Key Features: This is the only book in India, exclusively published for NIMHANS PG Entrance Exam and is very successful since 2001. NIMHANS Online Pattern MCQs of 2017 exams included. 780 Image-based NIMHANS Pattern Questions are provided with utmost clarity. 5,200 NIMHANS Pattern Previous Exam Questions thoroughly revised and updated from 19th Edition of Harrison's Internal Medicine and 26th Edition of Bailey & Love's Surgery. MCQs are arranged year-wise in each subject from 1998–2017. Very thoroughly verified answers from super-specialty subject experts, faculty members of neuro institutes and PG aspirants. Explanations are provided precisely in bullet and tabulated form incorporating only high yield and relevant facts. Repeatedly asked questions and their essence has been highlighted as important points in nutshell. More illustrations are added to understand the difficult topics better. Necessary Mnemonics for faster learning have been added.

The Diploma in Otolaryngology - Head & Neck Surgery (DOHNS) is now an intercollegiate examination, and can count towards membership of one of the surgical colleges of Great Britain. The DOHNS has evolved to fit its new role, leaving little up-to-date material available for candidates preparing for the written

component. This book by former DOHNS candidates meets that need, focusing on topics that are likely to be examined. Each answer is accompanied by an explanation using current evidence-based research wherever possible. This will be an essential revision text for all DOHNS candidates. 'Applicable to medical students and trainee doctors in general practice as well as ENT and related head and neck disciplines such as neurology and neurosurgery. Each question is followed by the correct answer and clear and concise explanation. Indeed, it is the quality of this additional information that makes this book stand out from its competitors. It provides the student with experience and examination technique in answering these questions, but additionally it is a teaching volume in its own right. It is a credit to its enthusiastic and very competent young teachers in its content, design and clarity, and is another excellent contribution to our thriving specialty.' - from the Foreword by David Howard

The global obesity epidemic is growing in severity, affecting people of every age and costing healthcare providers millions of dollars every year. Every day, anesthesiologists are presented with obese and morbidly obese patients undergoing every type of surgical procedure; the management of these patients differs significantly from that of normal weight patients undergoing the same procedure. *Anesthetic Management of the Obese Surgical Patient* discusses

these specific management issues within each surgical specialty area. Initial chapters describe pre-operative assessment and pharmacology; these are followed by detailed chapters on the anesthetic management of a wide variety of surgical procedures, from joint replacement to open heart surgery. Essential reading for anesthesiologists and nurse anesthetists worldwide, *Anesthetic Management of the Obese Surgical Patient* and its companion work by the same authors, *Morbid Obesity: Peri-operative Management*, enable both trainees and practised professionals to manage this complex patient group effectively. This eBook is one of 10 carefully selected collections of key articles from the *Anaesthesia and Intensive Care Medicine* journal - a continually updated, evidence-based learning resource, based on the RCOA Curriculum. It is ideal for trainees approaching a new sub-specialty and/or when preparing for the FRCA (or similar) exams. It will also prove an invaluable, authoritative refresher for life-long learning and CPD. Related MCQs are included to test your understanding. The *EHRA Book of Interventional Electrophysiology* is the second official textbook of European Heart Rhythm Association (EHRA). Using clinical cases to encourage practical learning, this book assists electrophysiologists and device specialists in tackling both common and unusual situations that they may encounter during daily practice. Richly illustrated, and covering

electrophysiological procedures for supra-ventricular and ventricular arrhythmias, the book enables specialists to deepen their understanding of complex concepts and techniques. Tracings, covering supra-ventricular and ventricular arrhythmias, are presented with multiple-choice questions to allow readers to hone their skills for interpreting challenging cases and to prepare for the EHRA certification exam in electrophysiology. Cases include Orthodromic AVRT, PV Isolation, VT ablation, and Atypical left atrial flutter to name a few. The EHRA Book of Interventional Electrophysiology is a wide-ranging, practical case-book, written by leading experts in the field and edited by members of the EHRA education committee: an essential companion for electrophysiologists and trainees alike. Ensure readiness for the USMLE® or any other high-stakes exam covering biochemistry! Thieme Test Prep for the USMLE®: Biochemistry by Joseph D. Fontes and Darla L. McCarthy fills a void in the available board preparatory materials with its focus on biochemistry. Readers will learn to recall, analyze, integrate, and apply biochemical and molecular biological knowledge to solve clinical problems. Key Highlights Over 325 USMLE®-style multiple choice questions on biochemistry, classified as easy, moderate, and difficult, include detailed explanations Questions begin with a clinical vignette, and approximately 25% are image-based, mirroring the USMLE®-format This essential resource will

