At long last, star-crossed lovers Inuzuka and Persia are only one step away from becoming head prefects and tearing down the proverbial wall between the Black Doggy and White Cat dorms. That is, until rival candidate Reon Inugami drops one heck of a last-minute election surprise in front of the entire student body on voting day, shattering the tenacious twosome's hopes in one fell swoop. The cat may finally, irreversibly be out of the bag—and with their whole world seemingly against them, Romeo and Juliet may be on the way out of school...

Technological advancements are often regarded as positive, as they are usually expected to make life and business easier. While this can often be the case, it is not always true, and much of the improvement in the realm of technology comes from analysis of new technologies for effectiveness. Technology Management in Organizational and Societal Contexts is a critical scholarly publication that explores the relationship between businesses and institutions and technology and analyzes the outcomes in order to promote improvement. Featuring coverage on a wide range of topics, such as e-services, multimedia in education, and issues of emerging technologies, this publication is geared towards academicians, researchers, and students seeking relevant and current research on the interactions between organizations and technology.

The availability of big data, low-cost commodity hardware, and new information management and analytic software have produced a unique moment in the history of data analysis. The convergence of these trends means that we have the capabilities required to analyze astonishing data sets quickly and cost-effectively for the first time in history. They represent a genuine leap forward and a clear opportunity to realize enormous gains in terms of efficiency, productivity, revenue, and profitability especially in digital marketing. Data plays a huge role in understanding valuable insights about target demographics and customer preferences. From every interaction with technology, regardless of whether it is active or passive, we are creating new data that can describe us. If analyzed correctly, these data points can explain a lot about our behavior, personalities, and life events. Companies can leverage these insights for product improvements, business strategy, and marketing campaigns to cater to the target customers. *Big Data Analytics for Improved Accuracy, Efficiency, and Decision Making in Digital Marketing* aids understanding of big data in terms of digital marketing for meaningful analysis of information that can improve marketing efforts and strategies using the latest digital techniques. The chapters cover a wide array of essential marketing topics and techniques, including search engine marketing, consumer behavior, social media marketing, online advertising, and how they interact with big data. This book is essential for professionals and researchers working in the field of analytics, data, and digital marketing, along with marketers, advertisers, brand managers, social media specialists, managers, sales professionals, practitioners, researchers, academicians, and students looking for the latest information on how big data is being used in digital marketing strategies.

This classic and invaluable reference handbook, written for sex researchers and their students, has now been completely revised in a new, fourth edition. It remains the only easy and efficient way for researchers to learn about, evaluate, and compare instruments that have previously been used in sex research.

This book explains how to use combined statistical tests and measures of effect size to synthesize the results of independent studies of a common research question.

Since 1974, when the current wave of democratisation began, the movement towards democracy in Asia has remained limited. Many countries in Asia, in fact, are not making a decisive move towards democracy, and find themselves struggling with the challenges of democratic consolidation and governance. Focusing on Indonesia, Thailand and Korea, this book analyses why democratisation is so difficult in Asia. The book investigates the dynamics by which citizens embrace democratic rule and reject authoritarianism, and also compares these dynamics with those of consolidating democracies around the world. The book looks at the forces that affect the emergence and stability of democracy, such as elite interactions, economic development and popular attitudes as beliefs and perceptions about the legitimacy of political systems have long been recognised as some of the most critical influences on regime change. The book also discusses what it is about the nature of public opinion and the processes of day-to-day democratic participation that have made these countries vulnerable to repeated crises of legitimacy. Using Indonesia, Korea, and Thailand as case studies, this book highlights the uniqueness of the Asia's path to democracy, and shows both the challenges and opportunities in getting there. The book will be of interest to students and scholars of Asian Politics, Comparative

Politics and International Studies.

