“A thoughtful and fresh perspective on life’s compassionate journey to success. Irrational Kindness is powerful, provocative, and palatable.” —Linda Cash, former Vice President, Quality and New Model Launch Program at Ford Motor Company This work from a fast food entrepreneur and rare triple-franchisee Kevin Williams was written as part-employee handbook, part-operating manual for life. Irrational Kindness flips traditional wisdom on its head and gives a different lens through which to look at life. Often the idea of being irrational is smeared with negative connotations. It can sound illogical, senseless, unjustifiable, or groundless. It may even represent ludicrous and mad behavior! But Kevin Williams argues that being irrational can be just the opposite. And it is the most positive, inspiring, and empowering way to be. Being irrational has to do with thinking outside the box—way outside. It has to do with viewing life as a journey and still being willing to reverse the route, shake things up, or flip the map upside down. Why? Not just to be different, but to make a difference. Irrational Kindness can serve as a harmonious reminder that one’s hopes and dreams do not have to be derailed—not by their fears, their pasts, or by people who make them feel like they have to know everything to be successful, or even just to get started. Throughout its pages, Kevin provides the inspiration everyone needs to favor understanding over being understood and prioritize kindness—toward themselves as well as others—over everything. “This book is a needed and timely reminder to pause and give Kindness a platform to change the world around you.” —Princess Moon, Podcast Artist & Encourager of People

Centre (RDC), run by negotiation experts Alan McCarthy and Steve Hay, has helped thousands of people to conduct successful negotiations of every type. Many RDC clients have been business professionals who have learned how to sell more successfully. Others have improved their buying skills. A few clients have applied the RDC techniques outside the business environment altogether—for instance, in such areas as international diplomatic services, including hostage and kidnap situations. As you'll discover, the RDC philosophy is centered on business ethics and a principled approach to negotiation that maximizes the value of the outcomes for both parties. It can even create additional value that neither party could find in isolation. In this book, you will learn:

- The ten golden rules for successful negotiations
- How to handle conflicts with your negotiating partners
- What hostage and kidnapping negotiations can teach managers negotiating in business settings
- How to ensure both sides perceive any agreement as a "win"
- Achieve higher-profit deals in difficult circumstances

In the business world, negotiating with other companies, government officials, and even your colleagues is a fact of life. *Advanced Negotiation Techniques* takes you through a system for planning and conducting negotiations that will enable you and your team to achieve your negotiation objectives. This is an internationally tried and tested process, with many current Blue Chip organizations applying it daily for a simple reason: the techniques are easy to implement and they work. That makes this book essential reading for those who want to achieve their goals in any area of life.

Some negotiations are easy. Others are more difficult. And then there are situations that seem completely hopeless. Conflict is escalating, people are getting aggressive, and no one is willing to back down. And to top it off, you have little power or other resources to work with. Harvard professor and negotiation adviser Deepak Malhotra shows how to defuse even the most potentially explosive situations and to find success when things seem impossible. Malhotra identifies three broad approaches for breaking deadlocks and resolving conflicts, and draws out scores of actionable lessons using behind-the-scenes stories of fascinating real-life negotiations, including drafting of the US Constitution, resolving the Cuban Missile Crisis, ending bitter disputes in the NFL and NHL, and beating the odds in complex business situations. But he also shows how these same principles and tactics can be applied in everyday life, whether you are making corporate deals, negotiating job offers, resolving business disputes, tackling obstacles in personal relationships, or even negotiating with children. As Malhotra reminds us, regardless of the context or which issues are on the table, negotiation is always, fundamentally, about human interaction. No matter how high the stakes or how protracted the dispute, the object of negotiation is to engage with other human beings in a way that leads to better understandings and agreements. The principles and strategies in this book will help you do this more effectively in every situation.

