Avalanches Patricia Morgan,2021-06-10 After a ski weekend in California's eastern Sierra Mountains, 25-year-old entrepreneur Monica Larsen takes off in her new plane for Southern California. But she gets lost in a freak snowstorm and she crashes into the wintry landscape. Three days later, a wounded and dazed Monica wanders into a local lodge. She tells the story of being saved by a man named Buddy Wilton. Only, Buddy has been missing for three years. He has always wondered about the suspicious circumstances of Buddy's disappearance-and he is fascinated by the strength and courage of this beautiful woman. As Buck untangles the mysteries of his family, Monica begins to understand her own tale of survival. The answers bring them together-but also threaten to drive them apart.

Language Down the Garden Path Montserrat Sanz, Itziar Laka, Michael K. Tanenhaus, 2013-08-30 Thomas G. Bever's now iconic sentence, 'The horse raced past the barn fell', first appeared in his 1970 paper 'The Cognitive Basis of Linguistic Structures'. This 'garden path sentence', so-called because of the way it leads the reader or listener down the wrong parsing path, helped spawn the entire subfield of sentence processing. It has become the most often quoted element of a paper which spanned a wealth of research into the relationship between the grammatical system and language processing. *Language Down the Garden Path* traces the lines of research that grew out of Bever's classic paper. Leading scientists review over 40 years of debates on the factors at play in language comprehension, production, and acquisition (the role of prediction, grammar, working memory, prosody, abstractness, syntax, and semantics mapping); the current status of universals and narrow syntax; and virtually every topic relevant in psycholinguistics since 1970. Written in an accessible and engaging style, the book will appeal to all those interested in understanding the questions that shaped, and are still shaping, this field and the ways in which linguists, cognitive scientists, psychologists, and neuroscientists are seeking to answer them.

The Theory and Practice of Grading Writing Frances Zak, Christopher C. Weaver, 1998-02-05 CHOICE 1998 Outstanding Academic Books Grading is one of the thorniest issues writing teachers must deal with, yet, surprisingly little has been written on this topic. As writing teachers move increasingly toward practices that focus on writing as a process, they face a growing need to reconsider their systems of grading to determine whether or not these systems support their pedagogies. The authors interrogate the grading of individual papers as well as portfolios and the assigning of end-of-term grades. This collection explores the issues and problems that have emerged as conventional grading practices have lagged behind and been challenged by new theories of language. While the book will be of interest to theorists, Zak and Weaver have also made the book relevant and useful to teachers whose primary interest is the practical consequences of theory in

their classrooms. Where theoretical discussion takes place, the language is clear and accessible. Many of the authors write directly from personal experience, telling stories of the classroom or writing of new techniques and approaches they have tried. They speak with the voices of teachers, and the tone and content of their words convey a sense of the immediacy of the topic.

Language Development In Exceptional Circumstances Dorothy Bishop, K. Mogford, 2013-04-15 Ever since attempts were made to describe and explain normal language development, references to exceptional circumstances have been made. Variations in the conditions under which language is acquired can be regarded as natural experiments, which would not be feasible or ethical under normal circumstances. This can throw light on such questions as: *What language input is necessary for the child to learn language? *What is the relationship between cognition and language? *How independent are different components of language function? *Are there critical periods for language development? *Can we specify necessary and sufficient conditions for language impairment? This book covers a range of exceptional circumstances including: extreme deprivation, twinship, visual and auditory impairments, autism and focal brain damage? Written in a jargon-free style, and including a glossary of linguistic and medical terminology, the book assumes little specialist knowledge. This text is suitable for both students and practitioners in the fields of psycholinguistics, developmental and educational psychology, speech pathology, paediatrics and special education.

Latinos in a Changing Society Edwin Meléndez, Martha Montero-Sieburth, 2007-02-28 Given the importance of Latino issues in the current social and economic times, the publication of *Latinos in a Changing Society* is both timely and prescient in its contributions to the current discourse of how Latinos are being influenced by U.S. norms and culture and how Latinos are also affecting U.S. society. This volume contributes to our need for comprehensive analysis of how Latin communities compare and contrast with other underserved groups. It also examines how changes are taking place within specific Latino groups particularly between first and second generation Cubans, returning Puerto Ricans, Dominican poverty, and emergent Mexican leaders in the New England area. The opportunities that Latinos and dominant mainstream interests share are identified in this volume, but so are the many areas in need of change. In this current atmosphere of anger and suspicion toward immigrants, this volume presents an analytical perspective that is too often absent from politically motivated debates

about Latinos and their role in a changing society. Undocumented immigrants are often portrayed as people who come to this country to take advantage of a generous welfare system contributing little to the economic and social development of the country. This volume critically examines issues such as the Latino commitment to labor participation, the ways that Latino parents engage in schools and in their communities, health access and social programs, the policing concerns within the Latino community, the academic adjustments made by Latino college students as well as the educational opportunities that exist for Latinos across the country. Unlike publications that seek to summarize knowledge about the Latino population in the United States, *Latinos in a Changing Society* provides a broader range of insights into the types of policy analysis, research, and public consciousness needed to advance the educational, social, cultural, and political participation and incorporation of Latinos in the new century. This volume critically examines such issues as the disparity in poverty among Latino groups, the lack of access to health services, the Latino commitment to labor participation, the ways that Latino parents engage in schools and in their communities, and the educational dropout rates of Latinos across the country and the underlying causes of those rates. Unlike publications that seek to summarize knowledge about the Latino population in the United States, *Latinos in a Changing Society* provides a broader range of insights into the types of policy analysis, research, and public consciousness needed to advance the educational, social, cultural, and political participation and incorporation of Latinos in the new century.

New Poverty Studies Judith G. Goode, Jeff Maskovsky, 2001 Stock market euphoria and blind faith in the post cold war economy have driven the topic of poverty from popular and scholarly discussion in the United States. At the same time the gap between the rich and poor has never been wider. The *New Poverty Studies* critically examines the new war against the poor that has accompanied the rise of the New Economy in the past two decades, and details the myriad ways poor people have struggled against it. The essays collected here explore how global, national, and local structures of power produce poverty and affect the material well-being, social relations and politicization of the poor. In updating the 1960s encounter between ethnography and U.S. poverty, *The New Poverty Studies* highlights the ways poverty is constructed across multiple scales and multiple axes of difference. Questioning the common wisdom that poverty persists because of the pathology, social isolation and welfare state dependency of the poor, the contributors to *The New Poverty Studies* point instead to economic restructuring and neoliberal policy reforms which have caused increased social inequality and economic polarization in the U.S. Contributors include: Georges Fouron, Donna Goldstein, Judith Goode, Susan B. Hyatt, Catherine Kingfisher, Peter Kwong, Vin Lyon-Callo, Jeff Maskovsky, Sandi Morgen, Leith Mullings, Frances Fox Piven, Matthew Rubin, Nina Glick Schiller, Carol Stack, Jill Weigt, Eve Weinbaum, Brett Williams, and Patricia Zavella. These contributions provide a dynamic understanding of poverty and immiseration —*North American Dialogue*, Vol. 4, No. 1, Nov. 2001
