Students Quality Circles Abdul Wahid Mir,Kamran Moosa,2021-03-23 Students Quality Circles or SQCs in short, are basically miniature level activities of what the Japanese Quality Control Circles (QCCs) are in the corporate world. These activities prepare students for the Quality mindset from the very early age, thus engraving their personalities with Quality. SQC is an innovative concept and practice used as a part of schools' or colleges' co-curricular activities since mid-nineties in many countries of Asian sub-continent. The objective of SQCs program is to develop and prepare students for the corporate world as well as for a quality living in the society. A research study was carried out by the authors in schools in 2020 where SQCs were practiced to find out the effectiveness of this program. The objective of this book is to explain the SQC concept, benefits and its application in schools with the help of findings of a national survey. The book explains the origin of this concept and the differences in the practices of QCCs in the corporate world versus SQCs in the schools. It discusses how effectively students are practicing SQCs and how effectively they are implemented and managed by schools and colleges. Critical success and failure factors of this program are identified and highlighted. The book provides practical guidelines to educationists and management of schools, colleges and universities who want to initiate or improve their existing program. The book identifies the strength of this unique and innovative program in building a society towards world-class quality. The authors strongly recommend this non-traditional but powerful program to be implemented in schools, colleges and universities in all countries. It is hoped that this book will benefit educational institutions in different countries to further improve Quality mindset in their societies through this program.