In *Negotiating Rationally*, Max Bazerman and Margaret Neale explain how to

avoid the pitfalls of irrationality and gain the upper hand in negotiations. For example, managers tend to be overconfident, to recklessly escalate previous commitments, and fail to consider the tactics of the other party. Drawing on their research, the authors show how we are prisoners of our own assumptions. They identify strategies to avoid these pitfalls in negotiating by concentrating on opponents' behavior and developing the ability to recognize individual limitations and biases. They explain how to think rationally about the choice of reaching an agreement versus reaching an impasse. A must read for business professionals. The art of negotiation—from one of the country's most eminent practitioners and the Chair of the Harvard Law School's Program on Negotiation. One of the country's most eminent practitioners of the art and science of negotiation offers practical advice for the most challenging conflicts—when you are facing an adversary you don't trust, who may harm you, or who you may even feel is evil. This lively, informative, emotionally compelling book identifies the tools one needs to make wise decisions about life's most challenging conflicts.

We all want to get to yes, but what happens when the other person keeps saying no? How can you negotiate successfully with a stubborn boss, an irate customer, or a deceitful coworker? In *Getting Past No*, William Ury of Harvard Law School's Program on Negotiation offers a proven breakthrough strategy for turning adversaries into negotiating partners. You'll learn how to:

- Stay in control under pressure
- Defuse anger and hostility
- Find out what the other side really wants
- Counter dirty tricks
- Use power to bring the other side back to the table
- Reach agreements that satisfies both sides' needs

Getting Past No is the state-of-the-art book on negotiation for the twenty-first century. It will help you deal with tough times, tough people, and tough negotiations. You don't have to get mad or get even. Instead, you can get what you want!

We all negotiate on a daily basis. We negotiate with our spouses, children, parents, and friends. We negotiate when we rent an apartment, buy a car, purchase a house, and apply for a job. Your ability to negotiate might even be the most important factor in your career advancement. Negotiation is also the key to business success. No organization can survive without contracts that produce profits. At a strategic level, businesses are concerned with value creation and achieving competitive advantage. But the success of high-level business strategies depends on contracts made with suppliers, customers, and other stakeholders. Contracting capability—the ability to negotiate and perform successful contracts—is the most important function in any organization. This book is designed to help you achieve success in your personal negotiations and in your business transactions. The book is unique in two ways. First, the book not only covers negotiation concepts, but also provides practical actions you can take in future negotiations. This includes a Negotiation Planning Checklist and a completed example of the checklist for your use in future negotiations. The book also includes (1) a tool you can use to assess your negotiation style; (2) examples of "decision trees," which are useful in calculating your alternatives if your negotiation is unsuccessful; (3) a three-part strategy for increasing your power during negotiations; (4) a practical plan for analyzing your negotiations based on your reservation price, stretch goal, most-likely target, and zone of potential agreement; (5) clear guidelines on ethical standards that apply to negotiations; (6) factors to consider when deciding whether you should negotiate through an agent; (7) psychological tools you can use in negotiations—and traps to avoid when the other side uses them; (8) key elements of contract law that arise during negotiations; and (9) a checklist of factors to use when you evaluate your performance as a negotiator. Second, the book is unique in its holistic approach to the negotiation process. Other books often focus narrowly either on negotiation or on contract law. Furthermore, the books on negotiation tend to focus on what happens at the bargaining table without addressing the performance of an agreement.

File Type PDF Negotiation Genius How To Overcome Obstacles And Achieve Brilliant Results At The Bargaining Table Beyond Deepak Malhotra

These books make the mistaken assumption that success is determined by evaluating the negotiation rather than evaluating performance of the agreement. Similarly, the books on contract law tend to focus on the legal requirements for a contract to be valid, thus giving short shrift to the negotiation process that precedes the contract and to the performance that follows. In the real world, the contracting process is not divided into independent phases. What happens during a negotiation has a profound impact on the contract and on the performance that follows. The contract's legal content should reflect the realities of what happened at the bargaining table and the performance that is to follow. This book, in contrast to others, covers the entire negotiation process in chronological order beginning with your decision to negotiate and continuing through the evaluation of your performance as a negotiator. A business executive in one of the negotiation seminars the author teaches as a University of Michigan professor summarized negotiation as follows: "Life is negotiation!" No one ever stated it better. As a mother with young children and as a company leader, the executive realized that negotiations are pervasive in our personal and business lives. With its emphasis on practical action, and with its chronological, holistic approach, this book provides a roadmap you can use when navigating through your life as a negotiator.

