This volume brings together papers by eminent scholars analyzing the sociological bases of Indian politics. It focuses on the relationship modern politics has with changes in caste structure, religious communities, and other types of identity. Kenyan-born novelist and playwright Ngugi wa Thiong'o and his collaborator, Micere Githae Mugo, have built a powerful and challenging play out of the circumstances surrounding the 1956 trial of Dedan Kimathi, the celebrated Kenyan hero who led the Mau Mau rebellion against the British colonial regime in Kenya and was eventually hanged. A highly

controversial character, Kimathi's life has been subject to intense propaganda by both the British government, who saw him as a vicious terrorist, and Kenyan nationalists, who viewed him as a man of great courage and commitment. Writing in the 1970s, the playwrights' response to colonialist writings about the Mau Mau movement in *The Trial of Dedan Kimathi* is to sing the praises of the deeds of this hero of the resistance who refused to surrender to British imperialism. It is not a reproduction of the farcical "trial" at Nyeri. Rather, according to the preface, it is "an imaginative recreation and interpretation of the collective will of the Kenyan peasants and workers in their refusal to break under sixty years of colonial torture and ruthless oppression by the British ruling classes and their continued determination to resist exploitation, oppression and new forms of enslavement."

Is public administration an art or a science? This question of whether the field is driven by values or facts will never be definitively answered due to a lack of consensus among scholars. The resulting divide has produced many heated debates; however, in this pioneering volume, Norma Riccucci embraces the diversity of research methods rather than suggesting that there is one best way to conduct research in public administration. Public Administration examines the intellectual origins and identity of the discipline of public administration, its diverse research traditions, and how public administration research is conducted today. The book's intended purpose is to engage reasonable-minded public administration scholars and professionals in a dialogue on the importance of heterogeneity in epistemic traditions, and to deepen the field's understanding and acceptance of its epistemological scope. This important book will provide a necessary overview of the discipline for graduate students
