This is the second in a series of five volumes on the lexicon of Proto Oceanic, the ancestor of the Oceanic branch of the Austronesian language family. Each volume deals with a particular domain of culture and/or environment and consists of a collection of essays each of which presents and comments on lexical reconstructions of a particular semantic field within that domain. Volume 2 examines how Proto Oceanic speakers described their geophysical environment. An introductory chapter discusses linguistic and archaeological evidence that locates the Proto Oceanic language community in the Bismarck Archipelago in the late 2nd millennium BC. The next three

chapters investigate terms used to denote inland, coastal, reef and open sea environments, and meteorological phenomena. A further chapter examines the lexicon for features of the heavens and navigational techniques associated with the stars. How Proto Oceanic speakers talked about their environment is also described in three further chapters which treat property terms for describing inanimate objects, locational and directional terms, and terms related to the expression of time.

The basis of the film starring Orlando Bloom and Scott Eastwood, *The Outpost* is the heartbreaking and inspiring story of one of America's deadliest battles during the war in Afghanistan, acclaimed by critics everywhere as a classic. At 5:58 AM on October 3rd, 2009, Combat Outpost Keating, located in frighteningly vulnerable terrain in Afghanistan just 14 miles from the Pakistani border, was viciously attacked. Though the 53 Americans there prevailed against nearly 400 Taliban fighters, their casualties made it the deadliest fight of the war for the U.S. that year. Four months after the battle, a Pentagon review revealed that there was no reason for the troops at Keating to have been there in the first place. In *The Outpost*, Jake Tapper gives us the powerful saga of COP Keating, from its establishment to eventual destruction, introducing us to an unforgettable cast of soldiers and their families, and to a place and war that has remained profoundly distant to most Americans. A runaway bestseller, it makes a savage war real, and American courage manifest. "The Outpost is a mind-boggling, all-too-true story of heroism, hubris, failed strategy, and heartbreaking sacrifice. If you want to understand how the war in Afghanistan went off the rails, you need to read this book." -- Jon Krakauer

Five years in the writing by one of science fiction's most honored authors, *Doomsday Book* is a storytelling triumph. Connie Willis draws upon her understanding of the universalities of human nature to explore the ageless issues of evil, suffering and the indomitable will of the human spirit. For Kivrin, preparing an on-site study of one of the deadliest eras in humanity's history was as simple as receiving inoculations against the diseases of the fourteenth century and inventing an alibi for a woman traveling alone. For her instructors in the twenty-first century, it meant painstaking calculations and careful monitoring of the rendezvous location where Kivrin would be received. But a crisis strangely linking past and future strands Kivrin in a bygone age as her fellows try desperately to rescue her. In a time of superstition and fear, Kivrin—barely of age herself—finds she has become an unlikely angel of hope during one of history's darkest hours. Praise for *Doomsday Book* “A stunning novel that encompasses both suffering and hope. . . . The best work yet from one of science fiction’s best writers.”—The Denver Post “Splendid work—brutal, gripping and genuinely harrowing, the product of diligent research, fine writing and well-honed instincts, that should appeal far beyond the normal science-fiction constituency.”—Kirkus Reviews (starred review) “The world

of 1348 burns in the mind's eye, and every character alive that year is a fully recognized being. . . . It becomes possible to feel . . . that Connie Willis did, in fact, over the five years *Doomsday Book* took her to write, open a window to another world, and that she saw something there.”—The Washington Post Book World

In today's society, women - having entered the workplace in growing numbers worldwide - are increasingly expected to earn wages whilst still being primarily responsible for raising children. While all parents confront the tensions of this double burden, for lone mothers, the situation can be especially acute as there is no other adult to share responsibilities and no access to a male wage. The revealing essays in this volume address a range of the dilemmas lone mothers routinely face, whilst also distinguishing important situational differences, and considering other social perspectives. It asks: \* How can governments help without undermining their ability to enter the workforce? \* Should the state indefinitely support lone mothers? \* How should we measure the success of a policy? \* What roles do ethnicity, race, religion, class and

sexual orientation play? The impressive range of contributors to this volume speak from numerous contrasting perspectives. Here they study a variety of international settings such as Sri Lanka, the US, Germany, England and Norway, and in so doing, they allow the reader to draw powerful conclusions by comparing such issues and potential resolutions in varying countries and contexts. This book was previously published as a special issue of *Feminist Economics*.