Real world negotiation examples and strategies from one of the most highly respected authorities in the field This unique book can help you change your approach to negotiation by learning key strategies and techniques from actual cases. Through hard to find real world examples you will learn exactly how to effectively and productively negotiate. The Book of Real World Negotiations: Successful Strategies from Business, Government and Daily Life shines a light on real world negotiation examples and cases, rather than discussing hypothetical scenarios. It reveals what is possible through preparation, persistence, creativity, and taking a strategic approach to your negotiations. Many of us enter negotiations with skepticism and without understanding how to truly negotiate well. Because we lack knowledge and confidence, we may abandon the negotiating process prematurely or agree to deals that leave value on the table. The Book of Real World Negotiations will change that once and for all by immersing you in these real world scenarios. As a result, you'll be better able to grasp the true power of negotiation to deal with some of the most difficult problems you face or to put together the best deals possible. This book also shares critical insights and lessons for instructors and students of negotiation, especially since negotiation is now being taught in virtually all law schools, many business schools, and in the field of conflict resolution. Whether you're a student, instructor, or anyone who wants to negotiate successfully, you'll be able to carefully examine real world negotiation situations that will show you how to achieve your objectives in the most challenging of circumstances. The cases are organized by realms—domestic business cases, international business cases, governmental cases and cases that occur in daily life. From these cases you will learn more about: Exactly how to achieve Win-Win outcomes The critical role of underlying interests The kind of thinking that goes into generating creative options How to consider your and the other negotiator's Best Alternative to a Negotiated Agreement (BATNA) Negotiating successfully in the face of power Achieving success when negotiating cross-culturally Once you come to understand through these cases that negotiation is the art of the possible, you'll stop saying "a solution is impossible." With the knowledge and self-assurance you gain from this book, you'll roll up your sleeves and keep negotiating until you reach a mutually satisfactory outcome!

For years, academic thinking on negotiations and auctions has matured in different silos. Negotiation theory focused on deals between two parties, investigating psychological motivations and invoking ideas like 'best alternative to a negotiated agreement.' Auction theory, on the other hand, focused exclusively on situations where multiple bidders were involved and the highest bidder won. Harvard Business School professor Guhan Subramanian specializes in understanding how deals. As he studied deals in the news, observed deals as a participant

and invited legendary dealmakers into his classroom, one commonality kept cropping up. Assets most often change hand not in a pure negotiation or a pure auction, but by a mechanism that freely combines elements from both schools of thought. Negotiators are 'fighting on two fronts' across the table, but also on the same side of the table with known, unknown, or possible competitors. In *Negotiauctions*, Subramanian provides a lively tour of both negotiation and auction theory, following those summaries with an in-depth look at his hybrid theory that includes strategies that readers can use in real life situations. Along the way Subramanian employs multiple case studies, from studio negotiations over a new season of the TV show *Frasier* to his own experience purchasing a car. Classroom tested in one of the world's best business schools, *Negotiauctions* is an indispensable how-to guide for anyone involved in the sale of high-value assets.

A member of the world renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. A member of the world-renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. For many years, two approaches to negotiation have prevailed: the "win-win" method exemplified in *Getting to Yes* by Roger Fisher, William Ury, and Bruce Patton; and the hard-bargaining style of Herb Cohen's *You Can Negotiate Anything*. Now award-winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one-size-fits-all strategies that don't match real world realities. *The Art of Negotiation* shows how master negotiators thrive in the face of chaos and uncertainty. They don't trap themselves with rigid plans. Instead they understand negotiation as a process of exploration that demands ongoing learning, adapting, and influencing. Their agility enables them to reach agreement when others would be stalemated. Michael Wheeler illuminates the improvisational nature of negotiation, drawing on his own research and his work with Program on Negotiation colleagues. He explains how the best practices of diplomats such as George J. Mitchell, dealmaker Bruce Wasserstein, and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house, buying a car, or landing a new contract. Wheeler also draws lessons on agility and creativity from fields like jazz, sports, theater, and even military science.

