Surgery: A Case Based Clinical Review provides the reader with a comprehensive understanding of surgical diseases in one easy to use reference that combines multiple teaching formats. The book begins using a case based approach. The cases presented cover the diseases most commonly encountered on a surgical rotation. The cases are designed to provide the reader with the classic findings on history and physical examination. The case presentation is followed by a series of short questions and answers, designed to provide further understanding of the important aspects of the history, physical examination, differential diagnosis, diagnostic work-up and management, as well as questions that may arise on surgical rounds. Key figures and tables visually reinforce the important elements of the disease process. A brief algorithmic flow chart is provided so the reader can quickly understand the optimal management approach. Two additional special sections further strengthen the student's comprehension. The first section covers areas of controversy in the diagnosis or management of each disease, and another section discusses pitfalls to avoid, where the inexperienced clinician might get in trouble. The text concludes with a

series of multiple choice questions in a surgery shelf/USMLE format with robust explanations. *Surgery: A Case Based Clinical Review* is based on 20 years of Socratic medical student teaching by a nine-time Golden Apple teaching awardee from the UCLA School of Medicine and will be of great utility for medical students when they rotate on surgery, interns, physician assistant students, nursing students and nurse practitioner students.

From the earliest stages of our medical training, we experience unforgettable moments with our patients - inspiring, traumatic, joyful, and sometimes even humorous events. Too often, as doctors-in-training we talk about the suffering or recovery of our patients, ignoring our own emotions after these events, letting them passively shape us until we dig ourselves into an abyss of burn out and resentment. *Diary of a Med Student* is a book created by medical students, for medical students, doctors, pre-med students, and their loved ones to look backward, forward, and laterally on the wonderful world of medical school. This book offers a space to reflect on our emotions, process their meaning, and share them as tales of sorrow, humor, joy, or inspiration, told from the perspective of medical students writing in a diary. While the act of sharing emotion is itself therapeutic, reading these emotional challenges that we can all relate to is unifying and comforting, providing us with insight through the lessons conveyed in the light of a variety of feelings. Let this book spark a powerful domino effect of

change in medical education: in the way we teach physicians to create a safe space for inner reflection and expression of emotion to ultimately enhance physician wellness.
