' Amid the current, protracted recession in Japan, new corporations — termed global excellent companies by the authors of this book — have been rising since the end of the 20th century. They are not yet in the spotlight but have a huge market share worldwide with regard to their specialized products and services. These corporations have climbed to the top of the global market while many other large Japanese companies have fallen into a slump. The authors highlighted their corporate policies and strategies for achieving high earnings — the secret of “producing something from nothing” and “enabling the lesser to win against the greater”. They have long focused on specific niches, improved the speed of their business undertaking, and effectively used information technology. The authors set out to study these companies and analyze their practices so as to gain insight into the way companies should be managed in the 21st century. The volatility of climate change is increasing. It is bad news, and many climatologists, policy analysts and environmental groups regard the West as the largest contributor to the problems caused by climate change. This book raises questions concerning the systemic and cultural reasons for Western countries' unwillingness to bear full responsibility for their carbon emissions. Is the Western paradigm failing? Can other cultures offer solutions? Are there alternatives for designing a better future? Just as the roots of the problem of climate change are cultural, the solution must be too. The contributors to Global Ethics on Climate Change explore cultural alternatives. This differs from conventional climate ethics, which tends to address the crisis with utilitarian, legalistic, and analytic tools. The authors in this volume doubt whether such paradigm patches will work. It may be time to think outside the box and consider non-Western insights about the good life, indigenous wisdom on being-in-the-world, and new ideas for civil evolution. This book is an examination of candidates for a Plan B. This book was

published as a special issue of the Journal of Global Ethics.

The Handbook of Anglophone World Literatures is the first globally comprehensive attempt to chart the rich field of world literatures in English. Part I navigates different usages of the term 'world literature' from an historical point of view. Part II discusses a range of theoretical and methodological approaches to world literature. This is also where the handbook's conceptualisation of 'Anglophone world literatures' – in the plural – is developed and interrogated in juxtaposition with proximate fields of inquiry such as postcolonialism, translation studies, memory studies and environmental humanities. Part III charts sociological approaches to Anglophone world literatures, considering their commodification, distribution, translation and canonisation on the international book market. Part IV, finally, is dedicated to the geographies of Anglophone world literatures and provides sample interpretations of literary texts written in English.

Although many firms label themselves 'global', very few can back this up with truly global sales and operations. In *The Regional Multinationals* Alan Rugman examines first-hand data from multinationals and finds that most multinationals are strongly regional, with international operations in their home regions of North America, the US or Asia. Only a tiny proportion of the world's top 500 companies actually sell the same product and deliver the same services around the world. Rugman exposes the facts behind the popular myths of doing business globally, explores a variety of regional models and offers an authoritative agenda for future business strategy. *The Regional Multinationals* is the essential resource for all academics and students in International Business, Organization and Strategic Management, as well as those with an interest in finding out how multinationals really work in practice and how future strategy must respond.

Asian countries are catching up with the West by transforming their primarily agrarian societies into industrial powerhouses. Manufacturing is driving innovation, productivity growth, and higher standards of living for billions of Asians. In the colonial past, the Asian production and supply chains served Western consumers. The world is now poised to evolve, led by a unified Asian business landscape capable of driving sustainable global growth within industries and markets. The Global Rise of Asian Transformation provides insights into the complex process of macro-political and economic dynamics reshaping the business landscape throughout Asia. This edited collection lays bare the megatrends that are challenging the region, including emerging consumers, urbanization, infrastructure, climate change, and energy megatrends that will further bolster the region's world standing if governments and businesses handle them adeptly. Case studies of major international companies, such as Sony, Lenovo, and Tata Motors, are also included.