Better Together FDR and Eleanor. Mick and Keith. Jobs and Woz. There are countless examples of introvert-extrovert partnerships who make brilliant products, create great works of art, and even change history together. But these partnerships don't just happen. They demand wise nurturing. The key, says bestselling author Jennifer Kahnweiler, is for opposites to stop emphasizing their differences and use approaches that focus them both on moving toward results. Kahnweiler's first-of-its-kind practical five-step process helps introverts and extroverts understand and appreciate each other's wiring, use conflicts to spur creativity, enrich their own skills by learning from the other, and see and act on things neither would have separately. Kahnweiler shows how to perform the delicate balancing act required to create a whole that is exponentially greater than the sum of its parts.

This masterly book substantially extends Howard Raiffa's earlier classic, *The Art and Science of Negotiation*. It does so by incorporating three additional supporting strands of inquiry: individual decision analysis, judgmental decision making, and game theory. Each strand is introduced and used in analyzing negotiations. The book starts by considering how analytically minded parties can generate joint gains and distribute them equitably by negotiating with full, open, truthful exchanges. The book then examines models that disengage step by step from that ideal. It also shows how a neutral outsider (intervenor) can help all negotiators by providing joint, neutral analysis of their problem. Although analytical in its approach—building from simple hypothetical examples—the book can be understood by those with only a high school background in mathematics. It therefore will have a broad relevance for both the theory and practice of negotiation analysis as it is applied to disputes that range from those between

family members, business partners, and business competitors to those involving labor and management, environmentalists and developers, and nations.

It's part of how we establish relationships, work together, and arrive at solutions for our clients, our organizations, and ourselves. Simply put, those who don't negotiate well risk falling victim to those who do. Throughout his career, success expert Brian Tracy has negotiated millions of dollars worth of contracts. When discussing being stuck in a "win-win vs. win-lose" debate, most negotiation books focus on face-to-face tactics. Yet, table tactics are only the "first dimension" of David A. Lax and James K. Sebenius' pathbreaking 3-D Negotiation (TM) approach, developed from their decades of doing deals and analyzing great dealmakers. Moves in their "second dimension"—deal design—systematically unlock economic and noneconomic value by creatively structuring agreements. But what sets the 3-D approach apart is its "third dimension": setup. Before showing up at a bargaining session, 3-D Negotiators ensure that the right parties have been approached, in the right sequence, to address the right interests, under the right expectations, and facing the right consequences of walking away if there is no deal. This new arsenal of moves away from the table often has the greatest impact on the negotiated outcome. Packed with practical steps and cases, 3-D Negotiation demonstrates how superior setup moves plus insightful deal designs can enable you to reach remarkable agreements at the table, unattainable by standard tactics.

In this landmark book, world-renowned Harvard negotiation expert Daniel Shapiro presents a groundbreaking, practical method to reconcile your most contentious relationships and untangle your toughest conflicts. Once you fall prey to this mind-set, even a trivial argument with a family member or colleague can mushroom into an emotional uproar. Shapiro offers a powerful way out, drawing on his pioneering research and global fieldwork in consulting for everyone from heads of state to business leaders, embattled marital couples to families in crisis. How the world's leading innovators push their ideas to fruition again and again Edison famously said that genius is 1 percent inspiration, 99 percent perspiration. Ideas for new businesses, solutions to the world's problems, and artistic breakthroughs are common, but great execution is rare. According to Scott Branson, the capacity to make ideas happen can be developed by anyone willing to develop their organizational habits and leadership capability. That's why he founded Behance, a company that helps creative people and teams across industries develop these skills. Branson has spent six years studying the habits of creative people and teams that are especially productive—the ones who make their ideas happen time and time again. After interviewing hundreds of successful creatives, he has compiled their most powerful—and often counterintuitive—practices, such as:

- Generate ideas in moderation and kill ideas liberally
- Prioritize through nagging
- Encourage fighting within your team

While many of us obsess about discovering great new ideas, Branson shows why it's better to develop the capacity to make ideas happen—a capacity that endures over time. From two leaders in executive education at Harvard Business School, here are the mental habits and proven strategies you need to achieve outstanding results in any negotiation. Whether you've "seen it all" or are just starting out, *Negotiation Genius* will dramatically improve your negotiating skills and confidence. Drawing on decades of behavioral research plus the experience of thousands of business clients, the authors take the mystery out of preparing for and executing negotiations—whether they involve multimillion-dollar deals or improving your next salary offer. What sets negotiation geniuses apart? They are the men and women who know how to:

