Soon the two discover that they are up against a conspiracy far more complex and dangerous than they suspected. And as amorous adventures and diverting mishaps litter their path through Europe's high society, Allmen and de Leon get closer to uncovering a high-tech plot to manipulate global financial markets.

In recent years we have seen a number of dramatic discoveries within the biological and related sciences. Traditional arguments such as "nature versus nurture" are rapidly disappearing because of the realization that just as we are affecting our environments, so too do these altered environments restructure our cognitive abilities and outlooks. If the biological and technological breakthroughs are promising benefits such as extended life expectancies, these same discoveries also have the potential to improve in significant ways the quality of our built environments. This poses a compelling challenge to conventional architectural theory... This is the first book to consider these new scientific and humanistic models in architectural terms. Constructed as a series of five essays around the themes of beauty, culture, emotion, the experience of architecture, and artistic play, this book draws upon a broad range of discussions taking place in philosophy, psychology, biology, neuroscience, and anthropology, and in doing so questions what implications these discussions hold for architectural design. Drawing upon a wealth of research, Mallgrave argues that we should turn our focus away from the objectification of architecture (treating design as the creation of objects) and redirect it back to those for whom we design: the people inhabiting our built environments.

In 1937, when Joyce was three months old, her parents sailed with their young family to East Africa to be missionaries with the Africa Inland Mission. Imminent war in Europe brought world-wide tensions and ten years would pass before they could return to the United States. It was a decade of privation and learning to make do, growing cotton and sugar cane, harvesting their own garden, and resoling shoes with cowhide -- all while building and overseeing schools and churches. At the end of WW2, their return to the United States brought a new kind of adventure for Joyce as she navigated a home she didn't remember. Undaunted by their previous experiences, the Baker family returned to Africa in 1949. They lived in a mud and wattle shack while Joyce's parents began a new venture to build a school and church and a more permanent home. Joyce and her sister were sent to their mission boarding school, Rift Valley Academy, in Kenya for five years, until Joyce's graduation from high school. This is the story of the joys, perils, and miracles of Joyce's childhood and her coming of age in Africa as the winds of change swept across the continent and into her family's life and work.
