This entertaining Very Short Introduction reflects the enduring popularity of archaeology - a subject which appeals as a pastime, career, and academic discipline, encompasses the whole globe, and surveys 2.5 million years. From deserts to jungles, from deep caves to mountain tops, from pebble tools to satellite photographs, from excavation to abstract theory, archaeology interacts with nearly every other discipline in its attempts to reconstruct the past. In this new edition, Paul Bahn brings the text up to date, including information about new discoveries and interpretations in the field, and

highlighting the impact of developments such as the potential use of DNA and stable isotopes in teeth, as well the effect technology and science are having on archaeological exploration. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Some ethical theories tolerate or require aggregation -- a trade-off between benefits to a group of individuals and losses to another group of individuals. Since aggregation is an essential feature of utilitarianism, many critics of utilitarianism -- including John Rawls, Thomas Nagel, T. M. Scanlon, and others -- rule out aggregation from their proposed theories. However, critics encounter what has become known as the number problem--the problem that non-aggregative theories are insensitive to the number of people affected by actions even in the cases where the number of people is clearly relevant to what we ought to do. In this book, Iwao Hirose elucidates the theoretical nature of interpersonal and intra-personal aggregation and defends a form of aggregation, formal aggregation, as distinguished from substantive aggregation in utilitarianism. Substantive aggregation combines the morally relevant factors that are determined prior to, and independently of, aggregative process, and identifies the goal to be pursued. In contrast, formal aggregation represents the overall ethical judgment in terms of individuals' morally relevant factors and gives a structure to our ethical thinking. Hirose's view of formal aggregation is broader than substantive aggregation and avoids problems for utilitarianism. Furthermore, formal aggregation can satisfy the

demands of critics of the conventional understanding of aggregation, thus being more attractive than substantive aggregation and the unqualified rejection of aggregation. Hirose's analysis thus elucidates the far-reaching scope of aggregation and offers a new insight to one of the fundamental elements in ethical theory.

Generally referring to all forms of social coordination and patterns of rule, the term 'governance' is used in many different contexts. In this Very Short Introduction, Mark Bevir explores the main theories of governance and considers their impact on ideas of governance in the corporate, public, and global arenas.

Surveys the history of medicine from ancient times through the present day and speculates about future medical discoveries and innovative treatments.

The extra Calvinisticum, the doctrine that the eternal Son maintains his existence beyond the flesh both during his earthly ministry and perpetually, divided the Lutheran and Reformed traditions during the Reformation. This book explores the emergence and development of the extra Calvinisticum in the Reformed tradition by tracing its first exposition from Ulrich Zwingli to early Reformed orthodoxy. Rather than being an ancillary issue, the questions surrounding the extra Calvinisticum were a determinative factor in the differentiation of Magisterial Protestantism into rival confessions. Reformed theologians maintained this doctrine in order to preserve the integrity of both Christ's divine and human natures as the mediator between God and humanity. This rationale remained consistent across this period with increasing elaboration and sophistication to meet the challenges leveled against the doctrine in Lutheran polemics. The study begins with Zwingli's early use of the extra Calvinisticum in the Eucharistic

controversy with Martin Luther and especially as the alternative to Luther's doctrine of the ubiquity of Christ's human body. Over time, Reformed theologians, such as Peter Martyr Vermigli and Antoine de Chandieu, articulated the extra Calvinisticum with increasing rigor by incorporating conciliar christology, the church fathers, and scholastic methodology to address the polemical needs of engagement with Lutheranism. The *Flesh of the Word* illustrates the development of christological doctrine by Reformed theologians offering a coherent historical narrative of Reformed christology from its emergence into the period of confessionalization. The extra Calvinisticum was interconnected to broader concerns affecting concepts of the union of Christ's natures, the communication of attributes, and the understanding of heaven. This book predicts the decline of today's professions and describes the people and systems that will replace them. In an Internet society, according to Richard Susskind and Daniel Susskind, we will neither need nor want doctors, teachers, accountants, architects, the clergy, consultants, lawyers, and many others, to work as they did in the 20th century. The Future of the Professions explains how 'increasingly capable systems' - from telepresence to artificial intelligence - will

bring fundamental change in the way that the 'practical expertise' of specialists is made available in society. The authors challenge the 'grand bargain' - the arrangement that grants various monopolies to today's professionals. They argue that our current professions are antiquated, opaque and no longer affordable, and that the expertise of the best is enjoyed only by a few. In their place, they propose six new models for producing and distributing expertise in society. The book raises important practical and moral questions. In an era when machines can out-perform human beings at most tasks, what are the prospects for employment, who should own and control online expertise, and what tasks should be reserved exclusively for people? Based on the authors' in-depth research of more than ten professions, and illustrated by numerous examples from each, this is the first book to assess and question the relevance of the professions in the 21st century.

Most people think of the Oxford English Dictionary (OED) as a distinctly British product. Begun in England 150 years ago, it took more than 60 years to complete and, when it was finally finished in 1928, the British prime minister heralded it as a 'national treasure'. It maintained this image throughout the twentieth century, and in 2006 the English public voted it an 'Icon of England', alongside Marmite, Buckingham Palace and the bowler hat. However, this book shows that the dictionary is not as 'British' as we all thought. The linguist and lexicographer, Sarah Ogilvie, combines her insider knowledge and experience with impeccable research to show that the OED is in fact an international product in both its content and its making. She examines the policies and practices of the various editors, applies qualitative and quantitative analysis, and finds new OED archival materials in the form of letters, reports and proofs. She demonstrates that the OED, in its use of readers from all over the world and its coverage of World English, is in fact a global text.

INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates
“Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” —Melinda Gates
"Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than

our inherent biases." - Former U.S. President Barack Obama

Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts.

When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In *Factfulness*, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, *Factfulness* is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of

the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be.” Hans Rosling, February 2017.