This comprehensive multiple choice questions style book covers most aspects of oral surgery. It uses real clinical scenarios with extensive answers based on textbooks and current literature. The reader will gain a broad understanding and confidence in different flap designs with their clinical indications, dentoalveolar surgery, correct use of exodontia instruments, soft tissue surgery, orthodontic surgery and surgical endodontics. The book also delves into dental infections and their management, medication related osteonecrosis of the jaw, osteoradionecrosis, trauma, surgical aspects of dental implants, oroantral communication. It also covers basic sciences, bleeding tendency and anticoagulants, local anaesthesia and sedation, different odontogenic and non-odontogenic lesions of the jaw. The target audience for this book would be oral

and maxillofacial surgeons, dental surgeons and any clinician with an interest in oral surgery. The book will be of particular interest to candidates sitting their exit examinations. About the Author Mr. Akeel Mosea Jordanian Board (OMFS), FFDRCSI(OSOM), MFDRCSI, Dip Imp Den RCS (Eng), BDS. Specialist in Oral and maxillofacial surgery (Jordan Medical Council). Specialist in oral surgery (UK General Dental Council). Specialty doctor in oral and maxillofacial surgery. The Princess Alexandra Hospital. United Kingdom. Specialist oral surgeon. Thieme Test Prep for the USMLE®: Medical Physiology is the choice of medical students... ...The major test-prep resources do not focus on these subjects in detail. A question bank...would be beneficial to those who struggle with these as an additional resource for studying... - Ethan Young (Fourth-year medical student, University of South Dakota, Sanford School of Medicine) ...Very well written in step 1 format, with very good explanations-which is one of the most helpful parts of a prep question set... Succinct but comprehensive in helping me to understand more about each of the other answers listed (and easy for me to see why they are wrong). – Chris Moser (Third-year medical student, Alabama College of Osteopathic Medicine) Thieme Test Prep for the USMLE®: Medical Physiology from Gabi Waite and Maria Sheakley transforms high-yield concepts

into challenging multiple choice questions organized by body system. Readers will learn how to synthesize, integrate, and apply physiological concepts to clinical situations in a format mirroring the USMLE® exam. Key Highlights More than 750 USMLE®-style multiple choice questions on physiology and pathophysiology, categorized as easy, moderate, and difficult, with detailed explanations Questions begin with a clinical vignette and approximately 20% are image-based, mirroring the USMLE-format. Every question tagged by organ system, difficulty level, disease, and normal, abnormal or therapeutic process, enabling electronic format question sorting This essential resource will help you assess your knowledge and fully prepare for board examinations.

The perioperative care of individuals with neurologic compromise is critically important, yet it is only one dimension of the rich relationship between anaesthesiology and the neurosciences. The mechanism of everyday therapeutic interventions such as anaesthesia and analgesia is exciting neuroscience in its own right. At the new frontier of outcomes studies lies the question of how the perioperative period might impact the brain. For example, questions related to anaesthetic neurotoxicity, delirium, and cognitive dysfunction pose critical challenges for the field. The Oxford Textbook in Neuroscience and Anaesthesiology addresses the exciting field of neuroanaesthesiology in a new and stimulating way. In twenty eight chapters, the neuroscientific basis of anaesthesiology, the full spectrum of clinical neuroanaesthesia, and the care of neurologic patients undergoing non-neurologic surgery are explored in one

comprehensive textbook for the first time. The first section considers the neural mechanisms of general anaesthetics, cerebral physiology, the neurobiology of pain, and more. The second section explores the care of patients with neurologic disease in the operating room or intensive care unit. These clinical chapters systematically treat the perioperative considerations of both brain and spine surgery, and provide introductions to neurocritical care and pediatric neuroanaesthesia. The final section outlines the care of neurologic patients undergoing non-neurologic surgery. It examines key connections of neurology and anaesthesiology, examining how conditions such as dementia, stroke, or epilepsy interface with the perioperative period. Each chapter has been carefully crafted to be concise yet highly informative, reflecting the cutting edge of neuroscience and neuroanaesthesiology. This international textbook gathers the best available expertise of authors and leaders worldwide. Includes access to online-only content, including more than 20 cases and more than 90 questions that can be used in presentations and teaching sessions. By activating your unique access code, you can access and use the material.

