When you become a better designer and colorist, you become a better painter. Painting doesn't have to be complicated to be good. In fact, it shouldn't be. Artist and best-selling author Linda Kemp (*Watercolor Painting Outside the Lines*) bypasses all the complexities of design and color to focus on a fresh, simplified strategy for success that features negative painting--a method that uses the space around your subject to help define it. Improve your painting step by step with projects and exercises that will help your work stand out from the crowd. With *Simplifying Design & Color for Artists*, you'll learn:

- Strategies for creating simple yet effective compositions, focusing on the relationship between shape, space, and color.
- Useful tips on color--how to simplify it, mix your own, and work with value, hue and intensity.
- Techniques for designing with shape: size and edge, layering, and building dimension and movement.
- 18 step-by-step projects in watercolor and acrylic. The approach may be simple, but your art will be spectacular!

At eighteen months, Ashley Ruben still didn't talk. She wouldn't respond when her name was called; she didn't appear to hear either. She fixated on tiny pieces of dirt and ate only crunchy foods. She was enveloped in a thick

fog—impenetrable by everyone except Barney the Dinosaur. She worked puzzles like a kindergartener and was computer-savvy before she was two years old. Her mother's late-night searches on the Internet hinted at a reason for her lack of engagement with the outside world. And then a developmental specialist confirmed it: autism, a diagnosis that shook the foundation of a family and shattered a mother's world. Ashley could hear, but she couldn't listen. In order to address that, a therapy retraining her ears to perceive sound better took her back to the time in the womb— where listening begins. With the help of specialized recordings of Mozart's music, Ashley gradually awakened. Her brain's desire to communicate was kindled, fostering a connection with her body, her family, and the world around her. Ashley had recovered, developing the ability to talk, to listen, to communicate— to become an engaging child. But how could Sharon Ruben, a clinical researcher in her own right, convince the skeptics without clinical trial data to prove the effectiveness of this therapy? She didn't need data. She had Ashley—all the proof she needed. "Listen Up! This remarkable story is for every person with a child waiting to be awakened to language and communication." —Don Campbell, Author of *The Mozart Effect* and *The Mozart Effect for Children*
