Brighton Baby: A Revolutionary Organic Approach to Having an Extraordinary Child - The Complete Guide to Preconception & Conception is about helping couples achieve optimal health - mentally, physically, emotionally, and spiritually - before you conceive your future child. Author and perinatal expert, Roy Dittmann, OMD, MH takes couples on a journey that celebrates the power of love as the intangible blueprint of life . Dr. Dittmann exposes the dangers of conceiving in our toxic world and focuses couples on how to prepare body, mind, and spirit for the moment of conception. Using integral wisdom, Dr. Dittmann helps couples go from overwhelm to taking practical steps to realize their goals of having an extraordinary child. Brighton Baby is about the art and science of gifting the best of who we are to our future children. It is about reducing human suffering by preventing subtle and overt birth defects before they occur. It is about transforming the context inside of which we conceive and birth children. - Roy Dittmann, OMD, MH, author

Throughout the book, Dr. Dittmann turns the spotlight on the hidden dangers of: heavy metals and other toxins, genetically modified foods, pesticides, artificial sweeteners, rancid oils, antibiotics, processed foods, contaminated drinking water, electrosmog, and the pluses & minuses of vaccines - merging science and common sense to compel couples to take action today to prevent birth defects in their future child. Brighton Baby is a call to action for couples to commit now to consciously preparing for your future child together. My organic baby is a book that gives parents a complete guide, based on studies and scientific data. It confronts the facts and myths associated with the upbringing of a child in a natural, organic way: free of vaccines, free of chemicals and contaminants commonly found in standard food, hygiene and cleaning products. You will know how to complement orthodox medicine with natural options, such as homeopathy, without the need to use harmful chemicals, and how to select healthy organic food for your baby and entire family. It has recipes to get rid of common or conventional products, almost completely at home. As well as helping you improve your health before, during, and after pregnancy. Pamela Marin talks about her own experience as a Hispanic woman and new mother. A mother from a new generation of informed parents who are seeking other options and do not conform to the norm. "I hope you enjoy my story, as much as I enjoy it, and may it help you create that new baby that you expecting with a healthier and more informed perspective."

The author shares essential information on tackling toddler eating habits from 12 months to 3 years and over 125 simple recipes that are adult friendly. --adapted from back cover.

From the author of *Expecting Better* and *The Family Firm*, an economist's guide to the early years of parenting. "Both refreshing and useful. With so many parenting theories driving us all a bit batty, this is the type of book that we need to help calm things down." —LA Times "The book is jam-packed with information, but it's also a delightful read because Oster is such a good writer." —NPR

With *Expecting Better*, award-winning economist Emily Oster spotted a need in the pregnancy market for advice that gave women the information they needed to make the best decision for their own pregnancies. By digging into the data, Oster found that much of the conventional pregnancy wisdom was wrong. In *Cribsheet*, she now tackles an even greater challenge: decision-making in the early years of parenting. As any new parent knows, there is an abundance of often-conflicting advice hurled at you from doctors, family, friends, and strangers on the internet. From the earliest days, parents get the message that they must make certain choices around feeding, sleep, and schedule or all will be lost. There's a rule—or three—for everything. But the benefits of these choices can be overstated, and the trade-offs can be profound. How do you make your own best decision? Armed with the data, Oster finds that the conventional wisdom doesn't always hold up. She debunks myths around breastfeeding (not a panacea), sleep training (not so bad!), potty training (wait until they're ready or possibly bribe with M&Ms), language acquisition (early talkers aren't necessarily geniuses), and many other topics. She also shows parents how to think through freighted questions like if and how to go back to work, how to think about toddler discipline, and how to have a relationship and parent at the same time. Economics is the science of decision-making, and *Cribsheet* is a thinking parent's guide to the chaos and frequent misinformation of the early years. Emily Oster is a trained expert—and mom of two—who can empower us to make better, less fraught decisions—and stay sane in the years before preschool.
