Only 50 percent of kids growing up in poverty will earn a high school diploma. Just one in ten will graduate college. Compelled by these troubling statistics, Heather Kirn Lanier joined Teach For America (TFA), a program that thrusts eager but inexperienced college graduates into America's most impoverished areas to teach, asking them to do whatever is necessary to catch their disadvantaged kids up to the rest of the nation. With little more than a five-week teacher boot camp and the knowledge that David Simon referred to her future school as "The Terrordome," the altruistic and naïve Lanier devoted herself to attaining the program's goals but met obstacles on all fronts. The building itself was in such poor condition that tiles fell from the ceiling at random. Kids from the halls barged into classes all day, disrupting even the most carefully planned educational activities. In the middle of one lesson, a wandering student lit her classroom door on fire. Some colleagues, instantly suspicious of TFA's intentions, withheld their help and supplies. ("They think you're trying to 'save' the children," one teacher said.) And although high school students can be by definition resistant, in west Baltimore they threw eggs, slashed tires, and threatened teachers' lives. Within weeks, Lanier realized that the task she was charged with—achieving quantifiable gains in her students' learning—would require something close to a miracle. Superbly written and timely, *Teaching in the Terrordome* casts an unflinching gaze on one of America's "dropout factory" high schools. Though Teach For America often touts its most successful teacher stories, in this powerful memoir Lanier illuminates a more common experience of "Teaching For America" with thoughtful complexity, a poet's eye, and an engaging voice. As hard as Lanier worked to become a competent teacher, she found that in "The Terrordome," idealism wasn't enough. To persevere, she had to rely on grit, humility, a little comedy, and a willingness to look failure in the face. As she adjusted to a chaotic school administration, crumbling facilities, burned-out colleagues, and students who perceived their school for the failure it was, she gained perspective on the true state of the crisis TFA sets out to solve. Ultimately, she discovered that contrary to her intentions, survival in the so-called Charm City was a high expectation.

Among the country of Cambodia are the temples of Angkor Wat . The home of the ancient Khmer and their Mighty Kings. Once home to the proud Khmer who at one time ruled what is now present day, SE Asia. Anna Oldenburg came by invitation of a NGO group to help preserve the ancient temples. To work and find ways to save the majestic temples for others to enjoy. Anna had been around ancient temples and archeology all her life. She was a grand niece of one of the best known archeologist of the last century. So it was no surprise when Anna found archeology as her life's work. Landing in Cambodia she found not only her work but also a country that felt strangely familiar. Then there was her host Nurung... As long as she could remember she had dreams about Nurung and about the temples of Cambodia, yet they never made any sense until she arrived. When she started working on the temples she felt like she was walking paths she had, a long time ago, but how? She had never been to Cambodia in her life. Anna met Heng, younger cousin to Nurung in College. After months of the same classes, they go to Egypt to work and fall in love. Yet he disappears for lengths of time but always comes back like he only left for a few minutes but never has a good explanation. Then there is Nurung. He is always there, always watchful. Handsome beyond anything Anna could dream of... only she has dreamed of him all her life. These three are brought together not by coincidence but by destiny's call. They are part of a larger picture and they all must take part or possibly be destroyed forever. It's a race against time and making sure history as we know it doesn't get messed up or the present day may not turn out like we know it. Will Anna find out the meaning of her dreams? Who will she give herself to, Heng or Nurung? Will those back in time at the ancient temples of Angkor Wat find a way to destroy all she holds dear... even herself?

"Jen offers up all the gory details of a life permanently in progress. She reassures you that it's okay to not have life completely figured out, even when you reach middle age (and find your first gray pubic hair). She talks about making unusual or unpopular life decisions (such as cultivating a 'friend with benefits' or not going home for the holidays) because you don't necessarily want for yourself what everyone else seems to think you should. It's about renting when everyone says you should own, dating around when everyone thinks you should settle down, and traveling alone when everyone pities you for going to Paris without a man"--Amazon.com.

