Over twenty years ago, Worre began focusing on developing the skills to become a network marketing expert. Now he shares his wisdom in a guide that will ignite your passion for this profession and help you make the decision to create the life of your dreams. He shows you how to find prospects, present your product, help them become customers or distributors, and much more.

Not every prospect joins right away. They have to think it over, review the material, or get another opinion. This is frustrating if we are afraid to follow up with prospects. What can we do to make our follow-up efforts effective and rejection-free? How do we maintain posture with skeptical prospects? What can we say to turn simple objections into easy decisions for our prospects? Procrastination stops and fear evaporates when we have the correct follow-up skills. No more dreading the telephone. Prospects will return our telephone calls. And now, we can look forward to easy, bonded conversations with prospects who love us. Prospects want a better life. They are desperately searching for: 1. Someone to follow. 2. Someone who knows where they are going. 3. Someone who has the skills to get there. We have the opportunity to be that guiding light for our prospects. When we give our prospects instant confidence, contacting our prospects again becomes fun, both for the prospects and for us. Don't we both want a pleasant experience? Don't lose all those prospects that didn't join on your first contact. Help reassure them that you and your opportunity can make a difference in their lives. The term 'networking' can mean very different things in different contexts: formal organisational structures, personal or career development, or a technique for increasing sales. This is an approachable book which brings together the basics of all these meanings, underpinned by an overview of multiple theoretical models that support the various approaches to networking. Drawing on mainstream models in the fields of marketing, employability, innovation and organisational studies, Business Networking provides an integrated overview of the process and structure of networking across a range of contexts. Synthesising theory with practice, features include examples and viewpoints from a range of networking practitioners in each chapter, presented in their own words, as well as chapter summaries and reflective questions. Networking is considered a key skill for students, entrepreneurs and practitioners and, given the explosion of opportunities brought by the digital age for individuals and organisations to operate within a broad and global network, an introduction to maximising the benefits is timely. This book should be recommended reading for a broad range of postgraduate courses, from relationship marketing and entrepreneurship skills to employability and degree apprenticeship programmes. It should also be useful for reflective practitioners looking to expand and utilise their networks effectively.
