Belarus relies on Russia for about 85% of its total energy needs, while Russia needs Belarus' oil and gas pipelines to export its supplies to Western Europe. How will energy exports from Russia and Belarus' transit capabilities impact Western Europe if this interdependent relationship ends, either through political changes in Belarus or if Russia ends its energy subsidies to Belarus? This report looks at transit, infrastructure and investment issues and analyzes both the state of the current infrastructure, as well as the possibilities this transit opens to Western investors, particularly as the Yamal Pipeline nears completion. In addition, it looks at the current

migration issues throughout the world. It presents key data and information on migration as well as thematic chapters on highly topical migration issues. It is structured to focus on two key contributions for readers: Part I: key information on migration and migrants (including migration-related statistics); and Part II: balanced, evidence-based analysis of complex and emerging migration issues. The two parts are intended to provide both overview information that helps to explain migration patterns and processes globally and regionally, as well as insights and recommendations on major issues that policymakers are - or soon - will be grappling with.

The last decade of the 20th century saw radical changes in Eastern Europe and the former USSR. Most of these countries made a transition from totalitarianism or authoritarianism to democracy and from central planning to a market economy. Adding to the latter, a number of national entities gained their independence after the disintegration of the federative states of the USSR, Yugoslavia and Czechoslovakia. Many recent studies have focused on these double, in some cases triple transitions, and scholars from different fields analyzed the so-called "1989 Revolution" from different perspectives. Rather less scholarly attention has been paid to the future of post-communist constitutions and prospects for constitutionalism in these countries. The main questions dealt with throughout this study can be formulated as follows: Will liberal democratic constitutionalism take root in these countries? Will new constitutions in Eastern Europe and the former USSR

perish or survive? This study also aims at contributing to the construction of a general constitutional theory by studying the causes and dynamics of constitutional change in general. Such constitutional change is not only on the East European, but also on the West European agenda. The purpose of this study is not to introduce a general theory about constitutional in/stability, but studying post-communist constitutions will help us to understand the causes and dynamics of constitutional change from a broader perspective.

Eastern cities because it provides a broad and perceptive overview of urban life of the time, as opposed to the standard biographies of religious leaders. Richard Frye's translation from the Persian presents an engaging, readable narrative that recreates the lively intellectual and commercial life of this vibrant ancient city. In the tenth century, Bukhara was a cultural center that rivaled Baghdad, and was known as "the dome of learning in the East." It was a dynamic metropolis, capital of the semi-independent dynasty that ruled most of present-day Iran and Central Asia. It was in Bukhara that the so-called Persian Renaissance began, with its far-reaching literary implications. Narshakhi portrays not only rulers, but also everyday life in cities and villages. This primary source affords insights into life in Eastern Iran and Central Asia during a period of change in the Islamic world. About Richard Frye: Richard N. Frye, Harvard University, is the author of *The Heritage of Central Asia*, *Ibn Fadlan's Journey to Russia*, and numerous other books.

After the break-up of the Soviet Union, Uzbekistan's output fell less than in any other former Soviet Republic, and growth turned positive in 1996/97. Given the country's hesitant and idiosyncratic approach to reforms, this record has surprised many observers. This paper first shows that a standard panel model of growth in transition systematically underpredicts Uzbek growth from 1992-1996, confirming the view that Uzbekistan's performance constitutes a puzzle. It then attempts to resolve the puzzle by appropriately extending the model. The main result is that Uzbekistan's output performance

MUST READ for the next decade!' – David Bloom, Harvard School of Public Health, US 'Population Aging and the Generational Economy provides an encompassing account of what we know about population aging and the impact that this process will have on our economies. It does not confine itself to the advanced industrial countries, where aging has already been largely studied, but adopts a truly global perspective. I am sure it will become a key reference for researchers, students and those involved in policy-making in areas that are affected by population aging.' – Giuliano Bonoli, Swiss Graduate School of Public Administration (IDHEAP), Switzerland Over coming decades, changes in population age structure will have profound implications for the macroeconomy, influencing economic growth, generational equity, human capital, saving and investment, and the sustainability of public and private transfer systems. How the future unfolds will depend on key actors in the generational economy: governments, families, financial institutions, and others. This path-breaking book provides a comprehensive analysis of the macroeconomic effects of changes in population age structure across the globe. The result of a substantial seven-year research project involving over 50 economists and demographers from Africa, Asia, Europe, Latin America, and the United States, the book draws on a new and comprehensive conceptual framework – National Transfer Accounts – to quantify the economic lifecycle and economic flows across generations. It presents comprehensive estimates of both public and private economic flows between

The Nazi regime and local collaborators killed 800,000 Belorussian Jews, many of them parents or relatives of young Jews who survived the war. Thousands of young girls and boys were thus orphaned and struggled for survival on their own. This book is the first systematic account of young Soviet Jews' lives under conditions of Nazi occupation and genocide. These orphans' experiences and memories are rooted in the 1930s, when Soviet policies promoted and sometimes actually created interethnic solidarity and social equality. This experience of interethnic solidarity provided a powerful framework for the ways in which young Jews survived and, several decades after the war, represented their experience of violence and displacement. Through oral histories with several survivors, video testimonies, and memoirs, Anika Walke reveals the crucial roles of age and gender in the ways young Jews survived and

remembered the Nazi genocide, and shows how shared experiences of trauma facilitated community building within and beyond national groups. *Pioneers and Partisans* uncovers the repeated transformations of identity that Soviet Jewish children and adolescents experienced, from Soviet citizens in the prewar years, to a target of genocidal violence during the war, to a barely accepted national minority in the postwar Soviet Union. *Digital Technology and the Contemporary University* examines the often messy realities of higher education in the 'digital age'. Drawing on a variety of theoretical and empirical perspectives, the book explores the intimate links between digital technology and wider shifts within contemporary higher education – not least the continued rise of the managerialist 'bureaucratic' university. It highlights the ways that these new trends can be challenged, and possibly changed altogether. Addressing a persistent gap in higher education and educational technology research, where digital technology is rarely subject to an appropriately critical approach, *Degrees of Digitization* offers an alternative reading of the social, political, economic and cultural issues surrounding universities and technology. The book highlights emerging themes that are beginning to be recognised and discussed in academia, but as yet have not been explored thoroughly. Over the course of eight wide-ranging chapters the book addresses issues such as: The role of digital technology in university reform; Digital technologies and the organisation of universities; Digital technology and the working lives of university staff; Digital technology and the 'student

Recently the topic of civil society has generated a wave of interest, and a wealth of new information. Until now no publication has attempted to organize and consolidate this knowledge. The International Encyclopedia of Civil Society fills this gap, establishing a common set of understandings and terminology, and an analytical starting point for future research. Global in scope and authoritative in content, the Encyclopedia offers succinct summaries of core concepts and theories; definitions of terms; biographical entries on important figures and organizational profiles. In addition, it serves as a reliable and up-to-date guide to additional sources of information. In sum, the Encyclopedia provides an overview of the contours of civil society, social capital, philanthropy and nonprofits across cultures and historical periods. For researchers in nonprofit and civil society studies, political science, economics, management and social enterprise, this is the most systematic appraisal of a rapidly growing field.