The question of masculinity formed a key part of the intellectual life of late antiquity and was crucial to the development of Christian society. This idea is at the heart of Mathew Kuefler's new book, which revisits the Roman Empire during the third and fifth centuries of the common era. Kuefler argues that the collapse of the Roman army, an increasingly autocratic government, and growing restrictions on the traditional rights of men within marriage and sexuality all led to an endemic crisis in masculinity: men of Roman aristocracy, who had always felt themselves to be soldiers, statesmen, and the heads of households, became, by their own definition, unmanly. The cultural and demographic success of Christianity during this epoch lay in the ability of its leaders to recognize and respond to this crisis. Drawing on the tradition of gender ambiguity in early Christian teachings, which included Jesus's exhortation that his followers "make themselves eunuchs for the sake of the kingdom of heaven," Christian writers and thinkers crafted a new masculine ideal, one that took advantage of the changing social realities in Rome, inverted the Roman model of manliness, and helped solidify Christian ideology by reinstating the masculinity of its adherents.

A "very dramatic [and] compelling" World War II story of murder, mutiny, and a military cover-up, from the author of *The Phoenix Program* (The New York Times). Captured by the Japanese while on patrol in the fetid jungles of New Guinea, Douglas Valentine's father, who'd enlisted in the US Army at age sixteen, was sent to a prison camp in the Philippines, where he was interned with Australian and British soldiers. The events that followed make up this "well-told, chilling" story of betrayal and brutality--a powerful tale of a son uncovering the traumatic events that shaped the rest of his father's life (Los Angeles Times Book Review). "Not just a searing picture of life in a terrible POW camp, it is also a significant historical document about a place that the U.S. military says never existed." --Publishers Weekly

How America can rebuild its industrial landscape to sustain an innovative economy. America is the world leader in innovation, but many of the innovative ideas that are hatched in American start-ups, labs, and companies end up going abroad to reach commercial scale. Apple, the superstar of innovation, locates its production in China (yet still reaps most of its profits in the United States). When innovation does not find the capital, skills, and expertise it needs to come to market in the United States, what does it mean for economic growth and job creation? Inspired by the MIT Made in America project of the 1980s, *Making in America* brings experts from across MIT to focus on a critical problem for the country. MIT scientists, engineers, social scientists, and management experts visited more than 250 firms in the United States, Germany, and China. In companies across America—from big defense contractors to small machine shops and new technology start-ups—these experts tried to learn how we can rebuild the industrial landscape to sustain an innovative economy. At each stop, they asked this basic question: "When you have a new idea, how do you get it into the market?" They found gaping holes and missing pieces in the industrial ecosystem. Even in an Internet-connected world, proximity to innovation and users matters for industry. *Making in America* describes ways to strengthen this connection, including public-private collaborations, new government-initiated manufacturing innovation institutes, and industry/community college projects. If we can learn from these ongoing experiments in linking innovation to production, American manufacturing could have a renaissance.

"I like a little rebellion now and then"—so wrote Thomas Jefferson to Abigail Adams, enlisting in a tradition that throughout American history has led writers to rage and reason, prophesy and provoke. This is the first anthology to collect and examine an American literature that holds the nation to its highest ideals, castigating it when it falls short and pointing the way to a better collective future. American Protest Literature presents sources from eleven protest movements—political, social, and cultural—from the Revolution to abolition to gay rights to antiwar protest. Each section reprints documents from the original phase of the movement as well as evidence of its legacy in later times. Informative headnotes place the selections in historical context and draw connections with other writings within the anthology and beyond. Sources include a wide variety of genres—pamphlets, letters, speeches, sermons, legal documents, poems, short stories, photographs, posters—and a range of voices from prophetic to outraged to sorrowful, from U.S. Presidents to the disenfranchised. Together they provide an enlightening and inspiring survey of this most American form of literature.
