This collection of essays examines cultural and literary issues in nineteenth-century book production and circulation.

The Oxford Book of English Short Stories celebrates the excellences of the English short story. The thirty-seven stories featured here are selected from the nineteenth and twentieth centuries, by authors ranging from Dickens, Trollope, and Hardy to J. G. Ballard, Angela Carter, and Ian McEwan. They pack together comedy and tragedy, farce and delicacy, elegance and the grotesque, with language as various as the subject-matter.

This volume is the first major collection of essays to look at the literature of the entire Tudor period, from 1485-1603.

These decades were crucial in the formation of an English national literature. The writing produced in the years before 1580 has hitherto been neglected, however, despite its variety, inventiveness and the foundations and context it provides for the writing of the more familiar Elizabethan and early Jacobean periods. This volume redresses that neglect. Its forty-five chapters have been written by internationally-acknowledged experts in the field; they give insight into the energy and brilliance of sixteenth-century literature.

English Literature in the 1960s soon threw off its post-war weariness and the tepid influences of the previous decade.

New voices, new visions, and new commitments profoundly reshaped writing during the 60s, and throughout the rest of the century. Drama thrived on its rapidly rebuilt foundations. New freedoms of style and form revitalised fiction. Poetry, too, gradually recovered the variety and inventiveness of earlier years. As well as comprehensively charting these changes in the literary field, Randall Stevenson persuasively pinpoints their origins in the historical, social, and intellectual pressures of the times. Literary developments are revealingly related to the wider evolution and profound changes in English experience in the late twentieth-century to shadows of war and loss of empire; declining influences of class; shifting relations between the genders; emergent minority and counter-cultures; and the broadening

democratization of contemporary life in general. Analyses of the rise of literary theory, of publishing and the book trade, and of the pervasive influences of modernism and postmodernism contribute further to an impressively thorough, insightful description of writing in the later twentieth-century a literary period Stevenson shows to be far more imaginative and exciting than has yet been recognised. Lucid, accessible, and engaging, this volume of the Oxford English Literary History presents a unique illumination of its age - one we have lived through, but are only just beginning to understand. The first full account of its period, it will set the agenda for discussion of late twentieth-century literature for many years to come.

In 1953, William Golding was a provincial schoolteacher writing books on his breaks, lunch hours and holidays. His work had been rejected by every major publisher—until an editor at Faber and Faber pulled his manuscript off the rejection pile. This was to become *Lord of the Flies*, a book that would sell in the millions and bring Golding worldwide recognition. Golding went on to become one of the most popular and influential British authors to have emerged since World War II. He received the Booker Prize for the novel *Rites of Passage* in 1980, and the Nobel Prize for Literature in 1983. Stephen King has stated that the Castle Rock in *Lord of the Flies* continues to inspire him, so much so that he named his entertainment company after it and has placed the Golding novel prominently in his novels *Hearts in Atlantis* and *Cujo*. Golding has been called a British Vonnegut—disheveled and darkly humorous, perverse when it would have been easier to be bitter, bitter when it would have been easier to be lazy, sometimes more disturbing than he is palatable and above all fascinating beyond measure. Yet despite the fame and acclaim, the renowned author saw himself as a monster—a reclusive depressive ruled by his fears and a man who battled alcoholism throughout his life. In addition to being a schoolteacher, Golding was a scientist, a sailor and a poet before becoming a bestselling author, and his embitterment and alienation, his family, the women in his past, along with his experiences in the war, inform his work. This is the first book to unpack the life and character of a man whose entire oeuvre dealt with the conflict between light and dark in the human soul, tracing the defects of society back to the defects of human nature itself. Drawing almost entirely on materials that have never before been made public, John Carey sheds new light on Golding. Through his exclusive access to Golding's family, Carey uses hundreds of letters, unpublished works and Golding's intimate journals to draw a revelatory and definitive portrait. An acclaimed critic, Carey enriches crucially our appreciation of the literary work of Golding, bringing us, as the best literary biographies do, back to the books. And with equal parts lyricism and driving emotion, Carey brings to light a life that is extraordinary to the point of transcendent and a writer who trusted the imagination above all things.