This collection of critical essays investigates the intersections of the global and local in literature and language. Exploring the connections that exist between global forms of knowledge and their local, regional applications, this volume explores multiple ways in which literature is influenced, and in turn, influences, movements and events across the world and how these are articulated in various genres of world literature, including the resultant challenges to translation. This book also explores the way in which languages, especially English, transform and continue to be reinvented in its use across the world. Using perspectives from sociolinguistics, discourse analysis and semiotics, this volume focuses on diasporic literature, travel literature, and literature in translation from different parts of the world to study the ways in which languages change and grow as they are sought to be 'owned' by the communities which use them in different contexts. Emphasizing on interdisciplinary studies and methodologies, this collection centralizes both research that theorizes the links between the local and the global and that which shows, through practical evidence, how the local and global interact in new and challenging ways.

- Demonstrates the continuing global “turn” in Early Modern Studies through original essays exploring interconnected exchanges, transactions, and encounters
- Provides significantly expanded coverage of global interactions involving England, European powers such as Portugal, Spain, and The Netherlands, Eastern empires such as Japan, and the Ottoman, Safavid, and Mughal empires

- Explores an array of new subjects, including an exceptional woman traveler in Eurasia, the Jesuit presence in Mughal India and sixteenth-century Japan, the influence of Mughal art on an Amsterdam painter-cum-poet, the cultural impact of Eastern trade on plays and entertainments in early modern London, Safavid cultural disseminations, English and Portuguese slaving practices, the global contexts of English pattern poetry, and global lyric transmissions across cultures

A wide-ranging account of the global expansions and interactions of the period, *A Companion to the Global Renaissance: Literature and Culture in the Era of Expansion, 1500–1700, Second Edition* remains essential reading for early modern scholars and students ranging from undergraduate and graduate students to more advanced scholars and specialists in the field.

Twenty-one authors from a variety of backgrounds analyse the global competitiveness of the Asian firm in different parts of the world and at different phases of their internationalisation process. They find that the Asian firms' emphasis on 'soft' skills such as networking, organisational learning and sharing stands in sharp contrast to the economic rationality of Western firms, which stress individual performance measurement, clearly defined responsibilities and accountability. Asian firms face serious problems in adjusting their systems to the Western environment without losing their competitiveness.

Global and Culturally Diverse Leaders and Leadership explores diverse cultural leadership styles and paradigms that are dynamic, complex, globally authentic and culturally competent for the 21st century. An outstanding group of scholars considers how the different worldviews and lived experiences of leaders influence their leadership styles. They discuss several dimensions, models and initiatives for examining leadership in a global and diverse world, ultimately offering ways in which these leadership processes may be assessed and cultivated in a culturally sensitive and ecologically valid manner. Redefining leadership as global and diverse, this book imparts a new understanding of the criteria for selecting, training and evaluating leaders in the 21st century.

In recent years, historians across the world have become increasingly interested in transnational and global approaches to the past. However, the debates surrounding this new border-crossing movement have remained limited in scope as theoretical exchanges on the tasks, responsibilities and potentials of global history have been largely confined to national or regional academic communities. In this groundbreaking book, Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows, sociologies of knowledge and hierarchies that are an intrinsic part of historical practice. Taking the United States, Germany and China as his main case studies, he reflects upon the character of different approaches to global history as well as their social, political and cultural contexts. He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue, cooperation and exchange.

The Future of the World is devoted to the intriguing field of study which emerged after World War Two, futurism or futurology. Jenny Andersson explains how futurist scholars and researchers imagined the Cold War and post Cold War world and the tools and methods they would use to influence and change that world. Futurists were a motley crew of Cold War warriors, nuclear scientists, journalists, and peace activists. Some argued it should be a closed sphere of science defined by delimited probabilities. They were challenged by alternative notions of the future as a potentially open realm.

Futurism also drew on an eclectic range of repertoires, some of which were deduced from positivist social science, mathematics, and nuclear physics, and some of which sprung from alternative forms of knowledge in science fiction, journalism, or religion. These different forms of prediction laid very different claims to how accurately futures could be known, and what kind of control could be exerted over what was yet to come. The Future of the World carefully examines these different engagements with the

future, and inscribes them in the intellectual history of the post war period. Using unexplored archival collections, *The Future of the World* reconstructs the Cold War networks of futurologists and futurists.

