

Nikon Sb 26 User Manual

Imagine capturing stunning, professional-looking product shots without needing a studio filled with expensive equipment and large flash units. This book teaches all the steps for creating your own tabletop photography studio. Affordable compact flashes offer a number of creative lighting options within your tabletop studio; and the appropriate lighting and backdrop, and the creative use of your camera's features are key to a perfect image. Author Cyrill Harnischmacher guides you through a variety of exposure and lighting techniques, and covers how to achieve excellent results using compact flash units. Whether you wish to capture product images for use in print or on the web, or you want to improve your photos for personal use, this book will provide you with everything you need to know to get great results. Topics include: Lighting Setups; Reflectors, Diffusers, and Accessories; Soft Boxes and Umbrellas; Strobe Flashes; Combining Long Exposures with Flashlights; Multi-Flash Exposures; Composition and Arrangements; Creating Backdrops; Product Photography; Smoke, Fog, and Special Effects; Food Photography and much more... Nikon manufactures some of the most sophisticated accessory flash equipment found in today's marketplace, and the Magic Lantern Guide shows photographers exactly how to master the complex equipment and operating modes of the company's AF Speedlight Flash System. That's why it's destined to be the most often used reference on photographic flash technique. From advice on Multi-sensor balanced fill flash, bounce flash, rear-curtain sync to high-speed sync, or multiple flash set-ups, this manual explains everything. It comes complete with a course on the basics of flash handling, specialized flash technique, and a model-by-model review of using current flash gear with Nikon cameras.

Small-flash photography has become widely popular because of its portability and affordability, and this book offers insights on mastering the use of small-unit, hot shoe-mounted flashes called flashguns. Demonstrating the various light modifiers, techniques, and setups designed for these small powerhouses of light, the book explores how to achieve creative results from working with a single flashgun, multiple flashguns, and colored filters, as well as making adjustments with the camera's white-balance settings. The guide lists the tools required for location-portrait photography and discusses different lighting setups—from shooting in direct sunlight to night and low-light photos—for various location-portrait situations, giving photographers the confidence to make lighting decisions to produce professional results.

Learn to use Nikon's new D2H digital camera with the help of B. Moose Peterson experienced wildlife photographer and a Nikon Legend Behind the Lens. His new Magic Lantern guide will get you up to speed in no time, with advice on how to take advantage of the D2H's quick response and extremely low shutter lag time. Utilize Nikon's Multi-CAM 2000 autofocus technology, 3D Matrix meter, continuous shooting mode, and imaging sensor that captures professional quality photos. Get all the necessary information on "shooting digital," complete with details on flash, filters, and digital film. Peterson's tips and hints, plus his own remarkable digital images, make this a "must have" manual to the entire Nikon D2H system.

Debunking the common misconception that a flash is only necessary in low-light situations, this DVD guide provides professional instruction on how to properly direct and shape light in order to marshal mood, shape, texture, and color to make photographs more dynamic and visually interesting. Beginning with an introduction to the basic characteristics of light—the quality and diffusion of light, the direction of the light, and the color of the light—it goes on to discuss aperture, shutter speed, and ISO and their relation to Nikon flash systems. After teaching how to master these fundamentals, the DVD discusses how to use Nikon flashes, how to modify the light from flashes, and what subject matter looks good in different lighting situations.
