Prefixed to the first vol. is "An act for the union of Canada, Nova Scotia, and New Brunswick ... 29th March, 1867" with special t.p.: Anno regni Victoriæ, Britanniarum reginæ, tricesimo et tricesimo-primo. At a Parliament begun and holden at Westminster ... Toronto, 1868. 45 p.

The goal of Introduction to Information Systems, 3rd Canadian Edition remains the same: to teach all business majors, especially undergraduate ones, how to use information technology to master their current or future jobs and to help ensure the success of their organization. To accomplish this goal, this text helps students to become informed users; that is, persons knowledgeable about information systems and information technology. The focus is not on merely learning the concepts of IT but rather on applying those concepts to facilitate business processes. The authors concentrate on placing information systems in the context of business, so that students will more readily grasp the concepts presented in the text. The theme of this book is What's In IT for Me? This question is asked by all students who take this course. The book will show you that IT is the backbone of any business, whether a student is majoring in Accounting, Finance, Marketing, Human Resources, or Production/Operations Management. Information for the Management Information Systems (MIS) major is also included.

Why and how did Islam become such a political force in so many Muslim-majority countries? In this book, Jocelyne Cesari investigates the relationship between modernization, politics, and Islam in Muslim-majority countries such as Egypt, Iraq, Pakistan, Tunisia, and Turkey - countries that were founded by secular rulers and have since undergone secularized politics. Cesari argues that nation-building processes in these states have not created liberal democracies in the Western mold, but have instead spurred the politicization of Islam by turning it into a modern national ideology. Looking closely at examples of Islamic dominance in political modernization, this study provides a unique overview of the historical and political developments from the end of World War II to the Arab Spring that have made Islam the dominant force in the construction of the modern states, and discusses Islam's impact on emerging democracies in the contemporary Middle East.

In this book, 50 experts study the lives of U.S. veterans at work, at home, and in American society as they navigate issues regarding health, gender, public service, substance abuse, and homelessness. • Considers the changing demographics of U.S. veterans as compared to previous generations of military personnel • Shows the impact that veterans are having on federal, state, and local government organizations • Describes how servicemembers transition from active duty to veteran status • Includes cross references for ease of use

Is more government aid needed? Who will pay for care of aging baby boomers? Will all Americans finally get health insurance? These are just some of the topics covered in Issues for Debate in Social Policy. Engaging and reader-friendly

articles encourage students to think critically about some of the most pressing social policy issues of our time. Classroom discussions will sparkle as a result! About CQ Researcher Readers In the tradition of nonpartisanship and current analysis that is the hallmark of CQ Press, readers investigate important and controversial policy issues. Offer your students the balanced reporting, complete overviews, and engaging writing that has consistently provided for more than 80 years. Each article gives substantial background and analysis of a particular issue as well as useful pedagogical features to inspire critical thinking and to help students grasp and review key material: A Pro/Con box that examines two competing sides of a single question A detailed chronology of key dates and events An annotated bibliography and Web resources Outlook sections that address possible regulation and initiatives from Capitol Hill and the White House over the next 5 to 10 years Photos, charts, graphs, and maps

Issues for Jan 12, 1888-Jan. 1889 include monthly "Magazine supplement".

The Civilian Lives of U.S. Veterans: Issues and Identities [2 volumes]ABC-CLIO

In the 1950s, East Central Florida underwent a vast transformation with the creation of the American space program. The sleepy fishing communities stretching from Titusville to Melbourne became home to an army of engineers, rocket scientists, and technicians who would soon take Florida and the nation into the missile age. With no opportunities for advanced study nearby, a handful of determined men and women launched Brevard Engineering College in 1958. In 1966, Florida's secretary of state approved the college's petition to change its name to Florida Institute of Technology. In its short history, Florida Tech has overcome formidable hurdles and succeeded in winning a place in the top ranks of scientific and technological universities. A college on the rise, Florida Tech has not only a bright future, but a rich and colorful history that has been captured in striking photographs. The exciting story of "Countdown College"-from the lift-off of Bumper 8 in 1950, which launched the space program in Florida, to the most recent high-tech additions to campus facilities-is the subject of this captivating new pictorial history.