Designed to evaluate candidates' expertise and provide direction for continued learning, the American Board of Neurological Surgery (ABNS) primary (written) examination is a required step to attaining board certification in the U.S. The rigorous exam requires substantial preparation. Each author brings unique qualifications to this publication – from writing previous editions, to achieving the second highest exam score in the U.S. – to the insights of a current chief resident. Their mission is to help readers comprehend the material and retain this knowledge, rather than solely striving for the highest score. This essential board prep review mirrors the exam's multiple-choice format and seven sections: neurosurgery, clinical

neurology, neuroanatomy, neurobiology, neuropathology, neuroradiology, and clinical skills/critical care. Presented in a new and improved layout, the third edition encompasses the numerous advances in neurosurgery since the 2004 edition was published. New Key Features:

- Expanded coverage of endovascular techniques for the treatment of cerebral aneurysms, the latest advanced imaging technologies, and treatment paradigm updates for acute ischemic stroke
- More than 1,000 questions with answers that include detailed, insightful explanations
- High-quality illustrations and superb anatomical dissections by Albert L. Rhoton Jr., MD, and other masters

This invaluable board review will help neurosurgical residents prepare thoroughly for the primary ABNS exam. It is also beneficial for neuroscience residents specializing in neurology and neuropathology.

Neurotrauma in Multiple Choice Questions is the FIRST review book to use the multiple-choice question format in neurosurgical trauma. Students of neurosurgery, the resident, the fellow, the younger neurosurgeon preparing for exams or practice, and even the later stage neurosurgeon are the target audience of this book. The information in this work is in accordance with the most up-to-date best practice evidence, with a style that mirrors the format adopted by the majority of local, regional, and international board examinations. The strategy and format of the questions provide a stepwise progression from definition to surgical decision-making, to a comprehensive and concise overview of neurological trauma.

Offers real MCQ practice examinations at the appropriate level for preparing for your final medical examinations. This book features: four practice papers each containing 60 questions in 'Best of Five' and multiple choice format: this allows you to test your knowledge and prepare for the examination.

The questions used in this book have been developed and continuously updated over 15 years. 'MCQs in Paediatrics' includes questions and detailed answers submitted by paediatricians in all specialties, and covers the widest range of clinical skills and paediatric knowledge. The questions have been used in both undergraduate and postgraduate examinations at the DCH and MRCP level. All questions have been reviewed and refined following the analysis of examination results, and are designed to test the application of knowledge rather than just the facts. The answers are accompanied by detailed explanations which allow the book to be used both for self-assessment and as a guide for further study. An invaluable self-assessment tool for emergency medicine trainees in Australasia. Emergency Medicine MCQs is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in Emergency Medicine MCQs cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice – from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency

An absolute requisite for the neurosurgery exams and an indispensable source of guidance on overcoming the challenges that arise in everyday practice - This excellent neurosurgical study tool offers superb preparation for in-service and national qualifying exams - Reflects all of the updates and developments to make this volume a leader in the field - Incorporates an enhanced emphasis on neurosurgical outcomes to mirror the growing importance of this super special subject - Delivers comprehensive updates to keep the readers current with the latest research, techniques and emerging procedures in the field as well as completely new questions on every topic to help aspirants for a rapid revision of neurosurgery for entrance in MCh exam - Contains necessary explanations at the end of questions in order to make the topic explicitly understandable and to offer a reasoning behind the specific answer

