By presenting grammar through dialogues or texts and following up with more detailed analysis, students are able to check their understanding of meaning and context. They are encouraged to try out new structures and are given opportunities to explore the meaning and usage of new language before it is presented and practised more formally. This allows them to discover the language intuitively for themselves and this sense of

achievement helps to motivate them. With a strong emphasis on dialogue work and personalization, students are able to understand how the language can work for them. Targeted skills lessons develop this and build their competence further. The outstanding range of components means that every lesson can be varied and exciting. Whether you prefer using print or digital, or a combination of the two, all the resources are at your fingertips - giving you maximum support and flexibility. Current applied linguistic research generally supports the adoption of interdisciplinary approaches in education with the objective of enhancing learners' progress and teachers' practices. In this spirit, this edited volume explores the issue of cross-curricular learning and teaching from a wider perspective. The twenty-three papers collected here are categorised in four thematic units, all of which, however, share a common feature: they focus on interdisciplinary learning and promote the integration of knowledge and skills from various subject areas. As such, all the papers brought together in this volume, thus, emphasise the interconnectedness of knowledge and ideas in primary, secondary and tertiary education. The theme of Cross-Curricular Teaching and Learning is

related in this volume to Intercultural Education, to Content and Language Integrated Learning, and to Information and Communication Technology (ICT). The book will be of interest to scholars who are interested in relevant research-based data and results, and to educators who wish to update their knowledge about cross-curricular teaching and improve their language teaching practices.

"Texts must be interesting enough for students to want to read them in their own language. Otherwise, how can we expect students to want to read them in English?" This is the authors' golden rule when they choose texts and topics for every level of American English File. It ensures you get material that learners will enjoy reading and will want to talk about. Texts such as "Could you live without money?" really help to generate opinion and discussion. They create a desire to communicate. Having created the desire, American English File then helps you to develop learners' communication skills. One way it does this is with a strong focus on pronunciation. Research shows that poor pronunciation is a major contributor to breakdowns in communication (Jennifer Jenkins: The Phonology of English as an International Language). American English File integrates pronunciation into every lesson - the "little and often" approach. But that's not all. The unique English File Sounds Chart puts a picture to each sound in the phonetic alphabet, so learners find it easier to remember the sounds and, ultimately, improve their pronunciation.
