and figuratively. He was so completely different from all of his contemporaries in terms of his demeanor, his ambitions and his vision, that it was as if he had come from outer space. Palau had never seen anybody quite like him and there was no historical precedent for what

Francis Toribiong did. He had no operations manual to consult and no examples to follow. He wrote his own life. Francis Toribiong was the first Palauan ever to seek and seize the international narrative. No Palauan, in any context or field, had previously thought to go out into the world and say: “This is Palau – what we have is wonderful. Come and see!” This is his astonishing story.

Diving the Thistlegorm is a unique in-depth look at one of the world’s best-loved shipwrecks, the World War II British Merchant Navy steamship. In this highly visual guide, cutting edge photographic methods enable views of the famous wreck and its fascinating cargo which were previously impossible. Sitting upright in 30m of clear, inviting Red Sea waters, the ship is packed with the materials of war. Largely complete lorries, trucks, motorbikes, aircraft spares and airfield equipment are crammed into the forward holds and the remains of other vehicles lie amongst boxes of ammunition in the exploded aft holds. Often referred to as an underwater museum, the wreck fascinates visitors for dive after dive. The book is the culmination of decades of experience, archaeological and photographic expertise, many hours underwater, months of computer processing time, and days spent researching and verifying the history of the ship and its cargo. For the first time, Diving the Thistlegorm brings the rich and complex contents of the wreck together, identifying individual items and illustrating where they can be found. As the expert team behind the underwater photography, reconstructions and explanations take you through the wreck in incredible detail, you will discover not only what has been learned but also what mysteries are still to be solved. Limited run of hardbacks. Review ‘The most comprehensive guide to one of the world’s greatest shipwrecks’— Emad Khalil, Alexandria University (from the Foreword)

Physiological and practical considerations of scuba diving in easy-to-read format. Chris and Chrissy Rouse, an experienced father-and-son scuba diving team, hoped to achieve widespread recognition for their outstanding but controversial diving skills. Obsessed and ambitious, they sought to solve the secrets of a mysterious, undocumented World War II German U-boat that lay under 230 feet of water, only a half-day's mission from New York Harbor. In doing so, they paid the ultimate price in their quest for fame. Bernie Chowdhury, himself an expert diver and a close friend of the Rouses', explores the thrill-seeking world of deep-sea diving, including its legendary figures, most celebrated triumphs, and gruesome tragedies. By examining the diver's psychology through the complex father-and-son dynamic, Chowdhury illuminates the extreme sport diver's push toward—and sometimes beyond—the limits of human endurance.

Paperback edition. Over the course of two years, author James Rosemond, with the aid of a newfound dive buddy named Scotty, explores Carteret County, the bottom of the ocean, and himself. This book is a humorous recounting of their misadventures above and below the surface, diving and hunting for flounder, while mildly stretching the recreational dive rules. Transitioning through a self imposed "mid life" crisis by "Hiding on the Bottom," the author realizes that life is more than work, adventure being just beyond the door step. Scotty, with his bizarre wisdom, helps him understand what is important, finding life's little pleasures and adventures along the way, always recognizing the humor in every situation. After reading the preview, which is the first part of Chapter One, if you want to read more before ordering the book, click on the James Rosemond link at the top of the page and then download the entire content of Chapter One for free.

Technical & Mixed Gas Scuba Diving & Rebreather & Expedition-Extended Range Diving Techniques - Extremely Detailed Information on Self-Survival Skills for ALL levels of Water Enthusiasts - Full Color Photography throughout

An illustrated journey into the world of undersea diving captures humankind's fascination with the wonders of the undersea world and the dramatic growth of recreational sport diving, discussing the history of the sport and offering fascinating accounts of the author's own adventures around the world. Reprint. One diver, after a seemingly brief period below the surface, discovers that his gas supply has run perilously low. Another, paralyzed, bobs helplessly on the surface, and when a poorly trained divemaster attempts rescue, things go from bad to worse. Two other divers, fascinated by the bountiful undersea life of the Caribbean, fail to notice that a powerful current is sweeping them rapidly away from their unattended boat. These are just a few of the true stories you'll find in *Diver Down*, most of them involving diver error and resulting in serious injury or death. Each of these tales is accompanied by an in-depth analysis of what went wrong and how you can recognize, avoid, and respond to similar underwater

On a foggy July evening in 1956, the Italian cruise liner Andrea Doria, bound for New York, was struck broadside by another vessel. In eleven hours, she would sink nearly 250 feet to the murky Atlantic Ocean floor. Thanks to a daring rescue operation, only 51 of more than 1,700 people died in the tragedy. But the Andrea Doria is still taking lives. Considered the Mt. Everest of diving, the Andrea Doria is the ultimate deepwater wreck challenge. Over the years, a small but fanatical group of extreme scuba divers have investigated the Andrea Doria, pushing themselves to the very limits of human endurance to explore her -- and not all have returned. Diver Kevin McMurray takes you inside this elite club with a hard, honest look at those who go deeper, farther, and closer to the edge than others would ever dream. Deep Descent is the riveting true story of the human spirit overcoming human frailty and of fearsome, mortal risks traded for a hard-core adrenaline rush. Chronicling these adventures in his page-turning narrative and in dozens of dramatic photos, McMurray draws us deeper into the cold heart of the unforgiving sea, giving us a powerful vision of a place to which few will ever have the skills -- or the courage -- to go.

If you do not yet scuba dive but are thinking of learning, then *Scuba Fundamental - Start Diving the Right Way* is for you. It takes you from the germ of the idea that you might like to try scuba diving up to the point where you have done around 20 dives. This is not your standard how-to scuba diving manual. It is very different. The purpose of *Scuba Fundamental* is not to teach you how to dive. A dive instructor will do that. But this book will make the learning process much easier. It will help you make the right choices and avoid the pitfalls that await new and uninformed divers coming into the sport. It will also set you well on the road to becoming a capable and competent lifelong diver. *Scuba Fundamental* tells you how to make sure you are prepared for a scuba diving course and what a good beginners course should entail. It tells you how to choose a good instructor, how to decide which operators to dive with after you have finished your course and what sort of dives you should be doing when you first start diving. You will learn the many ways in which diving will change your life and also acquire some extremely valuable advice on the etiquette involved in the sport. Throughout the book and especially in the chapter "It Happened to Me" you will be entertained, educated and encouraged by anecdotes from people who are now experienced divers but were once beginners too. There is also an entire section devoted to diving safety, much of which covers vitally important aspects of scuba diving that

standard training manuals don't emphasise enough or even leave out completely. The book's message is: start scuba diving the right way and you will be relaxed and ready for the adventure. You will have more fun, make fewer mistakes and be confident in the fact that you are well informed, have made the best choices and have spent your money wisely. Scuba Fundamental is a unique, reliable and essential guide: one that you can trust completely and follow during this formative phase of your scuba diving life. "I wish I had had this book to read when I learned to dive. I remember being totally confused." Robin Yao, Executive Editor, EZDIVE magazine "This is the book divers should give to friends when they say they want to learn to scuba dive." Ian Thomas, Scuba Instructor Trainer

This is the first book to span the depth between traditional sport diving editions and the complex medical/commercial texts. It provides a balanced view of the fascinations and hazards of deep diving through extensive factual development of its technical chapters.
