"Your life isn't over." My dad says this. "I mean, YOUR life isn't over. Beyond the kids. You'll go on living, doing things. This isn't it." I know, I assure him. I have the kids. They need me. They're my life now. "OK," he replies, then grunts—more of a brief hum. He only hums when he thinks I'm full of shit. Shockingly single. Amy Biancolli's life went off script more dramatically than most after her husband of twenty years jumped off the roof of a parking garage. Left with three children, a three-story house, and a pile of knotty psychological complications, Amy realizes the flooding dishwasher, dead car battery, rapidly growing lawn, basement sump pump, and broken doorknob aren't going to fix themselves. She also realizes that "figuring shit out" means accepting the horrors that came her way, rolling with them, slogging through them, helping others through theirs, and working her way through life with love and laughter. Amy Biancolli is an author and journalist whose column appears in the Albany Times Union. Before that, Amy served as film critic for the Houston Chronicle where her reviews, published around the country, won her the 2007 Comment and Criticism Award from the Texas Associated Press Managing Editors Association. Biancolli is the author of *House of Holy Fools: A Family Portrait in Six Cracked Parts*, which earned her Albany Author of the Year. Amy lives in Albany, New York, with her three children.

Since 1955, the annual World Press Photo contest has set the standard in visual journalism. World Press Photo 2018 brings you the winners - the most striking images and compelling stories from 2017. Selected from 73,044 pictures taken by 4,548 photojournalists and documentary photographers from 125 countries, the prize-winning pictures are presented in a moving, sometimes disturbing document. World Press Photo 2018 both informs, and inspires an understanding of the world. The jury this year comprised of 18 renowned authorities on photography was chaired by Magdalena Herrera, director of photography for Geo France. The World Press Photo of the Year has been awarded to Ronaldo Schemidt for his photograph of a protester engulfed in flames during the Venezuelan Crisis in May 2017.

A reference book on the art and techniques of virtual reality photography by one of the pioneers in the field, Scott Highton. The book includes sections on Photography Basics, Panoramic VR Imaging, Object VR Imaging, and Business Practices. Intended audience includes both professional and amateur photographers, as well as multimedia authors and designers.

Captured: Behind the Lens of a Legendary Wildlife Photographer is more than just a photography book—it's a chronicle of more than 30 years' worth of unbelievable moments that only nature can reveal. And Moose Peterson is more than just a wildlife photographer—he's a storyteller in both prose and pictures. If you're looking for the ultimate guide to wildlife photography from a man who has devoted his entire career to capturing nature's finest and most rare moments, you'll find it here in Captured. If you're looking to be transported into the wild to confront a grizzly bear and her cubs, stumble upon a pack of wolves, or capture an owl in flight, you'll find it here, as well. You'll also find a healthy dose of inspiration as the stories behind the photos are revealed as only Moose can tell them. In the end, you'll come away with invaluable photographic techniques gained through a lifetime of experience and a new appreciation for the passion of wildlife photography. You'll gain knowledge that you can put to use on your next excursion into the wild, your local or state park, or even your own backyard.

“An unflinching memoir . . . [that] offers insight into international events and the challenges faced by the journalists who capture them.” —The Washington Post War photographer Lynsey Addario's memoir is the story of how the relentless pursuit of truth, in virtually every major theater of war in the twenty-first century, has shaped her life. What she does, with clarity, beauty, and candor, is to document, often in their most extreme moments, the complex lives of others. It's her work, but it's much more than that: it's her singular calling. Lynsey Addario was just finding her way as a young photographer when September 11 changed the world. One of the few photojournalists with experience in Afghanistan, she gets the call to return and cover the American

invasion. She decides to set out across the world, face the chaos of crisis, and make a name for herself. Addario finds a way to travel with a purpose. She photographs the Afghan people before and after the Taliban reign, the civilian casualties and misunderstood insurgents of the Iraq War, as well as the burned villages and countless dead in Darfur. She exposes a culture of violence against women in the Congo and tells the riveting story of her headline-making kidnapping by pro-Qaddafi forces in the Libyan civil war. As a woman photojournalist determined to be taken as seriously as her male peers, Addario fights her way into a boys' club of a profession. Rather than choose between her personal life and her career, Addario learns to strike a necessary balance. In the man who will become her husband, she finds at last a real love to complement her work, not take away from it, and as a new mother, she gains an all the more intensely personal understanding of the fragility of life. Watching uprisings unfold and people fight to the death for their freedom, Addario understands she is documenting not only news but also the fate of societies. It's *What I Do* is more than just a snapshot of life on the front lines; it is witness to the human cost of war.

