Human exploitation of other mammals has passed through three historical phases, distinct in their ecological significance though overlapping in time. Initially, Homo sapiens was a predator, particularly of herbivores but also of fur-bearing predators. From about 11 000 years ago, goats and sheep were domesticated in the Middle East, rapidly replacing gazelles and other game as the principal source of meat. The principal crops, including wheat and barley, were taken into agriculture at about the same time, and the resulting Neolithic farming culture spread slowly from there over the subsequent 10 500 years. In a few places such as Mexico, Peru and China, this Middle Eastern culture met and merged with agricultural traditions that had made a similar but

independent transition. These agricultural traditions provided the essential support for the industrial revolution, and for a third phase of industrial exploitation of mammals. In this chapter, these themes are drawn out and their ecological significance is investigated. Some of the impacts of humans on other mammals require consideration on a world-wide basis, but the chapter concentrates, parochially, on Great Britain. What have been the ecological consequences of our exploitation of other mammals? 2. 2 HISTORICAL PHASES OF EXPLOITATION 2. 2. 1 Predatory man Our nearest relatives - chimpanzees, orang utans and gorillas - are essentially forest species, deriving most of their diet from the fruits of forest trees and the shoots and leaves of plants.

For the first time, music legend Rudy Pérez shares his remarkable journey from a poor refugee kid in Miami to composing the greatest hit songs on the world stage. Named the most successful Latin songwriter in history, Rudy Pérez is the creator behind some of the bestselling records of Beyoncé, Julio Iglesias, Christina Aguilera, and IL Divo. In his one-of-a-kind memoir, Rudy tells about his childhood in Cuba and the heart-gripping visits to his father in prison during the height of the communist revolution. Tracing his family's perilous escape on one of the last Freedom Flights to America, Rudy opens up about the years of poverty and growing up in a crime-ridden neighborhood. These memories contrast with tender moments of dancing to the stereo with his siblings, nodding along to his mother's classical favorites, and swaying to blues melodies with his father. At a young age, Rudy tried his hand at recreating the music he loved, and his talent led him to an unprecedented career with over 300 hit songs. With years of hard work, ceaseless creativity, and a strong faith, Rudy was the first Latin music artist to win Billboard Producer of the Decade. Looking back over his five-time Grammy winning legacy, Rudy shares little-known stories of faith and behind-the-scenes details of working with stars like Fergie, Jaci Velasquez, Michael Bolton, Simon Cowell, and Sam Moore. A must-read for every music lover, *The Latin Hit Maker* is a genuine rags-to-riches story filled with inspiration, fascinating details, and a powerful reminder of God's grace and transforming creativity.

This sumptuously illustrated volume analyzes artists' representations of angels and demons and heaven and hell from the Judeo-Christian tradition and describes how these artistic portrayals evolved over time. As with other books in the *Guide to Imagery* series, the goal of this volume is to help contemporary art enthusiasts decode the symbolic meanings in the great masterworks of Western Art. The first chapter traces the development of images of the Creation and the Afterworld from descriptions of them in the Scriptures through their evolution in later literary and philosophical works. The following two chapters examine artists' depictions of the two paths that humans may take, the path of evil or the path of salvation, and the punishments or rewards found on each. A chapter on the Judgment Day and the end of the world explores portrayals of the mysterious worlds between life and death and in the afterlife. Finally, the author looks at images of angelic and demonic beings themselves and how they came to be portrayed with the physical attributes--wings, halos, horns, and cloven hooves--with which we are now so familiar. Thoroughly researched by and expert in the field of iconography, *Angels and Demons in Art* will delight readers with an interest in art or religious symbolism.

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work.

Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I

feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Poems and woodcut prints of birds and other animals by Maine artist and poet Leslie Moore. First published in 1934, *Preface to Action* was written to provoke thought on society and its structure and to enable readers to make a considered judgement at election, particularly those with less time to make their decision. The book discusses the conflict between wanting to make an informed political decision, and not having the time or all the information to do so. In light of this, Catlin brings together what he considers useful points to help guide readers towards a decision. He outlines his personal opinions and explains his reasons for them. Divided into three parts, the book first explores psychology and considers what institutional forms would best satisfy what he identifies as the major human instincts or impulses. The second part considers the community, whether it is state or nation, and what the best form of it is. The third part is a detailed exploration of the religions of Catholicism, Toryism, Fascism, and Communism. *Preface to Action* will be of great appeal to those with an interest in twentieth century British and European history, the history of politics, the history of political thought, and political psychology.
