The book next discusses, in Part II, Individual Processes and Behaviour. It then moves, in Part III, to examine the interactions among individuals in Group Behaviour. Part IV discusses The Organization System and, finally, in Part V, the book presents Organizational Dynamics. Numerous up-to-date examples: Because many students have limited exposure to real organizations, the book contains recent examples from a broad spectrum of organizations to illustrate the major concepts and to help students apply the knowledge. Some Distinctive Pedagogical Features: *Organizational Behaviour* offers a number of distinctive, time tested and interesting features for students as well as new and innovative features. These features should facilitate the students' acquisition and retention of the material. v Learning objectives focus student attention on upcoming chapter content and show what happens to the manager or organization. v Cases at the end of the chapter provide students an opportunity to apply their knowledge in making managerial decisions and recommendations. v Numerous review and discussion questions follow each chapter. These questions are designed to enhance student learning and interest.

Diversity management has recently attracted a lot of attention in both academia and practice. Globalization, migration, demographic changes, low fertility rates, a scarce pool of qualified labor, and women entering the workforce in large scales have led to an increasingly heterogeneous workforce in the past twenty years. In response to those ongoing changes, organizations have started to create work environments which address the needs and respond to the opportunities of a diverse workforce. The implementation of diversity policies and practices and the creation of an organizational culture that values heterogeneity have been the focus of recent organizational initiatives. This special issue aims at shedding light on some of open research questions by including both theoretical and empirical contributions.
