"... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called "zones," with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD."--Publisher's website.

A little red caboose thinks nobody cares for him until he prevents his train from slipping backwards down a mountain.

In 1862, having completed his medical studies in Europe, Julian Chisholm finds himself in Glasgow, penniless, but determined to return home and offer his skill as a surgeon to the cause of the Confederacy. Through a cynical, happy-go-lucky gambler he meets lovely Jane Anderson, widow of a Confederate army officer, who needs a husband badly if she is to return to Georgia to fight for her estates. She offers Julian the price of his passage if he will marry her, and he accepts, hoping that marriage will drive away his constantly recurring thoughts of beautiful, shameless Lucy Sprague who had rejected him three years before for an untrustworthy but wealthy Yankee senator. Once in the Confederacy, Julian plunges into the hazardous work of an army field surgeon as he tries to forget both Lucy and Jane, in whom his interest has deepened. On the bloody battlefields of Vicksburg and Chickamauga he performs delicate under-fire operations, oblivious of his personal safety and concerned only with the lives of the wounded under his knife. There are detailed and accurate descriptions of Julian at work, from the scene at the primitive base hospital where he saves an adolescent boy with a dangerous head injury to the night in a sumptuous mansion where he makes medical history when he removes an appendix as a cure for typhlitis. As we follow Julian through rapidly shifting scenes of action, Jane and Lucy again cross his path and disturb his loyalties. How he resolves his personal conflict and makes his final choice between love and duty is the climax of this dramatic story of a doctor in the Civil War.