First used to describe the weariness the public felt toward media portrayals of societal crises, the term compassion fatigue has been taken up by health professionals to name—along with burnout, vicarious traumatization, compassion stress, and secondary traumatic stress—the condition of caregivers who become “too tired to care.” Compassion, long seen as the foundation of ethical caring, is increasingly understood as a threat to the well-being of those who offer it. Through the lens of hermeneutic phenomenology, the authors present an insider’s perspective on compassion fatigue, its effects on the body, on the experience of time and space, and on personal and professional relationships. Accounts of health professionals, alongside examinations of poetry, images, movies, and literature, are used to explore the notions of compassion, hope, and hopelessness as they inform the meaning of caring work. The authors frame their exposé of compassion fatigue with the very Canadian metaphor of “lying down in

the snow.” If suffering is imagined as ever-falling snow, then the need for training and resources for safe journeying in “winter country” becomes apparent. Recognizing the phenomenon of compassion fatigue reveals the role that health services education and the moral habitability of our healthcare environments play in supporting professionals’ ability to act compassionately and to endure.

The author emphasizes the role of individuals and yet makes it quite evident that by the time of her centenary in the early days of World War II, Queen's had developed an organic vitality through which the vicissitudes occasioned by external fortunes or by internal tensions could be transcended. Throughout the period covered by this volume Queen's faced a long, hard struggle for adequate resources for research in terms of space, equipment, and most importantly, faculty time; the gradual development of graduate work; and the building of library resources. There was firm and creative leadership through the crises of the war and its aftermath and a renewal of optimism through the final decades of this history.

The aim of the present document is to present the author’s proposals on the reform of the governance model from a holistic and functional perspective. The first task when designing a system of governance should be to identify the function that it is to fulfil, which leads on to the question of exactly why universities are meant to be autonomous. For the good of society, universities as institutions have to guarantee that the knowledge they generate and transmit does not favour the interests of any particular group. They provide a public service that must act with autonomy. This autonomy must include all decisionmaking mechanisms, the whole system of governance, so that the public service of higher education and research can be rendered as efficiently as possible and without submitting to the influence of political, economic or religious interests. On the basis of the conclusions of the study University Autonomy in Europe II. The Scorecard and the current situation of the university, research and innovation system, this study proposes a well-defined set of governance elements that cover all the dimensions of university autonomy. The study makes explicit reference to the university system in Catalonia but its conclusions and argumentation are of more general applicability. USA Today, Wall Street Journal, and Publishers Weekly National Bestseller “An eloquent, charismatic, and knowledgeable [critique] of a corrupt system.”—Robert F. Kennedy, Jr., from the foreword “Dr. Mercola is a visionary, pioneer, and leader.”—Del Bigtree, host of The Highwire Multiple New York Times best-selling author Dr. Joseph Mercola and Ronnie Cummins, founder and director of the Organic Consumers Association, team up to expose the truth—and end the madness—about COVID-19. Through vigorous research, over 500 references to peer-reviewed scientific journal articles, official government statistics, and public health research findings from around the world, the authors lay bare the urgent need for a global awakening. It is time to come together, demand the truth, and take control of our health. The Truth About COVID-19 is your invitation to join Dr. Mercola and Cummins as they educate and organize for a healthy, equitable, democratic, and regenerative future. *The Paperback Edition is Updated with a New Preface by Dr. Mercola* “Phenomenal . . . required reading for this time in our lives.”—Shawn Stevenson, host of The Model Health Show “Dr. Merola has changed the way we think about health.”—Dave Asprey, New York Times bestselling author and host of Bulletproof Radio

An account of the incredible career of Wayne Chrebet tells of his climb to the NFL, describing how he overcame adversity and being ignored by the draft, and of his rise to fame as a vital receiver for the New York Jets.