In this renowned guide to capturing the outdoor world on film, Galen Rowell, the connoisseur of outdoor and adventure photography, reveals the art, craft and philosophy behind his world-famous images in this stunningly illustrated book. Since its original publication almost ten years ago, this groundbreaking work remains both an inspired manual to taking better pictures and an inspiring journey of discovery into the creative process. In more than 140 color photographs and 66 essays, Rowell shows how he transformed the natural world around him into vivid, memorable works of art. He covers everything from the practical and immensely helpful technicalities of how to pack equipment lightly and use the correct flash to the more theoretical concerns of imagining a photograph before pulling out the camera and immersing oneself fully into this natural and artistic quest. Both the artist and his unique talent come alive in these pages, a tribute to the ways in which his photographs, philosophy, and vision immeasurably enrich those who view his work.

Navigate your camera's buttons, dials, and settings Apply pro tricks to get better color, focus, and sharpness from your images Control exposure settings and jump from auto mode to manual Make sense of tricky material through full-color explanations of core photography concepts If you're the proud new owner of a Nikon D7200, but don't have a ton—or any—experience with cameras, this hands-on guide will have you taking photos like a pro in no time!

A full-color, go-anywhere guide to Nikon's entire array of creative lighting possibilities

Nikon's Creative Lighting System is like having a low-cost, wireless, studio lighting system that's portable enough to fit into a camera bag. Although the possibilities are endless and exciting, setting up, synchronizing the equipment, and determining lighting ratios can be a bit overwhelming. Luckily, this Digital Field Guide has been completely updated to shed some light on the situation! Beginning with the basic functions of the Nikon SB-900, the SB-800, and the SB-600, the author then goes on to demystify the complexities of using multiple speedlights, adjusting flash outputs, and setting up a wireless studio. Clearly explains how to get the best results when using multiple speedlights Includes examples and unique advice on how to light specific subjects, such as weddings, wildlife, portraits, product shots, and corporate locations Covers other Creative Lighting System components, such as Nikon's wireless commander and macro speedlights With this handy, on-the-go guide, you'll no longer be in the dark on Nikon's Creative Lighting System.

Following up on the great success of *The Moment It Clicks* and *The Hot Shoe Diaries: Big Light from Small Flashes*, legendary magazine photographer Joe McNally takes us on another memorable ride with *Sketching Light*, another trip into the land of light--but this time running the gamut from small flash to big flash, and everywhere in between. Of course, Joe includes coverage of Nikon Speedlights, but he also covers big flash, as well as "in-between" lights as the Elinchrom Quadra. The exploration of new technology, as well as the explanation of older technology. No matter what equipment Joe uses and discusses, the most important element of Joe's instruction is that it is straightforward, complete, and honest. No secrets are held back, and the principles he talks about apply generally to the shaping and quality of light, not just to an individual model or brand of flash. He tells readers what works and what doesn't via his let's-see-what-happens approach, he shows how he sets up his shots with plentiful sketches and behind-the-scenes production shots, and he does it all with the intelligence, clarity, and wisdom that can only come from shooting in the field for 30 years for the likes of National Geographic, Time, Life, and Sports Illustrated--not to mention the wit and humor of a clearly warped (if gifted) mind.

Deserts are environments that can be inhospitable even to seasoned explorers. Craig Childs has spent years in the deserts of the American West, and his treks through arid lands in search of water reveal the natural world at its most extreme.

- Simon Stafford has written a key technical guide to every feature on this high-end, semi-pro model. - Stafford is our top-selling Magic Lantern author, and technical editor of Nikon User Magazine, so this guide is a must- have for anyone investing in this highly complex model.