There is no doubt that accounting education scholarship and research in Australia is not only thriving, but is amongst the best in the world. Nor is there any doubt that Australian scholars in this field punch well above their weight within the international arena. This book is not derived from a conventional special issue (i.e. one focussing on a specific theme such as audit education, communication in accounting education, or the interface between accounting education and professional training). Instead, it presents a collection of leading edge contributions to accounting education research from Australian scholars on topics which have international relevance. These topics reflect the typical breadth of research in this field being undertaken in Australia - including coverage of students' conceptions of accounting work, the impact of entry mode on accounting students' approaches to learning, listening skills in accounting practice, and student's performance in online accounting courses. Taken together, the contents of this book will help to enhance the educational base of accounting practice by providing guidance to educators in improving their pedagogic practice. This book was originally published as a special issue of Accounting Education: an international journal. This and the next volume of the OT series contain the proceedings of the Workshop on Operator Theory and its Applications, IWOTA 95, which was held at the University of Regensburg, Germany, July 31 to August 4, 1995. It was the eighth workshop of this kind. Following is a list of the seven previous workshops with reference to their proceedings: 1981 Operator Theory (Santa Monica, California, USA) 1983 Applications of Linear Operator Theory to Systems and Networks (Rehovot, Israel), OT 12 1985 Operator Theory and its Applications (Amsterdam, The Netherlands), OT 19 1987 Operator Theory and Functional Analysis (Mesa, Arizona, USA), OT 35 1989 Matrix and Operator Theory (Rotterdam, The Netherlands), OT 50 1991 Operator Theory and Complex Analysis (Sapporo, Japan), OT 59 1993 Operator Theory and Boundary Eigenvalue Problems (Vienna, Austria), OT 80 IWOTA 95 offered a rich programme on a wide range of latest developments in operator theory and its applications. The programme consisted of 6 invited plenary lectures, 54 invited special topic lectures and more than 100 invited session talks. About 180 participants from 25 countries attended the workshop, more than a third came from Eastern Europe. The conference covered different aspects of linear and nonlinear spectral problems, starting with problems for abstract operators up to spectral theory of ordinary and partial differential operators, pseudodifferential operators, and integral operators. The workshop was also focussed on operator theory in spaces with indefinite metric, operator functions, interpolation and extension problems. "This book provides a comprehensive collection of research on current technological developments and organizational perspectives on the scale of small and medium enterprises"--Provided by publisher.

The fifth in a new series, each one set in a U.S. metropolis, Peaceful Places: Boston leads the reader on an unexpected path to secret delights shared by its insider author. This book contains a selection of the papers presented at the 24th Meeting of the Euro Working Group on Financial Modelling held in Valencia, Spain, on April 8-10, 1999. The Meeting took place in the Bancaja Cultural Center, a nice palace of the XIX century, located in the center of the city. Traditionally, members of the Euro Working Group on Financial Modelling meet twice a year, hosted by different active

groups in successions. The year 1999 was very special for us because the University of Valencia celebrates its fifth century. The Meeting was very well attended and of high quality. More than 90 participants, coming from 20 different countries debated 46 communications in regular sessions. The opening lecture was given by Prof. H. White, from the University of California, San Diego. The topics discussed were classified in nine sessions: Financial Theory, Financial Time Series, Risk Analysis, Portfolio Analysis, Financial Institutions, Microstructures Market and Corporate Finance, Methods in Finance, Models in Finance and Derivatives. The papers collected in this volume provide a representative but not complete sample of the fields where the members of the working group develop their scientific activity. The papers are a sample of this activity, and consist of theoretical papers as well as empirical ones.

Jane Loevinger's innovative research methodology, psychometric rigor, and theoretical scope have attracted the attention of numerous scholars and researchers. Empirical investigations employing Loevinger's Washington University Sentence Completion Test of ego development (WUSCT) have appeared with increasing frequency and total more than 300 studies. Following the publication of the first comprehensive revision of the scoring manual for the WUSCT, this volume reflects on the strengths and limitations of Loevinger's developmental model. It is divided into sections that correspond with four broad questions that can be raised about Loevinger's developmental model: * What is its scope and intellectual tradition? * What evidence is there for construct validity? * What is its relationship to other social-developmental models? * What is its clinical relevance to Loevinger's model of ego development? This four-part grouping provides a framework for effectively organizing the present material, and frequently, the questions raised in one section are addressed in other sections as well. In the concluding chapter, Loevinger addresses some of the ideas that are proposed by the various authors. She also presents the origin of the ego development concept by recounting its history.

The service sector accounts for a huge proportion of global employment, and is the biggest driver of gross domestic product in developing nations. Yet there has been little research uncovering its scope, potential and implications on sustained and inclusive economic growth. This is especially true for Africa, which has seen a strong growth trajectory in recent years. This book presents a new frontier of research, offering insightful perspectives on the 21st-century realities of the service sector and its effect on economic development in Africa. The analysis presented here will be of relevance to academics and policymakers with an interest in Africa's role in the global economy.

Siddons takes readers back to South Carolina's Low Country in this insightful and deeply felt "New York Times" bestseller as she explores family, commitment, and love.

