Features evidence-based, practical and effective strategies for creating and maintaining optimal quality of life in older adults This globally focused resource integrates sound research evidence, real-life case scenarios, and effective, practical strategies to address a key health care initiative of the 21st century--optimal quality of life for older adults. Distinguished by its broad and global outlook, the book includes contributions from an international cadre of widely published scholars and is designed for easy integration into traditional nursing education curricula. The book explores the experiences of older adults at home, and in acute and primary care, assisted living, nursing home and hospice environments and examines their needs for dealing with multiple, differentiated health, spiritual, and emotional considerations. The book addresses all four domains of quality of life as set forth by the World Health Organization. A detailed and multi-dimensional case study opens each chapter, followed by subjective and objective data focusing on the quality of life domain addressed. Articulation and definition of each quality of life issue is presented along with the incidence and prevalence of the problem. Several cases addressing issues older adults encounter in preventing and managing acute and chronic disease serve as a clinical resource guide, with their emphasis on clinical reasoning. Another outstanding feature of the book is its comprehensive, synthesized literature reviews with approximately 20 references for each issue. These reviews deliver the best evidence in the field and offer effective strategies. Generalist and advanced practice (AP) nursing roles in promoting quality of life as well as cultural considerations are also covered. Each chapter concludes with a bulleted summary of tips for promoting quality of life accompanied by clinical reasoning questions. Content is organized compatibly with the Adult/Gero Nurse Practitioner Certification Test Plan. Key Features: Addresses key quality of life education and practice initiatives advanced by leading gerontology organizations worldwide Includes detailed, multi-faceted case studies reflecting extensive, current evidence-based literature Describes practical, cost-effective strategies aimed at maintaining health Disseminates the universally applicable perspectives of international scholars of global aging Provides content compatible with the Adult/Gero Nurse Practitioner Certification Test Plan

Uncovers the art and science of nursing grounded in caring for all nursing situations Grounded in the belief that caring is the central domain of nursing, this innovative book presents a new approach to "nursing situations." These are case studies depicting shared lived experiences between the nurse and patient that are studied from various theoretical perspectives. They are designed to foster a nursing student's ability to care effectively for a patient, family, or group. Each case study features a compelling scenario that engages the reader to feel and fully participate in the caring experience. The book presents a variety of situations that new and experienced nurses are likely to encounter, many of which present scenarios that require caring for a patient under difficult or complex circumstances. The book addresses the need, as defined by leading health care and nursing education organizations, for the study of nursing from a contextual, story-oriented perspective. It is based on the Barry, Gordon & King Teaching/Learning Nursing Framework, developed as a guide to uncover the art and science of nursing grounded in caring in all nursing situations. Following a description of the framework's foundational

concepts, the text describes how to use nursing situations to facilitate learning. The scenarios offer detailed, practical strategies for analyzing nursing situations in ways that bring to life the simple and complex practice of nursing grounded in caring. These real-life stories also help students understand the impact of health conditions on individuals and families, thereby fostering empathy. Case studies address nursing situations across a variety of populations, health concerns, and practice settings. Using multiple ways of knowing and understanding, each scenario concludes with direct and reflective questions that help students develop nursing knowledge and skills. The book serves as a core resource for nurse educators and students at all levels seeking to study the art and science of nursing grounded in caring. Additionally, the book is a resource for in-service educators in health care systems that specifically address caring as an essential value for practice. KEY FEATURES: Delivers a new approach to nursing education focusing on the context of caring between nurse and patient Presents a collection of real-life nursing scenarios designed to foster caring knowledge and skills under all circumstances Offers detailed, practical strategies for analyzing nursing situations to aid in learning the practice of nursing grounded in caring Helps students to understand the impact of health conditions on individuals and families

Created especially for nurses, the Clinical Decision Making series helps to bridge the gap between content knowledge and clinical application. Case Studies in Maternity and Pediatric Nursing provides 80 nursing case histories that include critical thinking questions and answers based on real-life client situations. Every case contains a blueprint of variables that must be considered while evaluating a particular scenario, and are pertinent concerning the client nursing protocol and setting of care. Examples of these variables include age, gender, cultural influences, pre-existing conditions, legal issues, or communication skills. Each blueprint and case is different just as each clinical situation is unique. By simulating the decision-making process, learners gain the confidence needed to make informed clinical judgments that will make them successful practitioners. Simply stated, Clinical Decision Making shortens the distance between theory and practice like no other educational tool!

