From the author of *The Hundred Lies of Lizzie Lovett* and *As You Wish* comes the unforgettable story of the one small town's biggest hoax and the two brothers who started it all. This is the absolutely true account of how Lansburg, Pennsylvania was invaded by aliens and the weeks of chaos that followed. There were sightings of UFOs, close encounters, and even abductions. There were believers, Truth Seekers, and, above all, people who looked to the sky and hoped for more. Only...there were no aliens. Gideon Hofstadt knows what really happened. When one of his science experiments went wrong, he and his older brother blamed the resulting explosion on extraterrestrial activity. And their lie was not only believed by their town—it was embraced. As the brothers go to increasingly greater lengths to keep up the ruse and avoid getting caught, the hoax flourishes. But Gideon's obsession with their tale threatened his whole world. Can he find a way to banish the aliens before Lansburg, and his life, are changed forever? Told in a report format and comprised of interviews, blog posts, text conversations, found documents, and so much more, *It Came from the Sky* is a hysterical and resonant novel about what it means to be human in the face of the unknown. Sedoti: The Hundred Lies of Lizzie Lovett As You Wish Praise for Chelsea Sedoti: "Depending on the reader, this novel offers different levels of intensity, starting with the everyday sort of teen troubles, progressing to difficult family dynamics, and reaching up to the ethical dilemmas wishing can create—all while being easy to read and hard to put down."—VOYA, STARRED Review for As You Wish "Heartbreaking, other times hilarious, but always thought-provoking. An unexpectedly affecting book that will have readers pondering what they would wish for if given the chance."—Booklist for As You Wish "Resonant and memorable."—Publishers Weekly for The Hundred Lies of Lizzie Lovett "Wildly creative."—School Library Journal for The Hundred Lies of Lizzie Lovett

Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host economies. Among the cases presented are the global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

Fund Custody and Administration provides an overall perspective of investment funds without limiting its analysis to specific fund structures, as other books do. Since governance and oversight of investment funds are now major regulatory requirements, administrators and custodians must place greater emphasis on the custody and safekeeping of fund assets, on the independent and robust valuation of the assets, and on collateral management. By focusing on both the asset transactions made by the investment manager for the portfolio and on the transactions in the shares or units of the fund itself, it gives readers insights about the essential elements of investment fund management and administration, regardless of their geographical backgrounds. Explores the key stages in the investment process, from setting up a fund through its launch and operation Explains the roles of participants as well as the ways regulation affects the fund and its operation Describes the work flow associated with custody and administration procedures and processes Defines the role of compliance and risk management in the context of the fund and also how compliance requirements apply to custodians and administrators

"The best explanation that I have seen of corrosion on boats."—Nigel Calder, author of Boatowner's Mechanical and Electrical Manual "A powerful weapon in the war against metal deterioration."—Cruising World Corrosion is a constant, often expensive, and sometimes dangerous problem for boaters. Moisture, salt, electrical currents, and chemicals create a potent combination that can attack the metallic (and sometimes nonmetallic) parts of your boat. Everett Collier, an expert in marine technology, details all the types of corrosion—including simple galvanic, electrochemical, and electrolytic—and explains how to identify, combat, and prevent them. The most comprehensive book on this subject, The Boatowner's Guide to Corrosion shows you how to: Prevent corrosion with proper

grounding, cathodic protection, protective coatings, and careful selection and matching of metal parts Protect your boat's hull, deck gear, masts, and rigging, as well as its propulsion, electrical, plumbing, and steering systems Recognize and cure developing corrosion before it can damage your boat

Reprint of the official service manual for Yanmar marine diesel engines D27A and D36A.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, Nada, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'

Michael Marston and Annette Marston were married for many years and had two adult children, Lauren and Bruce. Annette developed diabetes and ultimately required a kidney transplant to survive. In the middle of one night, Michael received a telephone call that a kidney had arrived for Annette at Midlantic Suburban Hospital. The family rushed to the hospital only to meet Dr. Chung Zhou who they never met before. Dr. Zhou performed the transplant surgery. When Annette died from the transplant, Michael

vowed to find out everything that happened. The FBI and CIA become involved. As the CIA agents investigated abroad they found that murder was part of a world wide conspiracy.

In his latest book, Calder walks the reader through the repair, maintenance, and setting up of the boat's primary systems, including the electrical system, electronics equipment, generator sets, solar panels, wind and water generators, the engine, transmission, pumps, steering, waste disposal systems, and more. Destined to become a highly trusted companion aboard all types of boats for years to come.

Design and Simulation of Two-Stroke Engines is a unique hands-on information source. The author, having designed and developed many two-stroke engines, offers practical and empirical assistance to the engine designer on many topics ranging from porting layout, to combustion chamber profile, to tuned exhaust pipes. The information presented extends from the most fundamental theory to pragmatic design, development, and experimental testing issues.

An adventure story set against the backdrop of a son trying to understand his father After a 25-year break from boating, Brian Harvey circumnavigates Vancouver Island with his wife, his dog, and a box of documents that surfaced after his father's death. John Harvey was a neurosurgeon, violinist, and photographer who answered his door a decade into retirement to find a sheriff with a summons. It was a malpractice suit, and it did not go well. Dr. Harvey never got over it. The box contained every nurse's record, doctor's report, trial transcript, and expert testimony related to the case. Only Brian's father had read it all — until now. In this beautifully written memoir, Brian Harvey shares how after two months of voyaging with his father's ghost, he finally finds out what happened in the O.R. that crucial night and why Dr. Harvey felt compelled to fight the excruciating accusations.
