

Nepali Guide For Class 9

Paradise Lost examines the state-society relationships in Nepal and demonstrates that the nature of the state, disjuncture between the state and the society, and the rupture of the ideological hegemony of the ruling class of Nepal have created a situation where existing institutional frameworks are disintegrating and the state is rapidly unraveling. Dr. Ali Riaz and Dr. Subho Basu analyze the roles of ethnicity, identity, and deprivation, in engendering discontent and the rise of the Maoists as a formidable political force. Mindful of the geo-strategic importance of the country, this book contextualizes these domestic developments within the post-9/11 global world. Jointly authored by a political scientist and a historian this book brings together structural and historical perspectives. Written in an engaging language, Paradise Lost? will appeal to political scientists, historians, sociologists, and those interested in current affairs.

Samrat Upadhyay's new collection vibrates at the edges of intersecting cultures. Journalists in Kathmandu are targeted by the government. A Nepali man studying in America drops out of school and finds himself a part of the unrest in Ferguson, Missouri. A white American woman moves to Nepal and changes her name. A Nepali man falls in love with a mysterious foreign black woman. A rich kid is caught up in his own fantasies of poverty and bank robbery. In the title story, a powerful woman, the owner of a construction company, becomes a political prisoner, and in stark and unflinching prose we see both her world and her mind radically remade. Through the course of the stories in this collection, Upadhyay builds new modes of seeing our interconnected contemporary world. A collection of formal inventiveness, heartbreak and hope, it reaffirms Upadhyay's position as one of our most important chroniclers of globalization and exile.

There has been growing concern about "failed states" around the world, and since the massacre of the Royal family in Nepal in 2001 increasing media attention has focused on the decline of the state and the rise of the Maoist rebels in this Himalayan kingdom where so many Westerners have taken trekking vacations. Development was always going to be a problem in Nepal, but few predicted the precipitous collapse of the state in rural areas in the face of the Maoist insurgency beginning in 1996 due, to a large extent, to the failure of the state to deliver promised development and benefits; instead, it became more and more authoritarian, even oppressive. Exploring the complex relationship between a modernizing, developmentalist state and the people it professes to represent, these fascinating and readable accounts of ordinary people's lives depict the various contexts out of which the Maoist insurgency grew.

A comprehensive and accessible one-volume history of Nepal, first published in 2005.

International development efforts aimed at improving girls' lives and education have been well-intended, somewhat effective, but ultimately short-sighted and incomplete. This is because international development efforts often operate under a reductive understanding of the term 'gender' and how it influences the lives of girls and boys. Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour. In particular, the analysis in Gender Trouble Makers focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal. In developing countries like Nepal, promoting access to and participation in existing formal education programme is clearly necessary, but it is not, in itself, sufficient to transform gender power relations in the broader society. When gender is properly addressed as a process, then all stakeholders involved - researchers, governmental officials, and

community members - can begin to understand and devise more effective ways to increase both girl and boy students' enrollment, participation, and success in school.

The aim of this course, which covers the whole grammar and all the constructions of modern Nepali, is to present a full description of both the spoken and written forms of modern standard Nepali, and to enable the student to understand, speak and read most types of Nepali he or she is likely to encounter. The earlier lessons concentrate mainly on the spoken style, and the conversation passages whilst the later lessons concern religious, political and literary topics. A knowledge of the language leads to a deeper understanding of the culture of its people, and the object of A Course in Nepali is to provide the means of learning it without much difficulty. Earlier editions of this course have been the standard book for students at the School of Oriental and African Studies, and it is without question the established market leader.

From its first edition the purpose of Walford has been to identify and evaluate the widest possible range of reference materials. No rigid definition of reference is applied. In addition to the expected bibliographies, indexes, dictionaries, encyclopaedias, and directories, a number of important textbooks and manuals of general practice are included. While the majority of the items are books, Walford is a guide to reference material. Thus periodical articles, microforms, online and CD-ROM sources are all represented. In this volume a particular effort has been made to improve coverage of the latter two categories.

Are reports of the death of conventional fieldwork in anthropology greatly exaggerated? This book takes a critical look at the latest developments and key issues in fieldwork. The nature of 'locality' itself is problematic for both research subjects and fieldworkers, on the grounds that it must now be maintained and represented in relation to widening (and fragmenting) social frames and networks. Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison. From the social space of a cybercafe to cities in India, the UK and South Africa among others, this book features a wide range of ethnographic studies that provide new ways of looking at the

concepts of 'locality' and 'site'. It shows that rather than taking key fieldwork processes such as globalization and mobility for granted, anthropologists are well-placed to examine and critique the totalizing assumptions behind these notions.