- Identify negotiation opportunities where others see no room for discussion
- Discover the truth even when the other side wants to conceal it
- Negotiate successfully from a position of weakness
- Defuse threats, ultimatums, lies, and other hardball tactics
- Overcome resistance and "sell" proposals using proven influence tactics
- Negotiate ethically and create trusting relationships—along with great deals
- Recognize when the best move is to walk away

•And much, much more This book gets "down and dirty." It gives you detailed strategies—including talking points—that work in the real world even when the other side is hostile, unethical, or more powerful. When you finish it, you will already have an action plan for your next negotiation. You will know what to do and why. You will also begin building your own reputation as a negotiation genius.

"Written in the same remarkable vein as *Getting to Yes*, this book is a masterpiece."
—Dr. Steven R. Covey, author of *The 7 Habits of Highly Effective People*

- Winner of the Outstanding Book Award for Excellence in Conflict Resolution from the International Institute for Conflict Prevention and Resolution
- In *Getting to Yes*, renowned educator and negotiator Roger Fisher presented a universally applicable method for effectively negotiating personal and professional disputes. Building on his work as director of the Harvard Negotiation Project, Fisher now teams with Harvard psychologist Daniel Shapiro, an expert on the emotional dimension of negotiation and author of *Negotiating the Nonnegotiable: How to Resolve Your Most Emotionally Charged Conflicts*. In *Beyond Reason*, Fisher and Shapiro show readers how to use emotions to turn a disagreement—big or small, professional or personal—into an opportunity for mutual gain.

Every day, people make deals that matter. But very few of us benefit from the public scrutiny and analysis that have helped Canada's leading negotiation experts hone their craft. Hockey team executives, cabinet ministers, bank presidents and labour leaders are constantly under the microscope, and they have learned what it takes to build agreements where everyone wins. And they can help all of us do the same. After a long career in politics, David Dingwall has become one of Canada's leading experts on negotiating. As a visiting professor at Ryerson University, he lectures on the subject of negotiation. He has sought out the experience and advice of Canada's top negotiators in order to develop an approach to deal-making that reflects Canadian values and attitudes. In this book, he explains the approaches and practices that he and over twenty of the country's best deal-makers use to achieve mutually beneficial deals. He cites the experiences of former TD Bank president Ed Clark, NHL Players' Association head Donald Fehr, former leader of the Canadian Auto Workers Buzz Hargrove, former Ontario premier and Liberal Party leader Bob Rae, and former Harper cabinet minister Lisa Raitt. He also shares behind the scenes insights from his own experience as a politician, legal counsel and business advisor. Video links to his interviews with the experts are included to allow readers to learn more from the people whose experience informs the book. This accessible and engaging book allows anyone to learn -- from the experts -- how to negotiate so everyone wins.

Start with No offers a contrarian, counterintuitive system for negotiating any kind of deal in any kind of situation—the purchase of a new house, a multimillion-dollar business deal, or where to take the kids for dinner. Think a win-win solution is the best way to make the deal? Think again. For years now, win-win has been the paradigm for business negotiation. But today, win-win is just the seductive mantra used by the toughest negotiators to get the other side to compromise unnecessarily, early, and often. Win-win negotiations play to your emotions and take advantage of your instinct and desire to make the deal. Start with No introduces a system of decision-based negotiation that teaches you how to understand and control these emotions. It teaches you how to ignore the siren call of the final result, which you can't really control, and how to focus instead on the activities and behavior that you can and must control in order to successfully negotiate with the pros. The best negotiators: * aren't interested in "yes"—they prefer "no" * never, ever rush to close, but always let the other side feel comfortable and

secure * are never needy; they take advantage of the other party's neediness * create a "blank slate" to ensure they ask questions and listen to the answers, to make sure they have no assumptions and expectations * always have a mission and purpose that guides their decisions * don't send so much as an e-mail without an agenda for what they want to accomplish * know the four "budgets" for themselves and for the other side: time, energy, money, and emotion * never waste time with people who don't really make the decision Start with No is full of dozens of business as well as personal stories illustrating each point of the system. It will change your life as a negotiator. If you put to good use the principles and practices revealed here, you will become an immeasurably better negotiator.

