Just Needs a RechargeThe Hack Mechanic Guide to Vintage Air Conditioning Handbook of Automotive Design Analysis examines promising approaches to automotive design analysis. The discussions are organized based on the major “technological divisions of motor vehicles: the transmission gearbox and drive line; steering and suspension; and the automobile structure. This handbook is comprised of three chapters; the first of which deals with transmission gearboxes and drive lines. This chapter describes manual-shift gearbox design, synchromesh mechanisms, hydrokinetic automatic gearboxes, drive-line main assemblies, and drive-line losses. The next chapter is about vehicle suspensions and optimum handling performance, with emphasis on two categories of handling of vehicles: steady-state turning (or cornering) and the transient state. The behavior of the steering system, ride parameters, and the design and installation of spring elements are discussed. The third and final chapter focuses on the application of structural design analysis to the automotive structure. After explaining the fundamentals of structural theory in car body design, this book presents the analysis of commercial vehicle body and chassis. Throughout the book, maximum use is made of line-drawings and concise textural presentation to provide the working designer with an easy assimilable account of automotive design analysis. This book will be useful to young automotive engineers and newcomers in automotive design.

procedures include unshrouding valves and developing the ideal port area and angle. Designed to fit the National Curriculum, this is part of the Longman Book Project. The project aims to enable teachers throughout the primary school to teach: language; fiction; and non-fiction. It also offers practical guidance and in-built record keeping and assessment.

prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Katie's Cabbage is the inspirational true story of how Katie Stagliano, a third grader from Summerville, South Carolina, grew a forty-pound cabbage in her backyard and donated it to help feed 275 people at a local soup kitchen. In her own words, Katie shares the story of the little cabbage seedling and the big ideas of generosity and service that motivated her to turn this experience into Katie's Krops, a national youth movement aimed at ending hunger one vegetable garden at a time. Katie's Cabbage reminds us of how small things can grow and thrive when nurtured with tender loving and care and of how one person, with the support of family, friends, and community, can help make a powerful difference in the lives of so many. Katie's Cabbage was illustrated by Karen Heid, associate professor of art education at the University of South Carolina School of Visual Art and Design. Editorial assistance was provided by Michelle H. Martin, a dedicated gardener and the Augusta Baker Chair in Childhood Literacy at the University of South Carolina School of Library and Information Science. Patricia Moore-Pastides, First Lady of the University of South Carolina and author of *Greek Revival from the Garden: Growing and Cooking for Life*, offers a foreword about her friendship with Katie and her admiration of Katie's dream to end hunger one garden at a time.