This comprehensive workbook contains a compilation of unfolding cases across the discipline of nursing, and includes unique aspects of nursing regarding spirituality, family issues, community as client, and gerontology concerns. It integrates concepts of age, setting, role development, and ethical/legal issues. Reflecting the latest practices in the field, Clinical Decision Making: Case Studies in Medical-Surgical Nursing, 2nd edition bridges the gap between classroom knowledge and clinical application. Emphasizing holistic nursing care, this resource helps nursing students sharpen their critical thinking skills and gain experience applying what they have learned. The more than 40 medical-surgical case histories and related questions, and responses are based on real-life client situations. Every case contains an introductory blueprint of variables that must be considered while evaluating a particular scenario concerning the client, nursing protocol, and setting of care. Each blueprint and case is different, just as each clinical situation is unique. As learners simulate the actual decision-making process, they gain valuable experience making informed clinical judgments that will help them become successful nurses. Categorized by complexity, the book appeals to a broad range of learning levels and styles. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This unique resource contains 40 psychiatric nursing case studies and questions, based on real-life client situations. Organized by difficulty level, the cases in this book and questions about each case history help to keep the focus on the client and the nursing process. Questions and answers are designed to address the need for empathy, attitude adjustment, opened-mindedness, trust building, maintaining confidentiality, limit setting, delegating appropriately, collaborating with other professionals and making decisions. Each scenario is practical and realistic. Critical problems arising in psychiatric nursing are addressed throughout the book, including those both common and rare. The user has an opportunity to decide appropriate nursing action if encountering each of the problems presented, to reflect on whether the nursing staff in the scenario made the best decision, and to provide a rationale for his or her answer. The user can then consult the suggested answer/rationale for remediation, and find what a reasonable and prudent psychiatric nurse would do in that particular situation. Legal and ethical concerns are addressed throughout the cases, which simulate concerns arising in similar real-life situations that nurses find while practicing. Clients with psychiatric problems are encountered in a variety of settings -such as medical or community- so nurses not specializing in psychiatric nursing are represented in some of the cases.

Detailed and up-to-date, this new second edition offers practical case studies covering a wide variety of critical care problems. Each features questions and answers to help readers sharpen their critical-thinking skills and prepare for the CCRN exam. It features new chapters on blunt abdominal trauma and abdominal aortic aneurysm, and updated case studies reflect new treatment modalities and current critical care pharmacology.

Containing detailed and up-to-date case studies on critical care conditions with accompanying questions and answers for applied learning of the practice of critical care nursing, this resource allows the reader to hone vital skills that are necessary in a critical care environment.

Praise for the first edition: “This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics.” Score: 90, 4 Stars —Doody’s Medical Reviews “[This] is a unique volume that effectively addresses the lack of gerontology case studies for

use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice.” —The Gerontologist “The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills.” —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client’s needs infused throughout exercises

"Dorman and De Chesnay...offer a wealth of valuable information students and other healthcare providers would normally not receive until they were in the trenches of their global experience...[They] deliver...nuances of ideology about care and disease from a number of different countries, what global health policy entails and means to healthcare providers traveling the world, along with case studies from a number of guides/experienced global experts." -Lorna Kendrick, PhD, APRN, PMHCNS-BC Professor and Director, School of Nursing, California State University San Marcos From the Foreword Case Studies in Global Health Policy Nursing unpacks key global health issues and analyzes the surrounding health care policies and their impact through case studies. Designed specifically for graduate nursing students, this text explores the implications of global initiatives designed to eradicate disease and promote physical and mental health. As globalization takes a front row seat in the digital age and political dynamics shift more rapidly than ever, possibilities and opportunities for health care have arisen beyond the hospital-based focus, especially for diseases and trends that cross continental divides. Every case study contains a multidisciplinary perspective, featuring contributions by expert nurses, public health professionals, and policy researchers. Presented in a consistent format for ease of use, each case study includes an overview, background, relevant research, and in-depth information on its significance as a critical global issue. This text covers critical, current topics such as health care for transgender individuals, refugees, and patients on the autism spectrum, as well as ongoing problems like access to clean water, HIV/AIDS, and human trafficking. End-of-chapter exercises reinforce content and supplementary instructor materials are available. Key Features: Delivers topical, in-depth examination of key global issues for graduate-level nursing students Provides consistent format for each case study for ease of use Presents an interdisciplinary approach with content from expert nurses, public health professionals, and policy researchers

