Against a background of perceived attacks on established religion by the politicians of the day, and the introduction of the newfangled cinematograph to the city of Ourense, the local bishop, His Excellency, faces dissent in the ranks. His assistant, Don Xenaro, while struggling to preserve his loyalty to the bishop, is drawn to side with the canon theologian, Don Telesforo, who is vehemently opposed to the new invention. No less an opponent is the much revered, and soon to be sainted, local nun, Sister Sabina, who appeals to the bishop to save his soul. The bishop seeks solace in food, in the once intellectual but now ailing company of his aged vicar, in memories of a better time, when he studied at the seminary, but ghosts rarely lie down easily, and he will have to chase them away if he doesn't wish to be defeated. A visit to the cinema, where he witnesses the rowdy atmosphere, the impressive images and the poverty of its pioneers, an indulgent attitude... If he's not careful, others at the start of this tumultuous twentieth century will take matters into their own hands, and dissent will turn into open revolt. A hilarious look at the internal politics of a cathedral chapter, at the confrontation between conservative and liberal elements, His Excellency is one of Galician writer Carlos Casares' best-loved and most enduring novels.

From the beginning of the twentieth century, scientific and social scientific research has been characterised by intellectual exchange between Europe and the US. The establishment of the Third Reich ensured that, from the German speaking world, at least, this became a one-way traffic. In this book Christian Fleck explores the invention of empirical social research, which by 1950 had become the binding norm of international scholarship, and he analyses the contribution of German refugee social scientists to its establishment. The major names are here, from Adorno and Horkheimer to Hirshman and Lazarsfeld, but at the heart of the book is a unique collective biography based on original data from more than 800 German-speaking social scientists. Published in German in 2008 to great acclaim, Fleck's important study of the transatlantic enrichment of the social sciences is now available in a revised English-language edition. In *Doing Church as a Team*, Pastor Wayne Cordeiro underscores that church numbers are insignificant when every individual is not involved. However, if the team members work together as one toward a single, clearly defined goal, anything is possible, and everyone shares in the joys and rewards of success!

River Sar] (1884). Rosalía de Castro (1837–1885) was an artist of vast poetic vision. Her understanding of human nature and her deep sensitivity to the injustices suffered by women and by such marginalized peoples as those of her native region, Galicia, are manifest in verses of universal yet rarely translated significance. An outspoken proponent of both women's rights and her region's cultural and political autonomy, Castro used her poetry as a vehicle through which to decry the crushing hardships both groups endured as Spain vaulted between progressive liberal and conservative reactionary political forces throughout the nineteenth century. Depending upon what faction held sway in the nation at any given time during Castro's truncated literary career, her works were either revered as revolutionary or reviled as heretical for the views they espoused. Long after her death by uterine cancer in 1885, Castro was excluded from the pantheon of Spanish literature by Restoration society for her unorthodox views. Compellingly, the poet's conceptualization of the individual and the national self as informed by gender, ethnicity, class, and language echoes contemporary scholars of cultural studies who seek to broaden present-day definitions of national identity through the incorporation of precisely these same phenomena. Thanks to the most recent works in Rosalian and Galician studies, we are now able to recuperate and reevaluate Rosalía de Castro's poems in their original languages for the more radical symbolism and themes they foreground related to gender, sexuality, race and class as they inform individual and national identities. However, although Castro's poetic corpus is widely accessible in its original languages, these important features of her verses have yet to be given voice in the small number of English translations of only a sub-set of her works that have been produced in the last century. As a result, our understanding of Castro's potential contributions to contemporary world poetics, gender studies, Galician and more broadly cultural studies is woefully incomplete. An English translation of Castro's works that is specifically feminist in its methodological orientation offers a unique and thought-provoking means by which to fill this void.

