The Deal Decade Handbook Margaret M. Blair,Girish Uppal,2010-12-01 In this companion handbook to The Deal Decade: What Takeovers and Leveraged Buyouts mean for Corporate Governance, Margaret Blair and Girish Uppal present summary statistics and details on the corporate restructuring movement of the 1980s. The authors summarize data from private buyouts, junk bond issuances, and aggregate changes in corporate debt. They also report on the changing patterns of corporate ownership, shareholder activism, and changes in the law affecting takeovers. Creating and Digitizing Language Corpora Karen P. Corrigan,Adam Mearns,2016-09-27 This book unites a range of approaches to the collection and digitization of diverse language corpora. Its specific focus is on best practices identified in the exploitation of these resources in landmark impact initiatives across different parts of the globe. The development of increasingly accessible digital corpora has coincided with improvements in the standards governing the collection, encoding and archiving of 'Big Data'. Less attention has been paid to the importance of developing standards for enriching and

preserving other types of corpus data, such as that which captures the nuances of regional dialects, for example. This book takes these best practices another step forward by addressing innovative methods for enhancing and exploiting specialized corpora so that they become accessible to wider audiences beyond the academy.

The India Way Peter Cappelli,2010 Exploding growth. Soaring investment. Incoming talent waves. India's top companies are scoring remarkable successes on these fronts - and more. How? Instead of adopting management practices that dominate Western businesses, they're applying fresh practices of their own strategy, leadership, talent, and organizational culture. In *The India Way*, the Wharton School India Team unveils these companies' secrets. Drawing on interviews with leaders of India's largest firms - including Mukesh Ambani of Reliance Industries, Narayana Murthy of Infosys Technologies, and Vineet Nayar of HCL Technologies - the authors identify what Indian managers do differently, including: Looking beyond stockholders' interests to public mission and national purpose Drawing on improvisation, adaptation, and resilience to overcome endless hurdles Identifying products and services of compelling value to customers Investing in talent and building a stirring culture The authors explain how these innovations work within Indian companies, identifying those likely to remain indigenous and those that can be adapted to the Western context. With its in-depth analysis and research, *The India Way* offers valuable insights for all managers seeking to strengthen their organization's performance.

Exceptional People Ian Goldin, Geoffrey Cameron, Meera Balarajan, 2012-09-16 The past, present, and future role of global migration Throughout history, migrants have fueled the engine of human progress. Their movement has sparked innovation, spread ideas, relieved poverty, and laid the foundations for a global economy. In a world more interconnected than ever before, the number of people with the means and motivation to migrate will only increase. *Exceptional People* provides a long-term and global perspective on the implications and policy options for societies the world over. Challenging the received wisdom that a dramatic growth in migration is undesirable, the book proposes new approaches for governance that will embrace this international mobility. The authors explore the critical role of human migration since humans first departed Africa some fifty thousand years ago—how the circulation of ideas and technologies has benefited communities and how the movement of people across oceans and continents has fueled economies. They show that migrants in today's world connect markets, fill labor gaps, and enrich social diversity. Migration also allows individuals to escape destitution, human rights abuses, and repressive regimes. However, the authors indicate that most current migration policies are based on misconceptions and fears about migration's long-term contributions and social dynamics. Future policies, for good or ill, will dramatically determine whether societies can effectively reap migration's opportunities while managing the risks of the twenty-first century. A guide to vigorous debate and action, *Exceptional People* charts the past and present of international migration and makes practical recommendations that will allow everyone to benefit from its unstoppable future growth.

Sound Art Peter Weibel,2019-11-05 Essays and images that map art's new sonic cosmos, illustrated in color throughout. This milestone volume maps fifty years of artists' engagement with sound. Since the beginning of the new millennium, numerous historical and critical works have established sound art as an artistic genre in its own right, with an accepted genealogy that begins with Futurism, Dada, and Fluxus, as well as disciplinary classifications that effectively restrict artistic practice to particular tools and venues. This book, companion volume to a massive exhibition at ZKM | Karlsruhe, goes beyond these established disciplinary divides to chart the evolution and the full potential of sound as a medium of art. The book begins with an extensive overview by volume editor Peter Weibel that considers the history of sound as media art, examining work by visual artists, composers, musicians, and architects alike. Subsequent essays examine sound experiments in antiquity, sonification of art and science, and internet-based sound art. Contributors then survey the global field of sound art research and practice, in essays that describe the past, present, and future of sound art in Germany, Japan, China, the United States, the United Kingdom, Russia, Canada, Turkey, Australia, and Scandinavia. The texts are accompanied by an extensive photographic documentation of the ZKM exhibition. Texts by Achille Bonito Oliva, Dmitry Bulatov, Germano Celant, Seth Cluett, Christoph Cox, Julia Gerlach, Ryo Ikeshiro und/and Atau Tanaka, Caleb Kelly, Brandon LaBelle, Christof Migone, László Moholy-Nagy, Daniel Muzyczuk, Tony Myatt, Irene Noy, Giuliano Obici, Carsten Seiffarth und/and Bernd Schulz, Başak Şenova, Linnea Semmerling, Morten Søndergaard, Alexandra Supper, David Toop und/and Adam Parkinson, Peter Weibel, Dajuin Yao, Siegfried Zielinski