Once considered to be a lesser pedagogical method, the case study is indeed a powerful, in-depth tool with which to examine evidence-based practice around patient care, family dynamics, professional roles, and organizational systems. Here is a unique how-to guide to conducting research using case studies. Focusing on leading and newer methodologies, the text describes the philosophical basis and state of the art for using this qualitative method. The peer-reviewed designs (including interviews, physiological measurements, psychological tests, and analysis of patients diaries and journals) are accompanied by an in-depth research plan, a discussion of appropriate methods, and ethical considerations. The text provides clear directives bolstered by nursing examples--on how to solve practical problems a researcher may encounter. Examples from international scholars who have published research using case studies are included along with coaching designed to support the new researcher in making decisions and facing challenges. Also included are book and chapter objectives, competencies, review questions, critical thinking exercises, and web links to additional information. The text is part of a series of eight concise volumes addressing a variety of methods for conducting qualitative research. Conceived and edited by a noted expert in qualitative research, the book is designed for both novice and practicing researchers seeking to develop or expand their competency, health institution research divisions, in-service educators and students, and graduate nursing educators and students. Key Features: Explains clearly and concisely how to conduct research using case studies Reviews the philosophical basis for using case studies Focuses on solving practical problems related to conducting research Offers rich nursing exemplars and coaching from international health/mental health contributors Includes objectives, critical thinking exercises, competencies, resources, and review material for each book. Here is a unique "how-to" guide to conducting research using case studies. Focusing on leading and newer methodologies, the text describes the philosophical basis and state of the art for using this qualitative method. The peer-reviewed designs (including interviews, physiological measurements, psychological tests, and analysis of patients' diaries and journals) are accompanied by an in-depth research plan, a discussion of appropriate methods, and ethical considerations. The text provides clear directives—bolstered by nursing examples--on how to solve practical problems a researcher may encounter. Examples from international scholars who have published research using case studies are included along with coaching designed to support the new researcher in making decisions and facing challenges. Also included are book and chapter objectives, competencies, review questions, critical thinking exercises, and web links to additional information. The text is part of a series of eight concise volumes addressing a variety of methods for conducting qualitative research. Conceived and edited by a noted expert in qualitative research, the book is designed for both novice and practicing researchers seeking to develop or expand their competency, health institution research divisions, in-service educators and students, and graduate nursing educators and students. Key Features: Explains clearly and concisely how to conduct research using case studies Reviews the philosophical basis for using case studies Focuses on solving practical problems related to conducting research Offers rich nursing exemplars and coaching from international health/mental health contributors Includes objectives, critical thinking exercises, competencies, resources, and review material for each book.

Community health nurses are confronted with unique problems throughout their career. Students learning from CASE STUDIES IN COMMUNITY HEALTH NURSING PRACTICE are prepared for these challenges. This unique text and workbook teaches students to think critically and apply knowledge to solve problems. As students explore each case in detail, they use problem-based learning techniques to apply their knowledge, ask the right questions, gather supporting data, sort through options, and determine optimal solutions with rationales and possible consequences. The problem-based learning approach in this text will help students develop creative and critical thinking skills and demonstrate problem-solving abilities. * Includes 18 case studies representing various community health issues. Each case teaches students to apply what they already know and gather new information to determine solutions to real world and complex problems. * Provides questions to guide case analysis that take the student through the steps of the problem-solving process. * Employs a workbook-type layout in a lay-flat binding that allows ample room to take notes and write solutions to the cases. * Supports individual, small group, or classroom use with its format and case-study approach.
