Sickle cell disease (SCD) is a genetic condition that affects approximately 100,000 people in the United States and millions more globally. Individuals with SCD endure the psychological and physiological toll of repetitive pain as well as side effects from the pain treatments they undergo. Some adults with SCD report

reluctance to use health care services, unless as a last resort, due to the racism and discrimination they face in the health care system. Additionally, many aspects of SCD are inadequately studied, understood, and addressed.

Addressing Sickle Cell Disease examines the epidemiology, health outcomes, genetic implications, and societal factors associated with SCD and sickle cell trait (SCT). This report explores the current guidelines and best practices for the care of patients with SCD and recommends priorities for programs, policies, and research. It also discusses limitations and opportunities for developing national SCD patient registries and surveillance systems, barriers in the healthcare sector associated with SCD and SCT, and the role of patient advocacy and community engagement groups.

Children's health has clearly improved over the past several decades. Significant and positive gains have been made in lowering rates of infant mortality and morbidity from infectious diseases and accidental causes, improved access to health care, and reduction in the effects of environmental contaminants such as lead. Yet major questions still remain about how to assess the status of children's health, what factors should be monitored, and the appropriate measurement tools that should be used. *Children's Health, the Nation's Wealth: Assessing and Improving Child Health* provides a detailed examination of the information about children's health that is needed to help policy makers and program providers at the federal, state, and local levels. In order to improve children's health-and, thus, the health of future generations-it is critical to have data that can be used to assess both current conditions and possible future threats to children's health. This compelling book describes what is known about the health of children and what is needed to expand the knowledge. By strategically improving the health of children, we ensure healthier future generations to come.

This handbook examines Pakistan's 70-year history from a number of different perspectives. When Pakistan was born, it did not have a capital, a functioning government or a central bank. The country lacked a skilled workforce. While the state was in the process of being established, eight million Muslim refugees arrived from India, who had to be absorbed into a population of 24 million people. However, within 15 years, Pakistan was the fastest growing and transforming economy in the developing world, although the political evolution of the country during this period was not equally successful. Pakistan has vast agricultural and human resources, and its location promises trade, investment and other opportunities. Chapters in the volume, written by experts in the field, examine government and politics, economics, foreign policy and environmental issues, as well as social aspects of Pakistan's development, including the media, technology, gender and education. Shahid Javed Burki is an economist who has been a member of the faculty at Harvard University, USA, and Chief Economist, Planning and Development Department, Government of the Punjab. He has also served as Minister of Finance in the Government of Pakistan, and has written a number of books, and journal and newspaper articles. He joined the World Bank in 1974 as a senior economist and went on to serve in several senior positions. He was the (first) Director of the China Department (1987–94) and served as the Regional Vice-President for Latin America and the Caribbean during 1994–99. He is currently the Chair of the Board of Directors of the Shahid Javed Burki Institute of Public Policy at NetSol (BIPP) in Lahore. Iftekhhar Ahmed Chowdhury is a career Bangladeshi diplomat and former Minister of Foreign Affairs in the Government of Bangladesh (2007–08). He has a PhD in international relations from the Australian National University, Canberra. He began his career as a member of the civil service of Pakistan in 1969. Dr Chowdhury has held senior diplomatic positions in the course of his career, including as Permanent Representative of Bangladesh to the United Nations in New York (2001–07) and in Geneva (1996–2001), and was ambassador to Qatar,

Chile, Peru and the Vatican. He is currently a visiting senior research fellow at the Institute of South Asian Studies, National University of Singapore. Asad Ejaz Butt is the Director of the Burki Institute of Public Policy, Lahore, Pakistan.