The Mystery of Sintra road begins when two friends are kidnapped by several masked men, who, to judge by their manners and their accent are men of the best society. One of the friends is a doctor, and the masked men say that they need him to assist a noblewoman, who is about to give birth. When they reach the house, they find no such noblewoman, only a dead man. This book studies how Borges constructs a theory of translation that plays a fundamental role in the development of Argentine literature, and which, in turn, expands the potential for writers in Latin America to create new and innovative literatures through processes of re-reading, rewriting, and mis-translation. The book analyzes Borges's texts in both an Argentine and a transnational context, thus incorporating Borges's ideas into contemporary debates about translation and its relationship to language and aesthetics, Latin American culture and identity, tradition and originality, and center-periphery dichotomies. Furthermore, a central objective of this book is to show that the study of the importance of

translation in Borges and of the importance of Borges for translation studies need not be separated. Furthermore, translation studies has much to gain by the inclusion of Latin American thinkers such as Borges, while literary studies has much to gain by in-depth considerations of the role of translation in Latin American literatures. Energy-its discovery, its availability, its use-concerns all of us in general and the engineers of today and tomorrow in particular. The study of thermodynamics-the science of energy-is a critical element in the education of all types of engineers. Engineering Thermodynamics provides a thorough introduction to the art and science of engineering thermodynamics. It describes in a straightforward fashion the basic tools necessary to obtain quantitative solutions to common engineering applications involving energy and its conversion, conservation, and transfer. This book is directed toward sophomore, junior, and senior students who have studied elementary physics and calculus and who are majoring in mechanical engineering; it serves as a convenient reference for other engineering disciplines as well. The first part of the book is devoted to basic thermodynamic principles, essentially presented in the classic way; the second part applies these principles to many situations, including air conditioning and the interpretation of statistical phenomena.

Every reader of literature interprets the literary text on the basis of information they have acquired from previous reading, and according to norms they have established, either consciously or not, with regard to a work of literature. In this study, originally published in 1985, the author clarifies the concepts of magical realism and the fantastic, and establishes a series of guidelines that will allow us to distinguish between the two similar yet independent modes. The reader will thus be able to identify the implicit framework upon which the author of the fantastic and of magical realism bases their text.

"Daughter of the Sea" is the first of five novels written in Spanish by the Galician Rosalia de Castro (1837-1885). Its characters and events reflect the young author's concern for the Galician people, particularly those of the coastal area, and for women. In this story of passion and violence, cloaked in a supposedly romantic style, Castro joins other nineteenth-century women authors in denouncing economic and social injustice. This is the first translation of her fiction, and it brings to English-speaking readers a spirit that is comparable to George Sand, Madame de Stael, and the Brontes."

The *Rabinal Achi*, one of the most remarkable works of Mayan literature, dates back to the 1400s. The drama is set in the Guatemalan highlands in the second half of the fifteenth century. In an exemplary trial that takes place in Kajyub, the capital of the Rabinaleb at that time, a captured enemy warrior (Quiché Achi) appears before the royal court. A series of combative dialogues pits the offending warrior against the local warrior (Rabinal Achi) and the king (Job Toj), reconstructing the deeds of those involved and retracing the antagonistic history of these two Mayan groups, the Quiché and the Rabinaleb. Alain Breton approaches the text from an anthropological and ethnographical perspective, demonstrating that this indigenous text reenacts pre-Columbian historic paradigms. Breton translated into French an

entirely new transcription of the original text, and Teresa Lavender Fagan and Robert Schneider translated the text into English. Both the transcription and the translation are accompanied by detailed commentary and a glossary.

“A brilliant work . . . A dazzling meditation on the very nature of language itself” from the world-renowned scholar and author of *The Poetry of Thought* (Kirkus Reviews). In his classic work, literary critic and scholar George Steiner tackles what he considers the Babel “problem”: Why, over the course of history, have humans developed thousands of different languages when the social, material, and economic advantages of a single tongue are obvious? Steiner argues that different cultures’ desires for privacy and exclusivity led to each developing its own language. Translation, he believes, is at the very heart of human communication, and thus at the heart of human nature. From our everyday perception of the world around us, to creativity and the uninhibited imagination, to the often inexplicable poignancy of poetry, we are constantly translating—even from our native language.