Ideal for both neurosurgical residents and recertifying neurosurgeons, Neurosurgery Self-Assessment: Questions and Answers offers the most comprehensive, up to date coverage available. Over 1,000 clinically relevant multiple-choice questions across 46 topic areas test the candidate's knowledge of basic neuroscience and neurosurgical subspecialties to an unparalleled degree and provide detailed answer explanations to facilitate learning and assessment. Over 700 histology, pathology, radiology, clinical and anatomical images serve as an index of routinely tested-on images in neurosurgical examinations with high-yield summaries of each pathology to reinforce and simplify key concepts. Includes only multiple choice questions in both single-best-answer and extended matching item (10-20 options) format increasingly adopted by neurosurgery certification boards worldwide. Questions are

organized by topic and classified by degree of difficulty through a highly visual "traffic light system" which codes each question in green, amber, or red. Includes coverage of the landmark studies in areas such as vascular, stroke, spine and neurooncology. Practical tips facilitate study with test-taking strategies and things to consider before sitting for an exam. Utilizes Imperial and SI units throughout.

Critical Care MCQs is the perfect companion for anyone sitting exams in intensive care, as a training resource or just wanting to improve their knowledge in this constantly developing area of medical practice. Written by critical care doctors with experience of UK and European examination formats, this book leads the reader through 450 true/false questions with referenced explanations, covering core syllabus topics and key influential papers to date. A detailed list of further resources and recommendations relevant to critical care revision is also provided to enable readers to further their knowledge and understanding. It is hoped that this book will prove invaluable for preparation and success in upcoming intensive care exams for both candidates and trainers. This book would be useful for not only candidates sitting the UK Final Fellowship of Intensive Care Medicine (FFICM) and European Diploma of Intensive Care (EDIC) exams, but also the Indian Diploma in Critical Care Medicine (IDCCM), the Diploma of the Irish Board of Intensive Care Medicine (DIBICM), the Australia and New Zealand Fellowship of the College of Intensive Care Medicine (CICM), American Board and any other country-related intensive care exams.

The single best answer format of questions is invaluable in assessing a trainee's clinical skills and problem-solving abilities. It allows the trainee to demonstrate application of their knowledge to clinical practice. This book comprises six sets of practice papers. Each set contains 30 single best answer questions which cover topics including clinical anaesthesia, pain and intensive care. The questions are based on the recent changes introduced to the written part of the final FRCA examination. The best possible answer to a given clinical scenario is substantiated by a detailed explanation drawn from recent review articles and textbooks in clinical anaesthesia. These questions will enable candidates to assess their clinical knowledge and skills in problem-solving, data interpretation and decision making. This book is essential study material for candidates sitting postgraduate examinations in anaesthesia and intensive care medicine. It is not only an essential guide for trainees but also an invaluable educational resource for all anaesthetists.

Essentials of Plastic Surgery: Q&A Companion is the companion to Essentials of Plastic Surgery, Second Edition, which covers a wide variety of topics in aesthetic and reconstructive plastic surgery. As such, it is designed to test your knowledge of the source book, which may be helpful in the clinical setting and beyond. It presents both multiple choice questions and extended matching questions in single best answer format. The 1200 questions are carefully constructed to be practical and thorough, and are accompanied by detailed answers that help enhance understanding of both the

right and wrong answers. Compact enough to fit in a lab coat pocket, its design and organization allow for quick and easy reading. The print book is accompanied by a complimentary eBook that can be accessed on smartphones and tablets. It is the go-to resource for all students of plastic surgery, whether residents in training or experienced practitioners.

This comprehensive book focuses on neurosurgical aspects of the pineal gland. By covering virtually all aspects of the pineal gland, it fills an important gap in the neurosurgical literature. Further, it approaches this vital component of the human brain from various angles: embryology, anatomy, physiology, pathology, radiology and surgical techniques. More than 70 single-best-answer multiple-choice questions (MCQs) are distributed throughout the chapters. Offering an essential review for residents and surgeons across neurosurgical disciplines and containing most of the critical information needed to prepare for both the primary and certification exam, the book will also be of interest to neurologists, neuroscientists and medical students. International experts present in this volume advances in reconstructive neurosurgery focusing on the fields of neurotrauma and neurodegenerative disorders. The highlights include building an international strategy for risk reduction, documenting an multidisciplinary approach towards restoration of function in paraplegic spinal cord-injured patients, describing a new approach for statistical analysis in traumatic brain injury trials, describing blood flow changes in diffuse brain injury, discussing

