“You can’t have depths without surfaces,” says Linda Grant in her lively and provocative new book, *The thoughtful Dresser*, a thinking woman’s guide to what we wear. For centuries, an interest in clothes has been dismissed as the trivial pursuit of vain, empty-headed women. Yet, clothes matter, whether you are interested in fashion or not, because how we choose to dress defines who we are. How we look and what we wear tells a story. Some stories are simple, like the teenager trying to fit in, or the woman turning fifty renouncing invisibility. Some are profound, like that of the immigrant who arrives in a new country and works to blend in by changing the way she dresses, or of the woman whose hat saved her life in Nazi Germany. *The Thoughtful Dresser* celebrates the pleasure of adornment and is an elegant meditation on our relationship with what we wear and the significance of clothes as the most intimate but also public expressions of our identity.

Since the first edition of *Metric Pattern Cutting* was published in 1975 to provide a straightforward introduction to flat pattern cutting, it has become the established textbook on the subject. The fourth edition continues to offer an introduction to the basic principles of pattern cutting, with a range of good basic blocks and examples of their application to garments. The original blocks and many of the pattern adaptations have therefore been retained. However, the great expansion of casual wear, cut in jersey or stretch fabrics, has led to the growth of ‘flat cutting’ with no darting to create the shape and this edition devotes a whole section to this type of cutting. The sections on computer-aided design and grading have been updated. The size charts of body measurements have been revised, reflecting the changing shape of women’s bodies. The term ‘tailored’ has changed as methods of manufacture and the retailing of clothes have evolved. This book demonstrates the wide range of cutting methods used to produce garments which are described as ‘tailored’ jackets. Although the main focus is on modern methods of producing clothing, a rich and complex cutting tradition is acknowledged and used. It is hoped that the modern garment designer will be inspired to rediscover methods that retain their validity today. The different approaches to ‘tailored’ cutting are described under three headings: bespoke cutting, engineered cutting and style cutting. The rich heritage of the latter came from the tremendous creativity that was unleashed by women’s emancipation at the beginning of the twentieth century and the merging of tailored styles with fashionable clothing. The section on style cutting has therefore derived some of the cutting techniques from that period, thus demonstrating how they can be applied to current methods of production.

Basée sur les procédés mis en place à la naissance du prêt-à-porter par Alexis Lavigne, en 1841, cette méthode de coupe pour la lingerie

féminine pose les bases de l'enseignement de l'école Esmod dans ce secteur. Axée sur l'élaboration à plat d'un tracé du corps de la femme sur lequel le modéliste extrapole le volume du vêtement à créer, cette méthode peut ainsi traverser les modes et surtout s'adapter à l'évolution des tailles et des conformations de façon universelle. Méthode simple, claire, logique et précise, elle s'adresse beaucoup moins à la mémoire qu'au raisonnement en utilisant une technique rationnelle par tracé, appelée "coupe à plat" qui donne des formules clefs, valables pour toutes les modes et permet de construire tout le vestiaire de la lingerie féminine (Soutien-gorges, culottes, slips, strings, corsets, bustiers, guêpières,...), à transformer dans tous les secteurs (classiques et intemporels, mode, luxe, sport,...). A la fois un ouvrage d'initiation et un document de référence sur les techniques de modélisme de la lingerie féminine.

Major changes have occurred in the last few years in the methods of cutting and manufacturing outerwear. Light clothing companies are now manufacturing these heavy garments because of the development of fusible interlinings and new manufacturing techniques which have resulted in the deskilling of traditional tailoring methods. Outerwear has consequently assumed much greater importance in light clothing courses and this book - the first of its kind - has been written to reflect these industrial changes. It offers a course of practical and theoretical study which is related to specific garment types and fabrics. An essential manual for students at every level. Suitable for use in CGLI, BTEC and degree courses, this uniquely comprehensive work is certain to become a standard textbook on its subject.

This fourth edition of Metric Pattern Cutting for Children's Wear and Babywear remains the standard text book but has three major improvements. First, the sections have been re-organised to reflect changes in producing and marketing

children's clothes. Today's popularity of easy-fitting styles and knitted fabrics means that basic 'flat' pattern cutting is used to construct the majority of children's wear and babywear and this type of cutting is therefore emphasised in this new edition. Shaped blocks and garments, cut to fit the body form, are still included, and are placed in chapters covering some school uniform garments or more expensive fashion or formal clothes. The book now clearly separates the sections useful to student beginners (Parts One, Two and Three), and also offers more advanced or specialist sections for students who wish to pursue a career in children's wear or for designers working in the different manufacturing sectors of the trade. The second change in this fourth edition is the introduction of colour coding to the sections; this makes it easier to identify specific processes in the book and enhances the illustrations. Finally, the size charts have been revised to reflect the changes in body sizing. The clear division of the boys' and girls' measurements in the charts has been in response to the way clothes are marketed and to co-ordinate with European size charts. 'Plus' charts for heavier children have also been added.

This unique book contains a full range of blocks and patterns to cope with all aspects of lingerie, beachwear and leisurewear.