Payne Harrison's "Storming Intrepid" was a New York Times Bestseller and a cold war classic that helped define the techno-thriller genre. Now with "Eurostorm" he weaves his narrative magic yet again - this time aboard the Eurostar bullet train as it races under the English Channel from London to Paris. Sealed within the vault of an impregnable security car is a substance so secret and so lethal that only a handful of "mandarins" within Her Majesty's Government even know of its existence. Yet when the train exits from the Chunnel and heads toward Paris, Scotland Yard learns that an evil force has literally risen from the grave to ensnare the train and hijack a cargo that could alter the world as we know it.

QF32 is the award winning bestseller from Richard de Crespigny, author of the forthcoming *Fly!: Life Lessons from the Cockpit of QF32*. On 4 November 2010, a flight from Singapore to Sydney came within a knife edge of being one of the world's worst air disasters. Shortly after leaving Changi Airport, an explosion shattered Engine 2 of Qantas flight QF32 - an Airbus A380, the largest and most advanced passenger plane ever built. Hundreds of pieces of shrapnel ripped through the wing and fuselage, creating chaos as vital flight systems and back-ups were destroyed or degraded. In other hands, the plane might have been lost with all 469 people on board, but a supremely experienced flight crew, led by Captain Richard de Crespigny, managed to land the crippled aircraft and safely disembark the passengers after hours of nerve-racking effort. Tracing Richard's life and career up until that fateful flight, QF32 shows exactly what goes into the making of a top-level airline pilot, and the extraordinary skills and training needed to keep us safe in the air. Fascinating in its detail and vividly compelling in its narrative, QF32 is the riveting, blow-by-blow story of just what happens when things go badly wrong in the air, told by the captain himself. Winner of ABIA Awards for Best General Non-fiction Book of the Year 2013 and Indie Awards' Best Non-fiction 2012 Shortlisted ABIA Awards' Book of the Year 2013

This sixth edition of *The Practical Zone System* by Chris Johnson updates the classic manual on Ansel Adams's landmark technique for the digital age. For photographers working digitally or with film, in color or black and white, in the studio or on the go, this simple visual language helps to control contrast and, through a process called Previsualization, provides photographers with the power of free creative expression. This new edition discusses recent

advances in technology and potentials for their use in zone photography, including HDR, smartphone cameras that shoot in raw format and smartphone light meters. Johnson demonstrates how the Zone System is a universal visual and conceptual language that dramatically simplifies the problem of creating and rendering complex lighting setups.

Adventure Sports Photography, by renowned photographer and workshop leader Tom Bol, combines personal stories from field experience with expert photo technique. Aspiring outdoor photographers, both adventure sports shooters and outdoor photography enthusiasts, will find this book to be a valuable reference and guide. It covers everything an adventure sports shooter needs to know to get the shot—from packing and organizing gear for an afternoon shoot of rock climbing at the local crag to a month-long sea kayaking expedition. You'll explore composition and creative angles for stunning adventure sports images, and learn

in-depth techniques for using speedlights and strobes for creative lighting when you're shooting in the field. This book also shows you how to create a sequence shot and set up an effective digital workflow. In addition to creating environmental portraits, you'll find out how to produce quality video of adventure sports. Tom Bol has been photographing adventure sports for more than 25 years, documenting adventures on every continent, and his work has been published worldwide. He is a regular contributor to Digital Photo magazine, and he's been recognized as one of National Geographic Adventure's "50 of America's Top Visionaries" for his photography. Tom's work has been featured by Elinchrom, LowePro, Manfrotto, and Nikon, and he is a Sandisk Extreme Team member. PDN readers voted Tom one of the photography world's best workshop leaders. He is also an instructor at Kelby Training, Maine Photo Workshops, Photo Quest Adventures, and Strabo Photo Tours.

Detailed coverage of the three high-end speedlights built exclusively for new Nikon SLRs Nikon speedlights put creative control of flash at the photographer's command, and with Nikon's Creative Lighting System, flash control is practically intuitive and possibilities are seemingly endless.