Studying English Literature is a unique guide for undergraduates beginning to study the discipline of literature and those

who are thinking of doing so. Unlike books that provide a survey of literary history or non-subject specific manuals that offer rigid guidelines on how to write essays, *Studying English Literature* invites students to engage with the subject's history and theory whilst at the same time offering information about reading, researching and writing about literature within the context of a university. The book is practical yet not patronizing: for example, whilst the discussion of plagiarism provides clear guidelines on how not to commit this offence, it also considers the difficulties students experience finding their own 'voice' when writing and provokes reflection on the value of originality and the concepts of adaptation, appropriation and intertextuality in literature. Above all, the book prizes the idea of argument rather than insisting upon formulaic essay plans, and gives many ways of finding something to say as you read and when you write, in chapters on Reading, Argument, Essays, Sentences and References.

Who was the early twentieth-century masculine middlebrow reader? How did his reading choices respond to his environment? This book looks at British middlebrow writing and reading from the late Victorian period to the 1950s and examines the masculine reader and author, and how they challenged feminine middlebrow and literary modernism. This volume examines and theorizes the oft-ignored phenomenon of male-to-female (MTF) crossdressing in early modern drama, prose, and poetry, inviting MTF crossdressing episodes to take a fuller place alongside instances of female-to-male crossdressing and boy actors' crossdressing, which have long held the spotlight in early modern gender studies. The author argues that MTF crossdressing episodes are especially rich sources for socially-oriented readings of queer gender—that crossdressers' genders are constructed and represented in relation to romantic partners, communities, and broader social structures like marriage, economy, and sexuality. Further, she argues that these relational representations show that the crossdresser and his/her allies often benefit financially, socially, and erotically from his/her queer gender presentation, a corrective to the dominant idea that queer gender has always been associated with shame, containment, and correction. By attending to these relational and beneficial representations of MTF crossdressers in early modern literature, the volume helps to make a larger space for queer, genderqueer, male-bodied and queer-feminine representations in our conversations about early modern gender and sexuality.

This book analyzes how the urban disadvantaged in the city of New Delhi learn English. Using qualitative methods the author discusses the pedagogy, texts and contexts in which biliteracy occurs and links English language teaching and learning in India with the broader social and economic processes of globalization in a developing country. The study is situated in a government school, a site where classrooms have rarely been qualitatively described, and where the Three Language Formula (TLF) is being fundamentally transformed due to increasing demand from the community for earlier access to the linguistic capital of English. Through research conducted in a call centre the author also shows what the

requirements of new workplaces are and how government schools are trying to meet this demand.

Medieval English Literature is the first volume of the comprehensive Oxford Anthology of English Literature to be published in a second, expanded, and fully revised edition. It provides an authoritative and representative selection from the vast riches of Anglo-Saxon and Middle English literature of the period between AD 700 and AD 1500. The texts are presented either in full or in ample selections, helpfully and fully glossed and annotated according to the most recent scholarship. They are situated in their cultural context through general and particular introductions and through the carefully chosen illustrations, many of them new. Texts, annotations, introductions, and the bibliography have been thoroughly revised and brought up to date, and there is a full glossary of literary and historical terms. Anglo-Saxon poetry appears in modern verse translation. In addition to the whole of Beowulf (Edwin Morgan's translation), elegies, The Dream of the Rood, and The Battle of Maldon, there is a sampling of wisdom literature and of biblical epic made with particular reference to the situation of women in Anglo-Saxon society. The generous choice of Chaucer's poetry, in a lightly modernized, glossed text, now includes, as well as the General Prologue and the tales of the Miller, the Nun's Priest, the Wife of Bath (with her Prologue), the Franklin, and the Pardoner, an extract from The Legend of Good Women, and others from the Scottish Chaucerians Henryson and Dunbar. For romance, the whole of the third book of Chaucer's Troilus and Criseyde and the entire text of Sir Orfeo, both glossed, have been added to Sir Gawain and the Green Knight (revised translation by Keith Harrison). The selections from Malory's Morte Darthur have been augmented, as have the translated extracts from The Visions of Piers Plowman (with the account of the Harrowing of Hell). Modernized versions of the Chester Play of Noah and the Seven Deadly Sins episode from The Castle of Perseverance join the Second Shepherds' Play and Everyman in the Theater section. Ballads and lyric poetry have also been changed and amplified to link with a notable innovation: the section entitled Women's Writing and Women's Experience, an introduction to Middle English prose written by and for women.

