From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The Siege tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, The Siege is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

Murder in the Name of Allah is the first translation into English of Mazhab Ke Nam Per Khoon, a re-affirmation of the basic tenets of Islam. Hardly a day passes on which an Islamic event does not make headlines. The president of a Muslim country is assassinated by the supporters of Muslim brotherhood; a European journalist is taken hostage by Islamic Jihad; a Pan-American aircraft is hijacked by another Muslim group; American university professors are taken into custody by Hezbullah; Two passenger carrying airplanes were slammed in to world trade center. The glare of 'Islamic' revolution in Iran is reflected through the flares of every gulf oil refinery. This book is a reminder that the purpose of any religion is the spread of peace, tolerance and understanding. It argues that the meaning of Islam—submission to the will of God—has been steadily corrupted by minority elements in the community. Instead of spreading peace, the religion has been abused by fanatics and made an excuse for violence and the spread of terror, both inside and outside the faith. In confirming the true spirit of Islam, it makes the point to followers of all religions that the future of mankind depends on the intrinsic values of love, tolerance, and freedom of conscience and of belief.

Freedom of expression – particularly freedom of speech – is, in most Western liberal democracies, a well accepted and long established, though contested constitutional right or principle. Whilst based in ethical, rights-based and political theories such as those of: justice, the good life, personal autonomy, self determination, and welfare, as well as arrangements over legitimate government, pluralism and its limits, democracy and the extent and role of the state, there is always a lack of agreement over what precisely freedom of expression entails and how it should be applied. For the purposes of this book we are concerned with freedom of expression and the media with regard to the current application of legal standards and self-regulation to journalistic practice.

It's not easy being the only girl in the Durant household. It's tough when everybody views you as the baby of the family, despite having a twin brother who is only two minutes older than you. Jane Austen (16 December 1775 - 18 July 1817) was an English novelist known primarily for her six major novels, which interpret, critique and comment upon the British landed gentry at the end of the 18th century. Austen's plots often explore the dependence of women on marriage in the pursuit of favourable social standing and economic security. Her works critique the novels of sensibility of the second half of the 18th century and are part of the transition to 19th-century literary realism. Her use of biting irony, along with her realism and social commentary, have earned her acclaim among critics and scholars. With the publications of "Sense and Sensibility" (1811), "Pride and Prejudice" (1813), "Mansfield Park" (1814) and "Emma" (1816), she achieved success as a published writer. She wrote two additional novels, "Northanger Abbey" and "Persuasion", both published posthumously in 1818, and began another, eventually titled "Sanditon", but died before its completion. She also left behind three volumes of juvenile writings in manuscript and another unfinished novel, "The Watsons". Her six full-length novels have rarely been out of print, although they were published anonymously and brought her moderate success and little fame during her lifetime. A significant

transition in her posthumous reputation occurred in 1833, when her novels were republished in Richard Bentley's Standard Novels series, illustrated by Ferdinand Pickering, and sold as a set. They gradually gained wider acclaim and popular readership. In 1869, fifty-two years after her death, her nephew's publication of "A Memoir of Jane Austen" introduced a compelling version of her writing career and supposedly uneventful life to an eager audience. Austen has inspired a large number of critical essays and literary anthologies. Her novels have inspired many films, from 1940's "Pride and Prejudice" to more recent productions like "Sense and Sensibility" (1995) and "Love & Friendship" (2016).

In the past thirty years epistemology has been one of the fastest moving disciplines in philosophy. The reason for the rapid advancement is partly due to the fact that various schools and movements inside epistemology have developed different answers to classical epistemological problems, and partly due to the fact that formal methods from logic, probability theory and computability have been utilized to deal with many of the same issues and used for applications outside traditional epistemology. New Waves in Epistemology reflects these changes by letting up-and-coming scholars describe the current trends as well as discussing the prospects for future development.

The papers in this volume analyze the language situation under globalization in several European countries. How does the spread of Global English affect the integrity of the local systems? Changes in lexical and discursive repertoires are evidenced and discussed. It is shown how new social identities are linguistically constructed and redefined in the social consciousness of the various local communities. The authors see globalization as a major change-in-progress that sets in relief the dual capacity of language: communication and identification. The collection reconciles empirical data analysis with profound attention to a host of theoretical issues, such as a new ecology for language under globalization or a new interdiscursivity of globalizing communications. It is argued that globalization-as-recontextualization of meanings poses a serious challenge for a new science of language. The spatial imagery of center-margin is chosen to expound on the complex interaction between the global and the local. The concept of a glocal view on language affords a new perspective for coping with massive linguistic change.
