A comprehensive text covering concepts of nursing research and use of research process, evaluation of nursing research and use of research in practice.

This book is the first ever to offer a contemporary collection of different perspectives on person-centredness in international doctoral nursing research. The research in the book is based on the ideas and values of personhood and person-centeredness, which have been used and can be seen to guide research approaches, inform research designs and theorize research findings. Further, a specific framework for person-centred nursing is embedded throughout the research studies presented in the text. The Person-centred Nursing Framework (PCNF) developed by Brendan McCormack and Tanya McCance in 2010, is recognized as a nursing theory and this book further develops it as a basis for research and for advancing person-centredness in nursing. The framework informs all stages of the research process, from design through to dissemination. The book is structured into a number of highly engaging chapters written by doctoral candidates, and recently graduated candidates. The opening and closing chapters, written by the editors, place the subsequent chapters in a global context of person-centredness and nursing. The potential for person-centred nursing research to be a global movement is recognized and debated. The subsequent chapters lead readers through philosophical ideas, methodologies and methods whilst also offering reflective and honest insights into learning how to become a person-centred researcher. field is growing and developing but yet there is no specific book available. As a result, researchers spend considerable time and effort translating existing research methodologies into person-centred perspectives. This book fills this gap and acts as a key resource for future nurse researchers. The text is intended for, and benefits nursing doctoral candidates, masters candidates and academic staff who teach and supervise research candidates; it may also appeal to other graduate learners. The book has international contributions which makes it appealing internationally./div