The purpose of this edited collection is to analyse the cultural aspects of Indian organizations. As the world's largest and most diverse democracy, Indian society can be best described as an amalgam of multiple cultures, value systems, socio-political and institutional orientations. This book offers a theoretical and empirical basis for understanding the evolving and changing nature of these aspects in Indian organizations. The World Bank predicts that in the near future India will become the world's second largest economy. The recent high growth rates reported by businesses in the Indian economy needs to be sustainable, especially amidst its high cultural diversity. Whilst there is tremendous interest in understanding the intricacies of Indian culture and a growing literature focusing on topics such as India-specific management and internationalization strategies of Indian firms, the cultural aspects of Indian businesses have been largely ignored. This book aims to fill this gap. It covers various topics in organizational culture and management such as human resource management, cross-cultural communication and coaching,

cultural similarity, cultural literacy, multiculturalism, generational cultural values, talent acquisition and knowledge management. It also features case studies from high growth sectors such as the IT and health industries. Presenting contributions from local Indian and international researchers, this book provides a multidimensional perspective that will appeal to students, scholars and practitioners interested in organizational culture and management in India.

The book brings together experts working in public health and multi-disciplinary areas to present recent issues in statistical methodological development and their applications. This timely book will impact model development and data analyses of public health research across a wide spectrum of analysis. Data and software used in the studies are available for the reader to replicate the models and outcomes. The fifteen chapters range in focus from techniques for dealing with missing data with Bayesian estimation, health surveillance and population definition and implications in applied latent class analysis, to multiple comparison and meta-analysis in public health data. Researchers in biomedical and public health research will find this book to be a useful reference and it can be used in graduate level classes.

This journal attempts to fill a gap between the general-interest press and other academic economics journals. Its articles relate to active lines of economics research, economic analysis of public policy issues, state-of-the-art economic thinking, and directions for future research. It also

aims to provide material for classroom use, and to address issues relating to the economics profession.

Inhaltsangabe: Einleitung: Statistisch gesehen besitzt jeder Deutsche mehr als ein Handy und dank neuer Technologien sowie wachsender Übertragungsraten wird die Nutzung mobiler Endgeräte immer komfortabler, kostengünstiger und schneller (Hegen 2010). Handynutzer können heutzutage immer und überall mit dem Internet verbunden sein. Dies wurde im Jahr 2011 bereits von 18 % der Deutschen praktiziert (Bitcom 2011) und zeigt die Eignung des mobilen Internets als Marketinginstrument. Mobile Tagging ist das Schlagwort, welches laut Hegen die innovative Zugangstechnologie zu mobilen Diensten darstellt, indem es durch das Scannen eines Barcodes mit der Kamera eines mobilen Endgerätes reale Gegenstände mit digitalen Informationen verknüpft (Hegen 2010). Selbst der als konservativ geltende Weinsektor befasst sich progressiv mit diesem Thema und nutzt zunehmend die Codes für Marketingzwecke. Gründe für diesen Trend sind in der immer größer werdenden Weinauswahl sowie in der abnehmenden Kundenloyalität zu sehen. Waren früher der Direktvermarkter und der Weinfachhändler Anlaufpunkte für den Weinkonsumenten, so sind es heute der Supermarkt und der Discounter. In diesen Märkten fand im Jahr 2010 mit 74 % der größte Weinabsatz statt (Deutsches Weininstitut 2011). Dieser Wandel führt jedoch zu einem Verlust in der Übermittlung produktspezifischer Weininformationen, da eine fachliche Beratung in diesen Märkten häufig nicht gegeben ist. Zudem nimmt die emotionale Bindung zwischen Weinkonsument und Weingut ab. Dies ist darauf zurückzuführen, dass der Kunde seine Kaufentscheidung selbstständig vor dem Weinregal und nicht beim Winzer oder im Weinfachhandel trifft. Der Quick Response Code (QR-Code) ermöglicht, zeitlich und örtlich unabhängig, einen Zugang zu Informationen zum Anbaugebiet und der traditionellen Seite des Weinguts oder aber zu Kundenbewertungen und Empfehlungen. Mit dieser neuen, interaktiven Ansprache vom Verkäufer zum Käufer werden Stammkunden gebunden sowie Neukunden dazugewonnen. Vor diesem Hintergrund soll im Rahmen der vorliegenden Masterarbeit die Relevanz und der Stellenwert des Mobile Tagging, insbesondere unter Zuhilfenahme des QR-Codes, im Weinmarketing aufgezeigt werden. Wie bekannt ist der QR-Code im Weinsektor und wie stark wird dieser aktuell bereits genutzt? Kann der QR-Code der Entscheidungsfindung am Point of Sale (POS) dienen und wie wird der Nutzen dieser Technologie vom Konsumenten wahrgenommen? Welche Käufer würden den QR-Code [...] 100% TUTORIAL, 487 HALAMAN, TEORI & PRAKTIK, SMARTPLS 3: Sda 6 Bab: Teori SEM PLS, Model Pengukuran Reflektif, Formatif, Second Order, Moderasi dan 2nd Order Moderasi LENGKAP dengn Interpretasi Hasil Output.
