The critically acclaimed, award-winning, modern classic *Speak* is now a stunning graphic novel. "Speak up for yourself—we want to know what you have to say." From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless—an outcast—because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. Through her work on an art project, she is finally able to face what really happened that night: She was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. With powerful illustrations by Emily Carroll, Laurie Halse Anderson's *Speak: The Graphic Novel* comes alive for new audiences and fans of the classic novel. This title has Common Core connections.

What is the purpose of education? What kind of people do we want our children to grow up to be? How can we design schools so that students will acquire the skills they'll need to live fulfilled and productive lives? These are just a few of the questions that renowned educator Dennis Littky explores in *The Big Picture: Education Is Everyone's Business*. The schools Littky has created and led over the past 35 years are models for reformers everywhere: small, public schools where the curriculum is rich and meaningful, expectations are high, student progress is measured against real-world standards, and families and communities are actively engaged in the educational process. This book is for both big "E" and small "e" educators: * For principals and district administrators who want to change the way schools are run. * For teachers who want students to learn passionately. * For college admissions officers who want diverse applicants with real-world learning experiences. * For business leaders who want a motivated and talented workforce. * For parents who want their children to be prepared for college and for life. * For students who want to take control over their learning . . . and want a school that is interesting, safe, respectful, and fun. * For anyone who cares about kids. Here, you'll find a moving account of just what is possible in education, with many of the examples drawn from the Metropolitan Regional Career and Technical Center ("The Met") in Providence, Rhode Island--a diverse public high school with the highest rates of attendance and college acceptance in the state. The Met exemplifies personalized learning, one student at a time. *The Big Picture* is a book to reenergize educators, inspire teachers in training, and start a new conversation about kids and schools, what we want for both, and how to make it happen.

When It's Smart to Say No Nearly every week we read about a tragedy or scandal that could have been prevented if individuals had said no to ill-advised or illegitimate orders. In this timely book, Ira Chaleff explores when and how to disobey inappropriate orders, reduce unacceptable risk, and find better ways to achieve legitimate goals. The inspiration for the book, and its title, comes from the concept of intelligent disobedience used in guide dog training. Guide dogs must recognize and resist a command that would put their human and themselves at risk and identify safer options for achieving the goal. This is precisely what Chaleff helps humans do. Using both deeply disturbing and uplifting examples, as well as critical but largely forgotten research, he shows how to create a culture where, rather than "just following orders," people hold themselves accountable to do the right thing, always.

#1 NEW YORK TIMES BESTSELLER • A special 20th anniversary edition of the beloved book that changed millions of lives—with a new afterword by the author Maybe it was a grandparent, or a teacher, or a colleague. Someone older, patient and wise, who understood you when you were young and searching, helped you see the world as a more profound place, gave you sound advice to help you make your way through it. For Mitch Albom, that person was Morrie Schwartz, his college professor from nearly twenty years ago. Maybe, like Mitch, you lost track of this mentor as you made your way, and the insights faded, and the world seemed colder. Wouldn't you like to see that person again, ask the bigger questions that still haunt you, receive wisdom for your busy life today the way you once did when you were younger? Mitch Albom had that second chance. He rediscovered Morrie in the last months of the older man's life. Knowing he was dying, Morrie visited with Mitch in his study every Tuesday, just as they used to back in college. Their rekindled relationship turned into one final "class": lessons in how to live. *Tuesdays with Morrie* is a magical chronicle of their time together, through which Mitch shares Morrie's lasting gift with the world.

"Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.