*Pilgrimage, Landscape, and Identity: Reconstructing Sacred Geographies in Norway* explores the ritual geography of a pilgrimage system that arose around medieval saints in Norway, a country now being transformed by petroleum riches, neoliberalism, migration and global warming. What it means to be Norwegian and Christian in this changing context is constantly being renegotiated. The contemporary revival of pilgrimage to the burial site of St. Olav at Nidaros Cathedral in Trondheim is one site where this negotiation takes place. St. Olav played a major role in the unification of regions of Norway into a nation united by Christian law and faith, though most contemporary pilgrims have only a passing interest in the historical background of the pilgrimage. The pilgrimage network comprises a wide variety of participants: individuals, casual groups, guided group pilgrimages, activist pilgrims raising awareness for causes such as climate change and hospice services, as well as increasing numbers of local and foreign pilgrims of various ages, government officials, pilgrimage activists, and pilgrimage priests supplied by the Church of Norway (Lutheran). Part of the study focuses on the

Olavsfest, a cultural and music festival that engages the heritage of St. Olav and the Church of Norway through theater, music, lectures, and discussions, and theological and interreligious conversations. This festival offers an opportunity for creative and critical engagement with a difficult historical figure and his contested, violent heritage and constitutes one of the ways in which this pilgrimage network represents a critical Protestant tradition engaging a legacy through ritual creativity. This study maps how pilgrims, hosts, church officials, and government officials participate in reshaping narratives of landscape, sacrality, and pilgrimage as a symbol of life journey, nation, identity, Christianity, and Protestant reflections on the durability of medieval Catholic saints.

This book contributes to the international debate on Indigenous Peoples Law, containing both in-depth research of Scandinavian historical and legal contexts with respect to the Sami and demonstrating current stances in Sami Law research. In addition to chapters by well-known Scandinavian experts, the collection also comments on the legal situation in Norway, Sweden and Finland in relation to other jurisdictions and indigenous peoples, in particular with experiences and developments in Canada and New Zealand. The book displays the current research frontier among the Scandinavian countries, what the present-day issues are and how the nation states have responded so far to claims of Sami rights. The study sheds light on the contrasts between the three countries on the one hand, and between Scandinavia, Canada and New Zealand on the other, showing that although there are obvious differences, for instance related to colonisation and present legal solutions, there are also shared experiences among the indigenous peoples and the States. Filling a gap in an under-researched area of Sami rights, this book will be a valuable resource for academics, researchers and policy-makers with an interest in Indigenous Peoples Law and comparative research.

The Nordic agreement on admission to higher education aims to ensure that in all the Nordic countries applicants to higher education from another Nordic country should be considered for admission on the same or equivalent basis as local applicants. In 2014 the Nordic Institute of Studies in Innovation, Research and Education (NIFU) evaluated

the agreement. In the report the evaluators give a description and a mapping of Nordic student mobility in a European context, as well an evaluation how appropriate and effective the agreement is. It is concluded that the agreement and Nordic cooperation is largely taken for granted and that the agreement has both a practical and symbolic value for Nordic cooperation. For the future development four possible scenarios and a set of general recommendations are given.

From the squares of Spain to indigenous land in Canada, protest camps are a tactic used around the world. Since 2011 they have gained prominence in recent waves of contentious politics, deployed by movements with wide-ranging demands for social change. Through a series of international and interdisciplinary case studies from five continents, this topical collection is the first to focus on protest camps as unique organisational forms that transcend particular social movements' contexts. Whether erected in a park in Istanbul or a street in Mexico City, the significance of political encampments rests in their position as distinctive spaces where people come together to imagine alternative worlds and articulate contentious politics, often in confrontation with the state. Written by a wide range of experts in the field the book offers a critical understanding of current protest events and will help better understanding of new global forms of democracy in action.

This book is about an event in history that changed the world for all times. It is a sad story that did not have to be. What Africans and the indigenous Americans have given

to the world is a part of total humanity that must be respectfully considered in order to build a world where all people can walk in peace and dignity with their respective contributions accepted.
