NMR Spectroscopy Explained : Simplified Theory, Applications and Examples for Organic Chemistry and Structural Biology provides a fresh, practical guide to NMR for both students and practitioners, in a clearly written and non-mathematical format. It gives the reader an intermediate level theoretical basis for understanding laboratory applications, developing concepts gradually within the context of examples and useful experiments. Introduces students to modern NMR as applied to analysis of organic compounds. Presents material in a clear, conversational style that is appealing to students. Contains comprehensive coverage of how NMR experiments actually work. Combines basic ideas with practical implementation of the spectrometer. Provides an intermediate level theoretical basis for understanding laboratory experiments. Develops concepts gradually within the context of examples and useful experiments. Introduces the product operator formalism after introducing the simpler (but limited) vector model.

Presents one hundred mysteries and brain teasers which readers can attempt to solve with the provided clues.

If you want to learn about one of history's most fascinating minds and uncover some of his secrets of imagination—secrets that enabled him to invent machines light years ahead of his time and literally bring light to the world—then you want to read this book. Imagination amplifies and colors every other element of genius, and unlocks our potential for understanding and ability. It's no coincidence that geniuses not only dare to dream of the impossible for their work, but do the same for their lives. They're audacious enough to think that they're not just ordinary players. Few stories better illustrate this better than the life of the father of the modern world, a man of legendary imaginative power and wonder: Nikola Tesla. In this book, you'll be taken on a whirlwind journey through Tesla's life and work, and not only learn about the successes and mistakes of one of history's greatest inventors, but also how to look at the world in a different, more imaginative way. Read this book now and learn lessons from Nikola Tesla on why imagination is so vital to awakening your inner genius, and insights into the real "secret" to creativity, as explained by people like Jobs, Picasso, Dali, and Twain.

Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements, summarises the relevant unit content and includes a series of specimen questions and answers. There are three sections to each guide: Introduction - includes advice on how to use the guide, an explanation of the skills being tested by the assessment objectives, an outline of the unit or module and, depending on the unit, suggestions for how to revise effectively and prepare for the examination questions. Content Guidance - provides an examiner's overview of the module's key terms and concepts and identifies opportunities to exhibit the skills required by the unit. It is designed to help students to structure their revision and make them aware of the concepts they need to understand the exam and how they might analyse and evaluate topics. Question and Answers - sample questions and with graded answers which have been carefully written to reflect the style of the unit. All responses are accompanied by commentaries which highlight their respective strengths and weaknesses, giving students an insight into the mind of the examiner.

'I'm no angel.' Bernie Ecclestone Born into poverty, Bernie Ecclestone has made himself a billionaire by developing the world's second most popular sport - Formula One racing. Private, mysterious and some say sinister, the eighty-year-old criss-crosses the globe in his private jet, mixing with celebrities, statesmen and sporting heroes. His success is not just in creating a multibillion-pound global business but in resisting repeated attempts to snatch the glittering prize from his control. Ecclestone has never before revealed how he graduated from selling second-hand cars in London's notorious Warren Street to become the major player he is today. He has finally decided to reveal his secrets: the deals, the marriages, the disasters and the successes in Formula One racing, in Downing Street, in casinos, on yachts and in the air. Surprisingly, he has granted access to his inner circle to Tom Bower, described by Ecclestone as 'The Undertaker' - the man who buries reputations - and has given him access to all his friends and enemies. All have been told by Ecclestone, 'Tell him the truth, good or bad.' No Angel is a classic rags-to-riches story, the unique portrayal of a unique man and an intriguing insight into Formula One racing, business and the human spirit. Tom Bower is the author of nineteen books, including biographies of Robert Maxwell, Mohamed Fayed, Gordon Brown, Richard Branson, Conrad Black and more recently, Simon Cowell.

With more than 7,000 up-to-date phrases, this dictionary covers situations from talking to a doctor to ordering a meal, and helps learners communicate personal feelings, and make small talk.

How should we go about making old houses energy efficient without devaluing future sustainability or the appeal and character of old homes by the use of inappropriate solutions? This practical and essential guide to retrofitting for energy efficiency seeks to provide answers to this and other the questions homeowners of old houses are asking. Whether your house is medieval and timber-framed or a Georgian, Victorian or Edwardian terrace, it can be made more energy efficient and sustainable, and this practical and comprehensive handbook will show you how. Revised and updated throughout, and with a foreword by Kevin McLoud, Old House Eco Handbook includes chapters on the building envelope; roofs and ceilings; windows and doors; walls; floors; paints; energy, airandwater; plus a brand newchapter on retrofit materials. In association with The Society for the Protection of Ancient Buildings, this is a must have for owners of old houses looking to make their homes more energy efficient and sustainable. Chapters Include: 1. Old houses can be green 2. Old house to eco house 3. The building envelope 4. Retrofit materials 5. Roofs and ceilings 6. Windows and doors 7. Walls 8. Floors 9. Paints 10. Energy, air and water 11. Old house for the future

Nice Talking with You is a two-level oral communication series designed to get students talking. Nice Talking with You Level 2 is designed for elementary and pre-intermediate students. It contains 12 topic-based units and two review units. Topics in Level 2 relate to the equivalent units in Level 1, and include Going out, Fashion, Learning, Experience abroad, Health, and Careers. Practical conversation strategies are introduced in each unit and recycled in later units. Examples of strategies featured in Nice Talking with You Level 2 are: introducing a new idea; making, accepting and declining invitations; changing the focus of a topic; and making an inference.