rehabilitation programs in Germany following acute brain injury, describing research data from Taiwan on neurotrauma, showing the neuropsychiatric effects from deep brain stimulation for movement disorders, defining the role played by imaging for deep brain stimulation targeting in mental illness, using radiosurgery in decompression in the treatment of trigeminal neuralgia, describing the development of radiosurgery from brain to the spine, listing new transgenic animal models of Parkinson's disease, discussing gene therapy for neuropathic pain and Parkinson's disease, and finally, discussing constrained-induced movement therapy for stroke patients, and endovascular therapy for cerebrovascular disorders.

Practical Q&A guide enhanced with unique diagrams and tables to ace the ABNS primary exam! Neurosurgery Primary Examination Review: High Yield Questions, Answers, Diagrams, and Tables by Amgad S. Hanna addresses the knowledge gaps in currently existing neurosurgical board study guides. It is based on a collection of highly effective practice questions previously administered to neurosurgical residents at the University of Wisconsin. Each chapter covers two to three topics with 60 multiple choice and matching questions and only one correct answer. The reader-friendly content and layout make it easy to organize and review the complex subject matter in preparation for the ABNS written exam or for educational review. Section I is divided into 20 chapters with questions followed by answer keys. This section covers anatomy, neurology, pathology, radiology, critical care, neurosurgery, and neurobiology. Chapters 17-20 cover comprehensive exam questions and answers across all specialty areas including sarcoidosis, lead toxicity, central neurocytoma, and prion disease. Key Highlights Approximately 600 questions divided into 10 tests cover relevant knowledge for the exam Answer keys include salient information on important differentials More than 60 tables and diagrams provide a practical, self-directed method for organizing and retaining important facts More than 200 high-quality images including radiographs, pathology slides, anatomical drawings, and operative photographs accompany questions and answers This concise textbook is a must-have reference for all neurosurgical residents preparing to sit for the ABNS primary exam. Its format is also ideal for incorporating into the neurosurgical

curriculum or as a study guide for the maintenance of certification exams.

This revision book is specifically designed to help candidates revise the MRCS syllabus, as defined by the Intercollegiate Surgical Curriculum Project (ISCP). The book features 350 multiple choice questions in the SBA format with detailed explanations.

An essential companion for both the aspiring and practising electrophysiologist, The EHRA Book of Pacemaker, ICD and CRT Troubleshooting assists device specialists in tackling both common and unusual situations that they may encounter during daily practice. Taking a case-based approach, it examines pacemakers, implantable cardioverter defibrillators and cardiac resynchronisation therapy. Much more than just a technical manual of device algorithms, the cases help readers to consolidate their technical knowledge, and improve their reasoning and observation skills so they are able to tackle device troubleshooting with confidence. The 70 cases are arranged in three sections by increasing levels of difficulty to walk readers through all the skills and knowledge they need in an easy to use and structured format. Each case contains a short clinical description and a device tracing followed by a multiple choice question. Answers are supplied with detailed annotations of the tracing and an in-depth discussion of the case, highlighting practical hints and tips as well as providing an overview of the technical function of devices. A useful summary of principal device features and functions is also included. The EHRA Book of Pacemaker, ICD and CRT Troubleshooting is the perfect companion for electrophysiologists, cardiology trainees and technical consultants working with device patients as well as for those studying for the EHRA accreditation exam in cardiac pacing.

Comprehensive, but small enough to take on rounds, the updated second edition of this popular neurosurgical board review provides a robust study companion for the American Board of Neurological Surgery (ABNS) primary examination. The text includes an impressive number of questions with concise and well-delineated explanations. Suitable for thorough board preparation, the question and answer format enables busy neurosurgical residents to efficiently practice, review, and improve upon their comprehension. In addition to all the fundamental disciplines that are relevant to the practice of neurosurgery, this edition encompasses the latest advances in the field including endovascular approaches, minimally invasive spinal surgery techniques, and genetics. The diverse and challenging questions encourage the acquisition of factual knowledge and application of logic. This is the definitive ABNS study book because it most closely mimics the written board examination format. Key Highlights Multiple choice Q&A format provides highly effective study tool Questions organized randomly, thereby simulating the written examination Short explanations provide readers with a clear understanding of the correct answers This is a must-have primer that will help neurosurgeons and neurosurgical residents study and pass the rigorous written board exam. Board-certified neurosurgeons will also find it a handy and useful resource to prepare for MOC examinations or to brush up on clinical know-how.