This undergraduate textbook introduces English literature students to the application of linguistics to literary analysis. Art is basically a creation, which is the product of both the man and nature. Nature creates beautiful fleeting visitations like sunset, snowfall, gorgeous waterfalls, and strange creatures etc. So also, man creates art in imitation of Nature in the form of fine arts. Literature is rather later growth compare to painting and music in the history of mankind. Literature is an art of writing by means of words. It has a direct link with life and its realities. Literature is nothing but the reflection of life. It deals with human hopes, aspirations, joys, sorrows and conflicts. Nothing in the world comes so close to life as literature. In short, it holds mirror up to life and society. Men of literature constantly in touch with social movements and strive hard to reform and correct the social mistakes and failures. So literature acquires human significance as Homer,

Ovid, Cicero, Shakespeare, Milton, Carlyle, Tagore, Tolstoy, Rousseau and Voltaire did in the previous generations to solve the problems of their contemporary society. English literature has its unique identity in World's literature. It has acquired more significance during the colonial world. It has become the major discipline of the study at both graduate and post graduate level in almost all the Universities of Globe. Millions of students and teachers constantly read and teach History of English literature in Higher education all over the world. Here, an attempt has been made to simplify the History of English Literature, keeping in mind the receptive and conceptual ability of the students. There is a critical analysis and a microscopic observation of each writer and their contextual relevance of the text. The Book sheds a light on the developments of each genre from Chaucer to T.S Eliot. The stress is laid on major literary movements like Romanticism, Classicism and Realism from the beginning to the end and simplified the concepts. So the content of the book is prepared to appeal the critical ability of the students and their urge to understand it for aesthetic pleasure as well as for competitive examinations. No doubt the book will satisfy the quest of students in gaining the better understanding of the subject clearly at ease. In writing this book I have leaned more or less heavily on almost all the existed literary sources and I acknowledge all these writers and publishers for their explicit reference in the body of the text.

Wakelin uses new methods and theories in the history of reading to uncover fresh information about the design, ownership, and marginalia of books in a neglected period in English literary history. This is the first book to identify the origins of the humanist tradition in England in the 15th century.

This handbook of English Renaissance literature serves as a reference for both students and scholars, introducing recent debates and developments in early modern studies. Using new theoretical perspectives and methodological tools, the volume offers exemplary close readings of canonical and less well-known texts from all significant genres between c. 1480 and 1660. Its systematic chapters address questions about editing Renaissance texts, the role of translation, theatre and drama, life-writing, science, travel and migration, and women as writers, readers and patrons. The book will be of particular interest to those wishing to expand their knowledge of the early modern period beyond Shakespeare. This volume offers an introduction to British literature that challenges the traditional divide between eighteenth-century and Romantic studies. Contributors explore the development of literary genres and modes through a period of rapid change. They show how literature was shaped by historical factors including the development of the book trade, the rise of literary criticism and the expansion of commercial society and empire. The wide scope of the collection, juxtaposing canonical authors with those now gaining new attention from scholars, makes it essential reading for students of eighteenth-century literature and Romanticism.

Written by a team of more than 150 contributors working under the direction of Dinah Birch, and ranging in influence from

Homer to the Mahabharata, this guide provides the reader with a comprehensive coverage of all aspects of English literature.
