This biannual conference in Pahang, Malaysia, is a clearing house for many of the latest research findings in a highly multidisciplinary field. The contributions span a host of academic disciplines which are themselves rapidly evolving, making this collection of 90 selected papers an invaluable snapshot of an arena of pure and applied science that produces many versatile innovations. The book covers a multitude of topics ranging from the sciences (pure and applied) to technology (computing and engineering), and on to social science disciplines such as business, education, and linguistics. The papers have been carefully chosen to represent the leading edge of the current research effort, and come from individuals and teams working right around the globe. They are a trusted point of reference for academicians and students intending to pursue higher-order research projects in relevant fields, and form a major contribution to the international exchange of ideas and strategies in the various technological and social science disciplines. It is the sheer scope of this volume that ensures its relevance in a scientific climate with a marked trend towards disciplinary synthesis.

This book provides an overview of the current state of Malaysia, looking at political and economic developments and at governance, and discussing the impact of ethnicity, patronage and the reform movement. Apart from discussing issues such as Islamisation and identity transformations within Malaysian society, it reviews policies like privatisation and provides an examination of business enterprise, exploring how control of 'corporate Malaysia' is interlinked with political developments. This study's primary focus is an analysis of why the reform movement failed to secure substantial support in the late 1990s even though many Malaysians then appeared ready to hold the government accountable for its poor record of a democratic and transparent form of governance. This volume also assesses the likelihood of change as a result of the retirement of Prime Minister Mahathir Mohamad

The second edition of this bestselling textbook retains its unique learning-by-doing approach to econometrics. Rather than relying on complex theoretical discussions and complicated mathematics, this book explains econometrics from a practical point of view by walking the student through real-life examples, step by step. Damodar Gujarati's clear, concise, writing style guides students from model formulation, to estimation and hypothesis-testing, through to post-estimation diagnostics. The basic statistics needed to follow the book are covered in an appendix, making the book a flexible and self-contained learning resource. The textbook is ideal for undergraduate students in economics, business, marketing, finance, operations research and related disciplines. It is also intended for students in MBA programs across the social sciences, and for researchers in business, government and research organizations who require econometrics. New to this Edition: - Two brand new chapters on Quantile Regression Modeling and Multivariate Regression Models. - Two further additional chapters on hierarchical linear regression models and bootstrapping are available on the book's website - New extended examples accompanied by real-life data - New student exercises at the end of each chapter

Measuring and managing the performance of a business is one of the most genuine desires of management. Balanced scorecard, the performance prism and activity-based management are the most popular frameworks in this setting. Based on the findings of R.G. Eccles' acclaimed "Performance Measurement Manifesto (1991)" this book introduces new contexts and themes of application and presents emerging research areas related to business performance measurement and management, e.g. SMEs and sustainability. As a result of the 1st International Summer School Piero Lunghi on "Perspectives of Business Performance Management" this book is written both for students and academics, as well as for practitioners looking for new, yet proven ways to measure and manage business performance.

It is said that the COVID-19 pandemic has turned back the poverty clock. As such, there is a need to have social mechanisms put in place to provide relief to those who are affected in this regard. Islamic social finance consists of tools and institutions that could be used to alleviate poverty. This book explores the impact of COVID-19 on Islamic finance to better understand the effectiveness of Islamic social finance in helping those who have been affected by poverty overnight due to the halt in all major economic activities in the context of the pandemic. Since the struggle against poverty in each country will be different, the book attempts to shed light on the experiences of different countries by presenting successful models of Islamic social finance. The book first looks at poverty and COVID-19 before delving into the role of Islamic social financial institutions and how they have risen against COVID-19. The book concludes by examining the impact of COVID-19 on Islamic microfinance. This book is the first of its kind on the subject of COVID-19, and it intends to bridge the gap in the literature.

Drawing on the latest scientific research, Jason Zweig shows what happens in your brain when you think about money and tells investors how to take practical, simple steps to avoid common mistakes and become more successful. What happens inside our brains when we think about money? Quite a lot, actually, and some of it isn't good for our financial health. In *Your Money and Your Brain*, Jason Zweig explains why smart people make stupid financial decisions—and what they can do to avoid these mistakes. Zweig, a veteran financial journalist, draws on the latest research in neuroeconomics, a fascinating new discipline that combines psychology, neuroscience, and economics to better understand financial decision making. He shows why we often misunderstand risk and why we tend to be overconfident about our investment decisions. *Your Money and Your Brain* offers some radical new insights into investing and shows investors how to take control of the battlefield between reason and emotion. *Your Money and Your Brain* is as entertaining as it is enlightening. In the course of his research, Zweig visited leading neuroscience laboratories and subjected himself to numerous experiments. He blends anecdotes from these experiences with stories about investing mistakes, including confessions of stupidity from some highly successful people. Then he draws lessons and offers original practical steps that investors can take to make wiser decisions. Anyone who has ever looked back on a financial decision and said, "How could I have been so stupid?" will benefit from reading this book.

The Golden Constant is a unique examination of how gold's purchasing power has remained consistent over the centuries. First published in 1977, this new edition has additional material to bring it up to date. The book is the only in-depth examination of how the purchasing power of gold has performed over the centuries in both England and the USA. It contains a thorough explanation of how the gold market evolved and how this is related to economic and political developments, from 1560 in England, and from 1800 in the USA, up to 2007. The book also contains detailed historical statistics on gold, wholesale and consumer prices and the real price of gold. This important book will be an essential resource for institutional and individual investors in the gold industry. Academics, economic historians and economists interested in monetary and financial history will find this book to be a fascinating read.
