The Amazonian Ethnobotanical Dictionary presents an exciting new rainforest book, designed and conceived in the rainforest and dedicated to its preservation. The book contains concise accounts of the various uses to which prominent Amazonian plants are put by the local rainforest inhabitants. Although emphasis is placed on plant foods and forest medicines, there is also commentary on other relevant applications, including natural artifacts, house construction, natural pesticides, and ornamental and fodder plants. More than 1,000 species are covered and over 200 illustrated. An index to Spanish and English names leads to the scientific name, and the index to plants provides its medicinal application. There are even suggestions on how to eat palm grubs and how to make an Amazonian salad dressing. All royalties from the book are donated to the Amazonian Center for Environmental Education and Research (ACEER) in order to continue its preservation of one of the world's most diverse forests.

This book examines the circulation and effects of radical discourse by analysing the role of mass media coverage in promoting or hindering radicalisation and acts of political violence. There is a new environment of conflict in the post-9/11 age, in which there appears to be emerging threats to security and stability in the shape of individuals and groups holding or espousing radical views about religion, ideology, often represented in the media as oppositional to Western values. This book asks what, if anything is new about these radicalising discourses, how and why they relate to political acts of violence and terror, and what the role of the mass media is in promoting or hindering them. This includes exploring how the acts themselves and explanations for them on the web are picked up and represented in mainstream television news media or Big Media, through the journalistic and editorial uses of words, phrases, graphics, images, and videos. It analyses how interpretations of the term 'radicalisation' are shaped by news representations through investigating audience responses, understandings and misunderstandings. Transnational in scope, this book seeks to contribute to an understanding of the connectivity and relationships that make up the new media ecology, especially those that appear to transcend the local and the global, accelerate the dissemination of radicalising discourses, and amplify media/public fears of political violence. This book will be of interest to students of security studies, media studies, terrorism studies, political science and sociology.

Two renowned investment advisors and authors of the bestseller *The Great Reckoning* bring to light both currents of disaster and the potential for prosperity and renewal in the face of radical changes in human history as we move into the next century. The *Sovereign Individual* details strategies necessary for adapting financially to the next phase of Western civilization. Few observers of the late twentieth century have their fingers so presciently on the pulse of the global political and economic realignment ushering in the new millennium as do James Dale Davidson and Lord William Rees-Mogg. Their bold prediction of disaster on Wall Street in *Blood in the Streets* was borne out by Black Tuesday. In their ensuing bestseller, *The Great Reckoning*, published just weeks before the coup attempt against Gorbachev, they analyzed the pending collapse of the Soviet Union and foretold the civil war in Yugoslavia and other events that have proved to be among the most searing developments of the past few years. In *The Sovereign Individual*, Davidson and Rees-Mogg explore the greatest economic and political transition in centuries -- the shift from an industrial to an information-based society. This transition, which they have termed "the fourth stage of human society," will liberate individuals as never before, irrevocably altering the power of government. This outstanding book will replace false hopes and fictions with new understanding and clarified values.

As a mature topic in chemical engineering, the book provides methods, problems and tools used in process control engineering. It discusses: process knowledge, sensor system technology, actuators, communication technology, and logistics, design and construction of control systems and their operation. The knowledge goes beyond the traditional process engineering field by applying the same principles, to biomedical processes, energy production and management of environmental issues. The book explains all the determinations in the "chemical systems" or "process systems", starting from the beginning of the processes, going through the intricate interdependency of the process stages, analyzing the hardware components of a control system and ending with the design of an appropriate control system for a process parameter or a whole process. The book is first addressed to the students and graduates of the departments of Chemical or Process Engineering. Second, to the chemical or process engineers in all industries or research and development centers, because they will notice the resemblance in approach from the system and control point of view, between different fields which might seem far from each other, but share the same control philosophy.

This book presents the proceedings of the second Vehicle Engineering and Vehicle Industry conference, reflecting the outcomes of theoretical and practical studies and outlining future

The classic novel of freedom and the search for authenticity that defined a generation On the Road chronicles Jack Kerouac's years traveling the North American continent with his friend Neal Cassady, "a sideburned hero of the snowy West." As "Sal Paradise" and "Dean Moriarty," the two roam the country in a quest for self-knowledge and experience. Kerouac's love of America, his compassion for humanity, and his sense of language as jazz combine to make On the Road an inspirational work of lasting importance. Kerouac's classic novel of freedom and longing defined what it meant to be "Beat" and has inspired every generation since its initial publication more than fifty years ago. This Penguin Classics edition contains an introduction by Ann Charters. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Gonzo journalist and literary roustabout Hunter S. Thompson flies with the angels—Hell's Angels, that is—in this short work of nonfiction. "California, Labor Day weekend . . . early, with ocean fog still in the streets, outlaw motorcyclists wearing chains, shades and greasy Levis roll out from damp garages, all-night diners and cast-off one-night pads in Frisco, Hollywood, Berdoo and East Oakland, heading for the Monterey peninsula, north of Big Sur. . . The Menace is loose again." Thus begins Hunter S. Thompson's vivid account of his experiences with California's most notorious motorcycle gang, the Hell's Angels. In the mid-1960s, Thompson spent almost two years living with the controversial Angels, cycling up and down the coast, reveling in the anarchic spirit of their clan, and, as befits their name, raising hell. His book successfully captures a singular moment in American history, when the biker lifestyle was first defined, and when such countercultural movements were electrifying and horrifying America. Thompson, the creator of Gonzo journalism, writes with his usual bravado, energy, and brutal honesty, and with a nuanced and incisive eye; as The New Yorker pointed out, "For all its uninhibited and sardonic humor, Thompson's book is a thoughtful piece of work." As illuminating now as when originally published in 1967, Hell's Angels is a gripping portrait, and the best account we have of the truth behind an American legend.

Perry and Lester invent things: seashell robots that make toast, Boogie Woogie Elmo dolls that drive cars. They also invent entirely new economic systems. When Kodak and Duracell are broken up for parts by sharp venture capitalists, Perry and Lester help to invent the "New Work," a New Deal for the technological era. Barefoot bankers cross the nation, microinvesting in high-tech communal mini-startups. Together, they transform the nation and blogger Andrea Fleeks is there to document it. Then it slides into collapse. The New Work bust puts the dot-bomb to shame. Perry and Lester build a network of interactive rides in abandoned Walmarts across the land. As their rides gain in popularity, a rogue Disney executive engineers a savage attack on the rides by convincing the police that their 3D printers are being used to make AK-47s. Lawsuits multiply as venture capitalists take on a new investment strategy: backing litigation against companies like Disney. Lester and Perry's friendship falls to pieces when Lester gets the fatkins treatment, which turns him into a sybaritic gigolo. Then things get really interesting. No two markets for voluntary health insurance (VHI) are identical. All differ in some way because they are heavily shaped by the nature and performance of publicly financed health systems and by the contexts in which they have evolved. This volume contains short, structured profiles of markets for VHI in 34 countries in Europe. These are drawn from European Union member states plus Armenia, Iceland, Georgia, Norway, the Russian Federation, Switzerland and Ukraine. The book is aimed at policy-makers and researchers interested in knowing more about how VHI works in practice in a wide range of contexts. Each profile, written by one or more local experts, identifies gaps in publicly-financed health coverage, describes the role VHI plays, outlines the way in which the market for VHI operates, summarizes public policy towards VHI, including major developments over time, and highlights national debates and challenges. The book is part of a study on VHI in Europe prepared jointly by the European Observatory on Health

Systems and Policies and the WHO Regional Office for Europe. A companion volume provides an analytical overview of VHI markets across the 34 countries.
