Look what it's done to the investors who believed in it! •Enter the market at very specific times, and structure trades that capitalize on proven pricing anomalies and distortions. •Master day trading strategies that work in any market conditions, because they don't rely on financial predictions, company results, or market direction. Stock prices have lost all relationship to the underlying performance of the companies they represent: investors who relied on traditional 'buy and hold' strategies have been savaged by the greatest destruction of wealth in the history of the world. But some options traders are earning immense profits right now, even in this generation's worst market and they'll keep profiting no matter how the market moves. How? They trade at very specific times and structure trades to capitalize on well-characterized pricing anomalies and distortions. By doing so, they can generate more profit in one day than most experienced investors realize in a month, sometimes even a year. What's more, they systematically minimize exposure to market risk, including potentially disastrous after-hour market moves. In Day Trading Options, top options trader Jeff Augen shows exactly how you can use these strategies, too. This will also help you reflect later on to identify ways that you could possibly improve or streamline your routine so that you are even more effective in the marketplace. In this book, you will discover: Advanced Options Trading Strategies You Need to Know About Trading 101: What Is A 'Day Trading' The Right Way to Buy Options The 3 Best Stocks for Options Trading Sell Options on The Expiration Day Don't Overcomplicate Your Trading Scalping: An Effective and High Trading Strategy Aggressive Options Trading ...And much more What you do before the market opens is crucial to your entire trade day. Most traders will begin their days around 6 AM EST, as this gives

them plenty of time to get their day prepared before the market opens. The more prepared you are in advance, the better you will be able to utilize your time once the market opens to conduct actual trades and position yourself for maximum profits. Before the market opens, there are four tasks that every single trader should engage in to help them get prepared for the day ahead. These include conducting a market overview, locating potential trades, designing their watch list, and checking their existing positions. We are going to discuss how each of these tasks occurs so that you can get a feel for how you can build the beginning of your trade day around these strategies.

Market Overview The first thing you need to do is conduct a market overview, which will allow you to catch up on what has happened overnight. Stocks tend to change overnight, so paying attention to this information is key in helping you lay the foundation for your trades ahead. Once you know where the market is at, you can get a feel for how that might be influencing your existing trades and how it might affect the next trades you plan on making. The easiest way to conduct a market overview is to check out news platforms like CNBC or MarketWatch, as these tend to provide the best and most recent information regarding the stock market. You want to pay attention to the overall market sentiment, the sector sentiments, and the current holdings. For the market sentiment, you want to see whether the general

market is bullish or bearish, get a feel for what the key economic reports are, and pay attention to inflation and currency. Are you ready to be in the TOP 10% of successful traders? "Scroll up and Click the Add to Cart button"