This book comprises six sets of single best answer practice papers. Each set contains 30 single best answer questions on physiology, pharmacology, clinical measurement and physics. The scenarios are based on the application of a wide knowledge of basic sciences relevant to the clinical practice of anaesthesia. The best possible answer to a given question is substantiated by detailed explanation drawn from recent journal articles and textbooks of

anaesthesia and basic sciences. These questions enable the candidates to assess their knowledge in basic sciences and their ability to apply it to clinical practice. Alongside the previously published book *Single Best Answer MCQs in Anaesthesia (Volume I - Clinical Anaesthesia, ISBN 978-1-903378-75-5)*, this book is an ideal companion for candidates sitting postgraduate examinations in anaesthesia, intensive care medicine, and pain management. It will also be a valuable educational resource for all trainees and practising anaesthetists. Agreed standards and guidelines are the heart and soul of improving the differing training systems and to harmonize neurosurgical training in the European countries. Such standards and guidelines have been laid down in the European Training Charter of the European Union of Medical Specialists and recently novellated. This book, written by experienced neurosurgeons, offers all those concerned with neurosurgical training - trainers and trainees - practical advice to implement the above mentioned standards and recommendations. It has been written as a manual: "How to do it". It describes the tasks of a chairman (programme director), the tasks of the teaching staff, the organisation of a training curriculum, a rotation plan or a morbidity and mortality conference, the periodic progress evaluation, the course of an external audit and many more important topics. It contains a lot of practical tips, check lists and useful examples. Well educated young colleagues offer "safe neurosurgery" to our patients. Written by an esteemed educator and founder of the renowned Chicago Review Course in Neurological Surgery™, this updated review reflects substantive content additions to the 8th edition. The two prior editions of the Rapid Review were must-have companions that fully leveraged the vast knowledge contained within Greenberg's legendary tome. Through repetition and spot-on questions, this book brings clarity to a specialty whose sheer depth and

breadth presents comprehension and retention challenges. This book helps readers determine if they are retaining key data and information, thereby providing a robust self-assessment study tool for ABNS certification. The 7th companion generated glowing reviews, such as: "A wonderful example of how to turn the classic Greenberg text into a study guide rather than an encyclopedic reference to a young neurosurgeon" -AANS Young Neurosurgeons News Key Highlights Question formats include fill in the blank, open-ended questions, true/false, matching, and identification of various elements in diagrams/figures Mnemonic devices, helpful hints, clinical pearls, and study charts aid in comprehension and long-term retention Greenberg chapter headings are used (e.g. 4.2.3), thereby providing clear-cut Handbook references This book is designed to help neurosurgical residents prepare for the ABNS primary examination and/or rounds. It will enable practicing neurosurgeons, neurologists, neuroradiologists, and neuropathologists to develop a storehouse of knowledge required to efficaciously examine, analyze, diagnose, and treat neurosurgical patients.

With over 1000 essential questions, MCQs and EMQs in Surgery is the ideal self-assessment companion guide to Bailey & Love's Short Practice in Surgery, 26th edition. This book is a guide dedicated to vascular pathologies affecting the central nervous system. It uses a multiple-choice format with more than 340 genuine MCQs in a convenient format that is ideal for self-study. Seven chapters provide comprehensive coverage of core concepts in vascular neurosurgery. The questions are structured and organized so as to offer a step-by-step description of each disease, from the definition, related anatomy, pathology, clinical features, radiology to surgical decisions and operative tricks. Answers and explanations appear directly below the questions to make reading easy. This book is essential for residents across neurosurgical disciplines as it includes most of the neurovascular information neurosurgical residents need to prepare for their certification exam. It is also beneficial for those seeking a refresher or for those preparing for certification maintenance.
