Reverend Graeme Sims's faithful pack follow his every command as if they can read his mind. But their willingness is down to an enlightened training method using his technique of dog whispering, which is based on the idea of treating the dogs as partners, not as servants, and human and dog learning to understand each other. This detailed, step-by-step instruction book shows you how to communicate properly with your dog, including guidelines on: how to choose the right breed of dog for you (or whether you're the right owner for a dog); how and when to use different commands; how to build a bond of trust; how to overcome problems with specific sections on the problem dog, the rescue dog, the nervous dog and the aggressive dog. THE DOG WHISPERER is a definitive guide to effective dog training for dog-owners and dog-lovers everywhere.

In this fascinating and moving memoir, sisters Jacky and Madeline share the communications they have received from their beloved father, Ron, since he passed away in February 2008. Ron reaches out to them from 'the other side' to show his family that there most certainly is life after death. Ron visits family and friends in dreams, shows them the future in visions, and plays havoc with door bells, light switches and alarms. He reaches out to them to prove that he is safe in the afterlife, and to offer reassurance and guidance from beyond. This extraordinary book shows that this life is not the end, and that happiness can be found in the afterlife. It is a touching and emotional tribute to their father that will offer comfort and hope to anyone who has lost someone they love.

After looking into the world of the afterlife for a long time, Anne Givaudan and Daniel Meurois were able to focus their attention on what might be called the world of "pre-birth". Using their familiar method of projecting consciousness, for the nine months which make up a pregnancy, they followed the path of Rebecca, a soul preparing to take on a body of flesh. Day after day, week after week, they faithfully recorded how the being to be incarnated went through many metamorphoses. Like a documentary article, their testimony retraces the various psychic and physical changes which everyone undergoes in the womb and the worlds which lead to it. This is a new way of looking at foetal life and the process of reincarnation. Written in a simple, direct style, the originality and amount of information the book offers make it a work that does not just speak to those who are to give birth to a child, or have already done so, but also all those for whom life is an everlasting source of wonder.

A collection of short essays from 17 very well-known authors who have a solid scientific background or renown within their ancestral traditions. What they have in common is that each one, within their discipline, is aiming to use water's molecular structure and memory to improve our world. This book is connected to a worldwide movement which is going to organize at least four significant worldwide events during 2015 and 2016. The essayists themselves are part of this movement and readers can join too. They will experiment, for instance, with using intention to lower the radioactivity level of Fukushima's water. It is a very young movement but one that has already generated much interest."

The groundbreaking and classic study that first popularized occultism, alchemy, and paranormal phenomena in the 1960s • Provides profound insights into our perceptions of reality, telepathy, mutants, and parallel universes • Reveals the occult influences on the Nazis and introduces the alchemist Fulcanelli and the work of Charles Fort and Gurdjieff • Over Half a Million Copies Sold This groundbreaking, international bestseller, first published in 1960, couples profound insights into the hidden history of humanity and our perceptions of reality with the scientific evidence that supports the existence of paranormal activity, telepathy, and extraterrestrial communications. The first book to explore in depth the Nazi fascination with the occult, Pauwels and Bergier also broke new ground with their study of pyramidology, alchemy and its close kinship with atomic energy, and the possibility of a widespread mutation of humanity that would herald the dawn of a new age for the earth. Their study of secret societies, starting with the Rosicrucians, suggests that such changes are actively being pursued in the present day by a "conspiracy" of the most spiritually and intellectually advanced members of the human race. The Morning of the Magicians also explores the anomalous events collected by Charles Fort, the work of Gurdjieff, and the history of the mysterious Fulcanelli, who was widely believed to have manufactured the philosopher's stone--which provided the Nazis the motive for mounting an intensive search for him during their occupation of Paris. Much more than a collection of strange facts defying conventional wisdom, this book remains a sophisticated philosophical exploration of repressed phenomena and hidden histories that asks its readers to look at reality with

ever "awakened eyes."

In this work, Anne GIVAUDAN invites us to contact the men and women who have the painful sensation that their soul is not aligned with their body. Without any judgment, any a priori or any classification, she pushes back the limits of the known worlds to allow us to dive into an unknown world. What is hiding behind these faces with often tragic or guilt-generating situations? That is what we will discover behind the life stories of these beings who underwent extreme circumstances. This is not about indicting or glorifying anyone, or anything, but simply about uncovering a different and less-known facet of LIFE.

Amid the noise and distractions of everyday life, is it really possible to choose to love the world? In these times of great uncertainty and anxiety, how can we find God? Thomas Merton felt the urgency of these questions more than 50 years ago, and his reflections upon them are more relevant than ever. One of America's most beloved mystics of the 20th century, Merton's voice was prophetic in the troubled era of the 1960s. In this new collection of thoughts and meditations selected from his most inspiring books and letters, Merton's radiant wisdom and foresight serve as a beacon of light for all of us searching to find true meaning and solace in today's difficult times. "Father Louis," as he was known at the Abbey of Gethsemani, fully embraced the contemplative life of a monk, yet he never held the world at arm's length: "We and our world interpenetrate. It is only in assuming full responsibility for our world, for our lives and for ourselves, that we can be said to live really for God." Sharply honest in his words but balanced by his poet's heart, Merton explores themes that include the inner ground of love, living in wisdom, and dialoguing with silence. He teaches that contemplation is possible for everyone and that the fundamental context for seeking God's presence is always our everyday lives. "In the deep silence, wisdom begins to sing her unending, sunlit, inexpressible song: the private song she speaks to the solitary soul." In *Choosing to Love the World*, Thomas Merton inspires us to look deep within ourselves and, in the peaceful silence of contemplation, to find and sing our own song. Edited by Jonathan Montaldo, associate director of The Merton Institute for Contemplative Living, and director of Bethany Spring, the Merton Institute retreat center in Trappist, Kentucky.

Have you ever considered toning up your face through a series of exercises, just as you can do it for the rest of the body? It can be done... and it works! This method employs both some American miming and acting techniques as well as some muscular rehabilitation techniques used in hospitals. The result is that the face becomes more tonic and expressive (a combination which is impossible to achieve through plastic surgery!). It simply requires the use of your hands and takes up less than 15 minutes a day: the first results will appear just after three weeks.

What happens on and after December 21, 2012? There has been much confusion and many predictions based on the Mayan calendar. Some people think time on Earth will end, but what if there was an intact and complete resource from the ancestors that will give us the wisdom we need for the shift and an understanding of the coming era? In "2012-2021: The Dawn of the Sixth Sun," Sergio Magana (Ocelocoyotl), mystic and teacher of the ancient Toltec/Aztec lineage of Mesoamerica, discloses an in-depth understanding from a rich and uninterrupted oral tradition, the meaning of the shift from the Fifth to the Sixth Sun, the possibilities presented to humanity at this time, and ancient teachings and practices designed to support this shift. The Toltecs knew how to interpret the mathematical or universal order that governs all of existence by measuring and observing cycles of time, and the impact they had on the Earth, human consciousness, and perception.
