The mention of Persian painting conjures up images of beautifully illuminated manuscripts filled with tiny, intricate pictures, each a miniature festival of color. Anyone who has seen Persian miniatures up close will attest to their captivating power. In this book, the renowned historian of Islamic art Oleg Grabar introduces Western audiences to Persian painting, which consists primarily of miniatures illustrating works of literature, but also includes murals and small ceramics decorated with pictures. The masterpieces of this painting have a visual richness that requires the use of the intellect as well as the eye for their appreciation, and Grabar seeks to situate the reader within their world, that of Islamic culture in Iran from the Middle Ages to Modern times. Through a series of chapters on various aspects of Persian painting, he helps us understand its history, the characteristics that define it, and the delights to be discovered in it. Grabar argues that this genre of painting offers a remarkable example of how books are illustrated in general and of how an Iranian secular taste emerged during centuries dominated by religious art. He shows that the peculiarities of its historical background gave rise to specific characteristics: striking colors, dematerialization of space, subtle evocations of emotions, simultaneous lyricism and epic. The qualities of Persian painting created a unique aesthetic mood that is related to Persian poetry and Islamic mysticism. It was only at the beginning of the twentieth century that the Western art world began to discover Persian painting. Inspired by its use of pure geometry and vivid palette, Matisse and Kandinsky were among the first modernists to incorporate attributes of Persian art into their work. And now, a century later, interest among museum-goers continues to increase. The allure of Persian painting lies in its absorbing complexities and in the surprising way it speaks to large questions about the nature of art and the perception of its masterpieces. Grabar has written an incomparable book that both explains and re-creates the pleasures of this art.

Using step-by-step demonstrations and a wide selection of paintings, the author examines the work and techniques of 28 eminent miniaturists. Each painting is reproduced actual size, with close-up details showing the methods and techniques used.

Trish has always been fascinated by miniature art and for years has had a yen to try and embroider smaller pieces, there is something so endearing about little paintings with all the detail and form of a larger piece, not to mention the fact that they are much quicker to stitch! When Trish sat down to consider ideas for this book, she wanted not only something that provided a good choice, with lots of projects, but also to ensure that each project was worthy of stitching. The designs needed to be fresh and appealing, to depict the pretty, romantic illustrations typical of the Victorian and post-Victorian eras. Teaching embroidery has helped Trish to understand the need for clarity in both the technique and project instructions, so instructions on everything about long and short stitch and how to adapt it to fit different situations and projects have been provided. Each project is accompanied by a detailed thread diagram which shows exactly which colour should be used and where. The small size of the designs allows for great flexibility in their final use - such as group framing, making up into cushions, book covers, quilt squares, needle cases, box lids, tote bags, pockets on clothing and so on. Following the portraits, birds and flowers, a section with much smaller Victorian pansies and buds, again with thread diagrams has been added.

From New York Times best-selling author of the *Dinotopia* series, James Gurney, comes a carefully crafted and researched study on color and light in paintings. This art instruction book will accompany the acclaimed *Imaginative Realism: How to Paint What Doesn't Exist*. Gurney cuts through the confusing and contradictory dogma about color, testing it in the light of science and observation. A glossary, pigment index, and bibliography complete what will ultimately become an indispensable tool for any artist. This book is the second

Not only does he eloquently describe all the effects of color and light an artist might encounter, but he thrills us with his striking paintings in the process." --Armand Cabrera, Artist
