The history of the exploits of a forgotten American hero, the Rev. Charles H. Parkhurst and his crusade against the crooked New York City Police Department and the political organization behind it.

Schools under Surveillance gathers together some of the very best researchers studying surveillance and discipline in contemporary public schools. Surveillance is not simply about monitoring or tracking individuals and their data; it is about the structuring of power relations through human, technical, or hybrid control mechanisms. Essays cover a broad range of topics including police and military recruiters on campus, testing and accountability regimes such as No Child Left Behind, and efforts by students and teachers to circumvent the most egregious forms of surveillance in public education. Each contributor is committed to the continued critique of the disparity and inequality in the use of surveillance to target and sort students along lines of race, class, and gender.

"As the first agent to publicly betray the CIA, Philip Agee was on the run for over forty years--a pariah akin to Edward Snowden. Agee revealed in spectacular detail what many had feared about the CIA's actions, but he also outed and endangered hundreds of agents. Agee relentlessly opposed the CIA and the regimes it backed, whether in America or around the world. In Jonathan

Stevenson's words, Agee became "one of history's successful viruses: undeniably effective and impossible to kill." In this first biography of Agee, Stevenson will reveal what made Agee tick, and what made him run"--

"Civil service test review for the Civil Service Examination"--cover.

The authors persuasively argue that the present cascade of reforms to public education is a consequence of a larger intention to shrink government. The startling result is that more of public education's assets and resources are moving to the private sector and to the prison industrial complex. Drawing on various forms of evidence-structural, economic, narrative, and youth-generated participatory research-the authors reveal new structures and circuits of dispossession and privilege that amount to a clear failure of present policy. Policymaking is at war with the interests of the vast majority of citizens, and especially with urban youth of color. In the final chapter the authors explore democratic principles and offer examples essential to mobilizing, in solidarity with educators, youth, communities, labor, and allied social movements, the kind of power necessary to contest the present direction of public education reform.

Examines the relationship between the law and the school-to-prison pipeline, argues that law can be an effective weapon in the struggle to reduce the number of children caught, and discusses the consequences on families and communities.

The Police Communications Technician Passbook(R) prepares you for your test by allowing you to take practice exams in the subjects you need to study. It provides hundreds of questions and answers in the areas that will likely be covered on your upcoming exam, including but not limited to: understanding written information; communicating written information to another

person; remembering new information; recognizing the existence of a problem; combining separate pieces of information to form a general conclusion; and more.

An engrossing guide to seeing—and communicating—more clearly from the groundbreaking course that helps FBI agents, cops, CEOs, ER docs, and others save money, reputations, and lives. How could looking at Monet’s water lily paintings help save your company millions? How can checking out people’s footwear foil a terrorist attack? How can your choice of adjective win an argument, calm your kid, or catch a thief? In her celebrated seminar, the Art of Perception, art historian Amy Herman has trained experts from many fields how to perceive and

communicate better. By showing people how to look closely at images, she helps them hone their “visual intelligence,” a set of skills we all possess but few of us know how to use properly. She has spent more than a decade teaching doctors to observe patients instead of their charts, helping police officers separate facts from opinions when investigating a crime, and training professionals from the FBI, the State Department, Fortune 500 companies, and the military to recognize the most pertinent and useful information. Her lessons highlight far more than the physical objects you may be missing; they teach you how to recognize the talents, opportunities, and dangers that surround you every day. Whether you want to be more effective on the job, more empathetic toward your loved ones, or more alert to the trove of possibilities and threats all around us, this book will show you how to see what matters most to you more clearly than ever before. Please note: this ebook contains full-color art reproductions and photographs, and color is at times essential to the observation and analysis skills discussed in the text. For the best reading experience, this ebook should be viewed on a color device.
