Free will is a key but contested concept in the work of Jean-Jacques Rousseau: while the famed philosopher is known to have asserted that free will distinguishes human beings from animals, several interpreters have argued that he merely pretends to have this belief for the sake of healthy politics and to avoid persecution by religious authorities. Through careful readings of key texts and letters, *The Free Animal* offers a new and original exploration of Rousseau's views on free will, just in time for the 200th anniversary of his birth. Lee MacLean shows that Rousseau needs and uses the idea of human consciousness of free will to explain the development of morality, convention, and vice. MacLean bases her argument on a broad range of texts, from canonical works to Rousseau's untranslated letters and drafts. Featuring careful analyses and an extensive engagement with the secondary literature, *The Free Animal* offers a novel interpretation of the changing nature and complexity of Rousseau's intention.

This novel is an epic real-life adventure/bromance about a gay street activist from San Francisco (Ezekiel Krahlin), who falls in love with (and becomes a sidekick to) a remarkable and incredibly handsome gay male (Arwyn Miles) who the author eventually concludes is a detective out of Orange County, California...and perhaps even his guardian "dragon." Whether this is fact or not remains to be seen, as the adventure continues beyond the book's conclusion. However, the many true tales woven around these two (mostly instigated by Arwyn himself) certainly give credence to the author's interpretation. Most of the tales contained herein are the absolute truth, though with much whimsical embellishment, and mystical implications that imply a great destiny for these two, as well as the homophile community at large. Many spiritual implications from a pagan perspective will give great hope and inspiration to the LGBT community (both local and global), as well as to any other person who holds a compassionate view on life and destiny. You will laugh, you will weep, you will explore the Cosmic Deep, on this roller coaster ride of queer intrigue, mystery and outrageous phantasmagoria of gay revelation, mischief and delight.

It is said that "words are the mirror of the heart" and that they also reflect my thoughts. If I want my language to be filled with Freedom, Wisdom and Love, there are certain words or at least a certain form of language that I must use. Jacques Martel has acquired a great expertise in this area through his many communications with the public since 1998, as much in Quebec as in Europe. In this book, which he intends as a practical tool, he shares with us several keys to help us make the messages we want to transmit more easily understood by others at the level of the heart. He gives me the knowledge of certain words related to spiritual principles, which I can integrate into my ordinary language with my family, my friends, my work relationships and when I

address myself to a public. The result is a more effective and a truer communication.

This book is a collection of essays in honor of Paul Ziff written by his colleagues, students, and friends. Many of the authors address topics that Ziff has discussed in his writings: understanding, rules and regularities, proper names, the feelings of machines, expression, and aesthetic experience. Paul Ziff began his professional career as an artist, went on to study painting with J. M. Hanson at Cornell, and then studied for the Ph. D. in philosophy, also at Cornell, with Max Black. Over the next three decades he produced a series of remarkable papers in philosophy of art, culminating in 1984 with the publication of *Antiaesthetics: An Appreciation of the Cow with the Subtle Nose*. In 1960 he published *Semantic Analysis*, his masterwork in philosophy of language. Throughout his career he made important contributions to philosophy of mind in such papers as "The Simplicity of Other Minds" (1965) and "About Behaviourism" (1958). In addition to his work in these areas, his lectures at Harvard on philosophy of religion are an underground classic; and throughout his career he has continued to make art and to search for the meaning of life in the properties of prime numbers. Although his interests are wide and deep, questions about language, art, and mind have dominated his philosophical work, and it is problems in these areas that provide the topics of most of the essays in this volume.