"With good judgment, little else matters. Without it, nothing else matters." Whether we're talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader's judgment determines the fate of the entire organization. That's why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a powerful framework for making tough calls when the stakes are high and the right path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life with interviews with world-class leaders who have thrived or suffered because of their judgment calls. These stories include: • Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world's premier technology growth company. • Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system. • Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect. • The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega. • A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company. • Brad Anderson, CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it.

Whether you're running a small department or a global corporation, Judgment will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can afford to neglect this crucial discipline—and no previous book has

ever brought it into such clear focus.

Whether you are selling a house, closing a business deal, settling a divorce, arbitrating a labor dispute, or trying to hammer out an international treaty, Howard Raiffa's new book will measurably improve your negotiating skills. Although it is a sophisticated self-help book—directed to the lawyer, labor arbitrator, business executive, college dean, diplomat—it is not cynical or Machiavellian: Raiffa emphasizes problems and situations where, with the kinds of skills he aims to develop, disputants can achieve results that are beneficial to all parties concerned. Indeed, he argues that the popular “zero-sum” way of thinking, according to which one side must lose if the other wins, often makes both sides worse off than they would be when bargaining for joint mutual gains. Using a vast array of specific cases and clear, helpful diagrams, Raiffa not only elucidates the step-by-step processes of negotiation but also translates this deeper understanding into practical guidelines for negotiators and “intervenors.” He examines the mechanics of negotiation in imaginative fashion, drawing on his extensive background in game theory and decision analysis, on his quarter-century of teaching nonspecialists in schools of business and public policy, on his personal experiences as director of an international institute dealing with East/West problems, and on the results of simulated negotiation exercises with hundreds of participants. There are popular books on the art of winning and scholarly books on the science of negotiation, but this is the first book to bridge the two currents. Shrewd, accessible, and engagingly written, it shows how a little analysis sprinkled with a touch of art can work to the advantage of any negotiator.

George Kohlrieser—an international leadership professor, consultant, and veteran hostage negotiator—explains that it is only by openly facing conflict that we can truly progress through the most difficult business challenges. In this provocative book, he reveals how the proven techniques and psychological insights used in hostage negotiation can be applied successfully to any personal or business relationship. Step by step, he outlines the seven key factors that anyone can use to remove the blocks that stand in the way of resolving tough problems and shows how business leaders, in particular, can develop and access the skills they need to create trust and a positive mind-set in their companies.

If you were a mouse trapped in a maze and someone kept moving the cheese, what would you do? Over a decade ago the bestselling business fable *Who Moved My Cheese?* offered its answer to this question: accept that change is inevitable and beyond your control, don't waste your time wondering why things are the way they are, keep your head down and start looking for the cheese. But success in the areas of innovation, entrepreneurship, creativity, leadership, and business growth—as well as personal growth—depends on the ability to push the boundaries, reshape the environment, and play by a different set of rules: our own. With that in mind, Harvard Business School professor Deepak Malhotra offers a radically different answer to this question. Malhotra tells an inspiring story about three unique and adventurous mice—Max, Big, and Zed—who refuse to accept their reality as given. As we watch their lives unfold and intersect, we discover that instead of just blindly chasing after the cheese, each of us has the ability to escape the maze or even reconfigure it to our liking. In the face of established practices, traditional ideas, scarce resources, and the powerful demands or expectations of others, we often underestimate our ability to control our own destiny and overcome the constraints we face—or think we face. *I Moved Your Cheese* reminds us that we can create the new circumstances and realities we want, but first we must discard the often deeply ingrained notion that we are nothing more than mice in someone else's maze. As Zed explains, "You see, Max, the problem is not that the mouse is in the maze, but that the maze is in the mouse." Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed "beguiling" and "fascinating," Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence ("Law 1: Never Outshine the Master"), others teach the value of confidence ("Law 28: Enter Action with Boldness"), and many recommend absolute self-preservation ("Law 15: Crush Your Enemy Totally"). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