ÿDon't look for the answers on the bookshelf. There is scant literature devoted to the Provost-ship ? for which the author advances a number of hypotheses ? so, until this informal and autobiographical account, there has been little for aspirants or new appointees to draw on for guidance or to provide a feel for what the role entails. Larry Nielsen offers a highly personal account of his tenure as Provost of North Carolina State University, from his unexpected invitation by the Chancellor to act as interim Provost, to the events that forced his resignation four years later, and brought him unwanted notoriety.ÿ In a fast-paced, self-deprecating style he invites the reader to share the activities that crowded his schedule, the symbolic character of the role, its opportunities to shape policy, and its limitations, as well as the joy and satisfaction he derived from making a difference in people's lives and the institution. We see him in action, and get a sense of the role, as he addresses problems large and small. He shares insights on the governance of a large public institution, on how monies are allocated, and funds made available for strategic initiatives. By the end of the book, we gain an understanding of the myriad roles of the "number two" position of the institution, responsible for the direction and functioning of all its academic and curricular affairs, that Larry Nielsen characterized for himself as "the University's stay-at-home Dad." He concludes the book with a look back at the Provost's job from his renewed perspective as a faculty member, further demonstrating the truth of his assertion that "where you stand depends on where you sit." This is an entertaining and insightful read for anyone who wants to get a glimpse of how a large university functions, as seen through the eyes of an ultimate "insider." For those interested in taking on the highest administrative positions in higher education it offers a window into that world, including the perils to which incumbents can be exposed when their actions become front-page news.ÿ

Truly comprehensive in scope - and arranged in A-Z format for quick access - this eight-volume set is a one-source reference for anyone researching the historical and contemporary details of more than 170 major issues confronting American society. Entries cover the full range of hotly contested social issues - including economic, scientific, environmental, criminal, legal, security, health, and media topics. Each entry discusses the historical origins of the problem or debate; past means used to deal with the issue; the current controversy surrounding the issue from all perspectives; and the near-term and future implications for society. In addition, each entry includes a chronology, a bibliography, and a directory of Internet resources for further research as well as primary documents and statistical tables highlighting the debates.

In an era during which the United States Supreme Court handed down some of its most important decisions, including *Brown v. Board of Education* (1954), *Baker v. Carr* (1962), and *Miranda v. Arizona* (1966), three senators from South Carolina—Olin Johnston, Strom Thurmond, and Ernest "Fritz" Hollings—waged war on the court's progressive agenda by targeting the federal judicial nominations process. *To Face Down Dixie* explores these senators' role in some of the most contentious confirmation battles in recent history, including those of Thurgood Marshall, Abe Fortas, and Clement Haynsworth. In scrutinizing Supreme Court nominees and attempting to restrict the power of the nine justices of the court, these senators defied not only the leadership of the Democratic Party but also the Senate traditions of hierarchy and seniority. Along with South Carolina's conservative, segregationist political establishment, which maintained ironclad control over the state's legislature, Johnston, Thurmond, and Hollings effectively drowned out the many moderate voices in South Carolina that remained critical of their obstructionism, thus advancing their own conservative credentials and boosting their chances of reelection. *To Face Down Dixie* examines for the first time the central role that South Carolina played in turning Supreme Court nomination hearings into confrontational and

political public events. James O. Heath argues that the state's war on the court concealed its antipathy to civil rights by using the confirmation process to challenge the court's function as the final arbiter of policy on questions relating to law and order, obscenity, communist subversion, and school prayer. Heath's study illustrates that while South Carolina's history of "massive resistance" is less prominent than that of other states, its politicians acted as persistent antagonists in the complex and dramatic debates in the U.S. Senate during the era of civil rights.
