Bread contains human knowledge: from knowledge concerning fertility of the land to farming methods harvesting, and seed processing, not to mention the different possibilities of consumption of cereals and the different ways in which they are cooked. In bread, we find all those components: the transformation of the natural landscape, technological and economic development which over the centuries have led to the building of a social organization, with a precise division and distribution of tasks and roles.

"The dictionary opens with a detailed description of how words are created by the Hawaiian Lexicon Committee with Pukui and Elbert's Hawaiian Dictionary serving as the primary written source and native speakers of Hawaiian as the primary spoken resource. The first main section contains more than 6,000 Hawaiian entries (alphabetized according to the Hawaiian alphabet) followed by their English equivalents; the second contains English language entries followed by their Hawaiian translation. Teachers and students in Hawaiian language immersion schools and high school, college, and continuing education language courses, as well as those looking for an introduction to contemporary Hawaiian, will find Mamaka Kaiā a truly invaluable resource."--BOOK JACKET.

The Hawaiian Dictionary, by Mary Kawena Pukui and Samuel H. Elbert, has for many years been the standard work of reference for the Hawaiian language. Based on frequency of usage and cultural importance, 0,800 entries, from the 00 from the revised and enlarged edition, have been selected for inclusion in the New Pocket Hawaiian Dictionary. In a compact and portable format, this dictionary updates scientific and common names of plants and animals; Hawaiian equivalents of given names; numbering and counting; practical phrases, and much more. The chapter on grammar, explained in nontechnical terms, includes a pronunciation guide. This convenient book will be appreciated by residents, visitors, and beginning students of Hawaiian alike.

Art, literature, music and other intellectual expressions of a particular society are together regarded as the culture of that society. Ideas, customs and social behaviour of a particular people or society are also its 'culture'. Contrary to what we think, it is not easy to describe 'culture', nor is it easy to write the cultural history. Writing the history of Bengali culture is even more difficult because Bengali society is truly plural in its nature, made even more so by its political division. The two main religious communities that share this culture are often more aware of the differences between them than the similarities. Nonetheless, the people remain bound by history and a shared language and literature. Ghulam Murshid's Bengali Culture over a Thousand Years is the first non-partisan and holistic discussion of Bengali culture. Written for the general reader, the language is simple and the style lucid. It shows how the individual ingredients of Bengali culture have evolved and found expression, in the context of political developments and how certain individuals have moulded culture. Above all, the book presents the identity and special qualities of Bengali culture. The book was originally published in Bengali in Dhaka in 2006. This is the first English translation.

Jiří Levý's seminal work, *The Art of Translation*, considered a timeless classic in Translation Studies, is now available in English. Having drawn on adjacent disciplines, the methodology of Czech functional sociosemiotic structuralism and the state-of-the-art in the West, Levý synthesized his findings and experience in the field presenting them in a reader-friendly book, which combines the approaches of a theoretician, systemic analyst, historian, critic, teacher, practitioner and populariser. Although focused on literary translation from theoretical, descriptive and historical perspectives, it presents a conceptualization of a general theory, addressing a number of issues discussed today. The 'practical' mission of the book as a theory extending to practice is based on the same historical-dialectic affinity of methods, norms, functions and values, accounting for the translator's agency and other contextual agents involved in the communication process. The book will be useful to translators, researchers, students and teachers in Translation and Literary Studies.

This six-volume collection draws together the most significant contributions to morphological theory and analysis which all serious students of morphology should be aware of. By comparing the stances taken by the different schools about the important issues, the reader will be able to judge the merits of each, with the benefit of evidence rather than prejudice.

Many requests have been made for the publication of these studies in book form. Much of this material has already appeared as articles in *The Way*. In the first section I discuss the distinction between the forms of consecrated life, following a classification which is also taken up by the Second Vatican Council in its decree *Perfectae Caritatis*. It is by distinguishing between these different ways of the Spirit, and by seeking to enter more deeply into them, that all who lead that life - whether they be monks or nuns, or religious dedicated to the apostolate of the priestly ministry or of charitable works, or those leading a consecrated life in the midst of the world - will gain a better understanding of their vocation and of their special mission in the Church. The second study is an attempt to express the profound meaning of the secular vocation proper to those institutes which were approved by Pope Pius XII in 1947, and of which the *Motu Proprio Primo Feliciter* laid down the essential characteristics. The third section is a discussion of the role of the priest in approved Secular Institutes. This has relevance today, when special questions arise concerning those Institutes whose secular character is less apparent, who live in community and are occupied in their own special works. In the opinion of many who follow the fully secular vocation, those Institutes would do better to revise their statutes or to choose another denomination - for example, that of Apostolic Institute or Society.

Sicilian Elements in Andrea Camilleri's Narrative Language examines Camilleri's unique linguistic repertoire and techniques over his career as a novelist. It focuses on the intensification of Sicilian linguistic features in Camilleri's narrative works, in particular features pertaining to the domains of sounds and grammar, since these have been marginalized in linguistic-centered research on the evolution of Camilleri's narrative language and remain overall understudied. Through a systematic comparative analysis of the distribution patterns of selected Sicilian features in a selection of Camilleri's historical novels and novels of the Montalbano series, the author identifies the individual features that have become most widespread and the lexical items that are targeted with highest frequency and consistency. The results of the analysis show that in the earlier novels, Sicilian features are rather sparse and can be attributed to linguistic situational functionality; that is, they function as indices of salient, distinctive aspects of topics, settings, events/situations, and characters. Conversely, in the latest novels, Sicilian elements pervade the entire novels and the texts are written almost entirely in Camilleri's own Sicilian, *vigatese*, so that Sicilian is stripped of any linguistic situational functionality.
