Technical Challenges and Design Issues in Bangla Language Processing addresses the difficulties as well as the overwhelming benefits associated with creating programs and devices that are accessible to the speakers of the Bangla language.

Professionals, students, and researchers interested in expanding the fields of computing, information and knowledge management, and communication technologies in the non-English realm will benefit from this comprehensive collection of research. Master's Thesis from the year 2013 in the subject Pedagogy - Common Didactics, Educational Objectives, Methods, language: English, abstract: The topic of concern of the research is the critical thinking ability of the primary and high school students of Bangladesh and its effects on their tertiary level education. In the research, the critical thinking ability of these levels of students was found to be deficient to an extent. The research has found that the recently introduced creative method has proved to be more favorable for developing the critical thinking ability of the students than the previous methods, though the creative method is struggling for effective implementation for various reasons. For example, the lack of trained teachers, partial knowledge of the students about the creative method and accessibility to guidebooks are contributing to the unsuccessful application of the method. Moreover, the research found out that there is an urge on the part of students for modification of the creative method. Besides, fragmented knowledge on different topics in different classes or grades, lecture-based classes, the tendency of taking down lecture notes in H.S.C and university levels are also responsible for a lack of critical thinking abilities of the students. Furthermore, the tendency of memorizing essays and question- answers has not been lessened as memorized essays and notes carry good marks even in the new system of examination. Indeed, the research findings do agree with the fact that the lack of critical thinking ability among the students of Bangladesh is particularly due to the effects of our education policies, memorizing and passive learning on the part of students on a large scale. Therefore, proper knowledge of and training in the creative method on the part of

both the students and teachers, adequate implementation of the creative method at school and college levels, effective interac

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: \*providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and \*presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education. Washback in Language Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations.

Do statewide assessments really do what they are supposed to do? Through interviews with over three hundred teachers and administrators, Hillocks examines whether state writing tests in Illinois, Kentucky, Oregon, New York, and Texas actually improve students' ability to express their thinking in writing. Ultimately, Hillocks argues that the majority of existing tests actually have a harmful effect on the way students are taught

to write. In addition to providing analyses of assessments that do not encourage good writing, *The Testing Trap* contrasts them to those that do. Concluding with practical procedures for examining and evaluating writing assessments, this book is a provocative and essential read for administrators, teachers, policymakers, parents, and all who care about the education of our children.

S Chand's Value Education Series. This is another small steps, after the introductory volume. It aims at developing the right values among children.

Judiciary is an essential and integral part of a state, and its independence is a prerequisite of a liberal democratic state. Bangladesh, which emerged through a war of independence against the Pakistani in 1971, included democracy as one of the state principles in its constitution in 1972, and the constitution ensured the separation of judiciary from executive, and independence of the judiciary. I had the opportunity and honor to observe this transformation and the hindrances as a participant of the Bangladeshi judiciary since 1974 -- rising from a practitioner at a lower court in the north-eastern district of Sylhet to the highest judicial position of the country, the Chief Justice of the Supreme Court. But, in 2017, after delivering a historic verdict in favor of the independence of judiciary, I was forced to resign and exiled by the current government. The series of unfortunate and unprecedented events, which led to the tension between the executive and judiciary and subsequent improper action against me, began on September 17, 2014 when the Bangladesh Parliament amended the constitution to provide power of impeaching judges to the members of the parliament. The 16th Amendment of the Constitution deleted the provision of removing Judges from office through a highly powerful committee of peers called the Supreme Judicial Council (SJC). The SJC, as stipulated in the constitution, also allowed the accused to have self-defense. Most importantly, the process was meant to protect the judiciary from being subjected to political vagaries and serving political leaders than the citizens. On May 5, 2016, a special High Court bench declared the amendment illegal and unconstitutional. Soon after the verdict, the MPs blasted judges for nullifying their legislation and began displaying sheer disrespect to the judiciary. However, the state party opted for an appeal which was heard by a seven-member full appellate bench. It was incumbent on me to head the Bench. On July 3, 2017, the bench unanimously rejected the appeal upholding the High Court verdict. The complete text of the unanimous verdict, including the observations, were made public on August 1, 2018. Following the appellate decision, on September 13 the parliament passed a resolution calling for legal steps to nullify the Supreme Court verdict. Prime Minister and other members of her party and ministers blasted me for going against the parliament. Cabinet members including the Law Minister began smearing me alleging misconduct and corruption. While I remained confined at my official residence and lawyers and judges were prevented to visit me, media were told that I am unwell and have sought medical leave. Various ministers said I will go abroad on medical leave. On October 14, 2017, as I had to leave the country, I tried to clear the air in a public statement that I am neither unwell nor am I leaving the country for good. I was hoping that my physical absence combined with Court's regular vacation will allow the situation to calm down and good sense will prevail; that the government will understand that the essence of the Verdict - upholding the independence of judiciary - is beneficial to the nation and the state. Finally, in the face of intimidation and threats to my family and friends by the country's military intelligence

agency called the Directorate General of the Defense Forces Intelligence (DGDFI), I submitted resignation from abroad. This book comprises an introduction, highlighting my judicial life, experiences, challenges before the judiciary in Bangladesh, its struggle for independence, sanctity of the legal profession, erosion of values in judicial services, political interference and the state of nascent democracy.

This Handbook is a comprehensive overview of English language education in Bangladesh. Presenting descriptive, theoretical, and empirical chapters as well as case studies, this Handbook, on the one hand, provides a comprehensive view of the English language teaching and learning scenario in Bangladesh, and on the other hand comes up with suggestions for possible decolonisation and de-eliticisation of English in Bangladesh. The Handbook explores a wide range of diverse endogenous and exogenous topics, all related to English language teaching and learning in Bangladesh, and acquaints readers with different perspectives, operating from the macro to the micro levels. The theoretical frameworks used are drawn from applied linguistics, education, sociology, political science, critical geography, cultural studies, psychology, and economics. The chapters examine how much generalisability the theories have for the context of Bangladesh and how the empirical data can be interpreted through different theoretical lenses. There are six sections in the Handbook covering different dynamics of English language education practices in Bangladesh, from history, policy and practice to assessment, pedagogy and identity. It is an invaluable reference source for students, researchers, and policy makers interested in English language, ELT, TESOL, and applied linguistics.

Bibhutibhushan Bandyopadhyay was one of the greatest writers in modern Bengali literature, best known for his autobiographical novel *Pather Panchali*, which, along with another of Bandyopadhyay's books, formed the basis for Satyajit Ray's classic *Apu Trilogy*. In this semi-autobiographical novel, Satyacharan is a young graduate in 1920s Calcutta, who, unable to find a job in the city, takes up the post of a 'manager' of a vast tract of forested land in neighboring Bihar. As he is increasingly enchanted and hypnotized by the exquisite beauty of nature, he is burdened with the painful task of clearing this land for cultivation. As ancient trees fall to the cultivator's axe, indigenous tribes--to whom the forest had been home for millennia--lose their ancient way of life. The promise of 'progress' and 'development' brings in streams of landless laborers, impoverished schoolmasters and starving boys from around the region, and the narrator chronicles in visionary prose the tale of destruction and dispossession that is the universal saga of man's struggle to bend nature to his will. Written in 1937-39, and now available in English translation, *Aranyak* is an unforgettable account of hard lives in a place of vanishing beauty, preserved here for all time by a brilliant artist.

This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.
