A Commerce of Knowledge tells the story of three generations of Church of England chaplains who served the English Levant Company in Syria during the seventeenth and eighteenth centuries. Reconstructing the careers of its protagonists in the cosmopolitan city of Ottoman Aleppo, Simon Mills investigates the links between English commercial and diplomatic expansion, and English scholarly and missionary interests: the study of Middle-Eastern languages; the exploration of biblical and Greco-Roman antiquities; and the early dissemination of Protestant literature in Arabic. Early modern Orientalism is usually conceived as an episode in the history of scholarship. By shifting the focus to Aleppo, A Commerce of Knowledge brings to light the connections between the seemingly separate worlds, tracing the emergence of new kinds of philological and archaeological enquiry in England back to a series of real-world encounters between the chaplains and the scribes, booksellers, priests, rabbis, and sheikhs they encountered in the Ottoman Empire. Setting the careers of its protagonists against a background of broader developments across Protestant and Catholic Europe, Mills shows how the institutionalization of English scholarship, and the later English attempt to influence the Eastern Christian churches, were bound up with the international struggle to establish a commercial foothold in the Levant. He argues that these connections would endure until the shift of British commercial and imperial interests to the Indian subcontinent in the second half of the eighteenth century fostered new currents of intellectual life at home.

Oxford English for Information Technology is a course for students of information technology and computing, or for people already working in the IT sector. It is suitable for use in universities, technical schools and on adult education programmes, with students at intermediate to advanced level who want to improve and extend their language skills in the context of IT. This second edition has been carefully and selectively revised to take account of recent developments in this fast-moving sector, and to ensure that the material is up to date. The new material reflects changes in such as technical specifications, new technologies, and working practices. The glossary has also been updated. The Oxford-Duden Pictorial Thai & English Dictionary identifies over 29,000 objects by means of numbered illustrations, and offers at a glance their Thai and English terms.

Presenting the first exploration of Christopher Marlowe's complex place in the canon, this collection reads Marlowe's work against an extensive backdrop of repertory, publication, transmission, and reception. Wide-ranging and thoughtful chapters consider Marlowe's deliberate engagements with the stage and print culture, the agents and methods involved in the transmission of his work, and his cultural reception in the light of repertory and print evidence. With contributions from major international scholars, the volume considers all of Marlowe's oeuvre, offering illuminating approaches to his extended animation in theatre and print, from the putative theatrical debut of Tamburlaine in 1587 to the most current editions of his work.

For many observers, the European Union is mired in a deep crisis. Between sluggish growth; political turmoil following a decade of austerity politics; Brexit; and the rise of Asian influence, the EU is seen as a declining power on the world stage. Columbia Law professor Anu Bradford argues the opposite in her important new book *The Brussels Effect*: the EU remains an influential superpower that shapes the world in its image. By promulgating regulations that shape the international business environment, elevating standards worldwide, and leading to a notable Europeanization of many important aspects of global commerce, the EU has managed to shape policy in areas such as data privacy, consumer health and safety, environmental protection, antitrust, and online hate speech. And in contrast to how superpowers wield their global influence, the Brussels Effect - a phrase first coined by Bradford in 2012 - absolves the EU from playing a direct role in imposing standards, as market forces alone are often sufficient as multinational companies voluntarily extend the EU rule to govern their global operations. *The Brussels Effect* shows how the EU has acquired such power, why multinational companies use EU standards as global standards, and why the EU's role as the world's regulator is likely to outlive its gradual economic decline, extending the EU's influence long into the future.