The Fairy Tale World is a definitive volume on this ever-evolving field. The book draws on recent critical attention, contesting romantic ideas about timeless tales of good and evil, and arguing that fairy tales are culturally astute narratives that reflect the historical and material circumstances of the societies in which they are produced. *The Fairy Tale World* takes a uniquely global perspective and broadens the international, cultural, and critical scope of fairy-tale studies. Throughout the five parts, the volume challenges the previously Eurocentric focus of fairy-tale studies, with contributors looking at: • the contrast between traditional, canonical fairy tales and more modern reinterpretations; • responses to the fairy tale around the world, including works from every continent; • applications of the fairy tale in diverse media, from oral tradition to the commercialized films of Hollywood and Bollywood; • debates concerning the global and local ownership of fairy tales, and the impact the digital age and an exponentially globalized world have on traditional narratives; • the fairy tale as told through art, dance, theatre, fan fiction, and film. This volume brings together a selection of the most respected voices in the field, offering ground-breaking analysis of the fairy tale in relation to ethnicity, colonialism, feminism, disability, sexuality, the environment, and class. An indispensable resource for students and scholars alike, *The Fairy Tale World* seeks to discover how such a traditional area of literature has remained so enduringly relevant in the modern world.

Literary History: Towards a Global Perspective is a research project funded by the Swedish Research Council (Vetenskapsrådet). Initiated in 1996 and launched in 1999, it aims at finding suitable methods and approaches for studying and analysing literature globally, emphasizing the comparative and intercultural aspect. Even though we nowadays have fast and easy access to any kind of information on literature and literary history, we encounter, more than ever, the difficulty of finding a credible overall perspective on world literary history. Until today, literary cultures and traditions have usually been studied separately, each field using its own principles and methods. Even the conceptual basis itself varies from section to section and the genre concepts employed are not mutually compatible. As a consequence, it is very difficult, if not impossible, for the interested layperson as well as for the professional student, to gain a clear and fair perspective both on the literary traditions of other peoples and on one's own traditions. The project can be considered as a contribution to gradually removing this problem and helping to gain a better understanding of literature and literary history by means of a concerted empirical research and deeper conceptual reflection. The contributions to the four volumes are written in English by specialists from a large number of disciplines, primarily from the fields of comparative literature, Oriental studies

and African studies in Sweden. All of the literary texts discussed in the articles are in the original language. Each one of the four volumes is devoted to a special research topic.

Abstract: Rationalization and stabilization following the Asian financial crisis of the late 1990s combined with the expansion and liberalization of regional and global trade to create significant parts industries in China, Indonesia, and the Republic of Korea. Conventional policies of stabilization and liberalization, however, cannot fully explain growth patterns. Japan and Korea grew into major players before liberalizing trade and investment, while even after extensive liberalization Indonesia has yet to move from extensive to intensive growth. These anomalies suggest that to explain success in the auto parts industry we need to move beyond liberalization to look at policies and institutions promoting economies of scale, skill formation, quality upgrading, supplier-linkage cooperation, and innovation. In Japan, the regional and global leader, innovative assemblers led industrial development and supported key suppliers, but the government also supported diffusion of quality control techniques and new technology to small and medium enterprises, and encouraged stable employment among core employees. Korea remains weaker on both small and medium enterprise and employment fronts, but government-encouraged consolidation around a small number of business groups, an extended period of protection, and support for export promotion led to economies of scale. Liberalization of foreign investment after the financial crisis helped ameliorate the excessive statism of earlier policies and strengthened the parts industry. In China, liberalization for WTO entry, rapid expansion in demand, and strong support by local governments encouraged a wave of foreign investment in both assembly and parts. In contrast, institutional weaknesses continue to constrain development opportunities in Indonesia.
