At the request of the Government of Liberia (GoL), the IMF Fiscal Affairs Department (FAD) led an external assessment of the central government's public financial management (PFM) systems based on the Public Expenditure and Financial Accountability (PEFA) methodology. The assessment was undertaken in close collaboration with the Ministry of Finance's (MoF) PFM Reform Coordination Unit (RCU), with the participation of staff of the African Development Bank and the World Bank, and with financial support from the European Union and Sida. The assessment examines progress since the PEFA assessment of 2007 and provides a renewed baseline for monitoring progress in PFM reform and for supporting the GoL in refining, where necessary, the current PFM reform strategy. The assessment snapshot date was April 23, 2012. The report was reviewed by the GoL, the PEFA Secretariat, a donor reference group, and FAD, the latter being at the same time responsible for quality assurance.

This key resource is often referred to as the "Green Book". Federal policymakers and program managers are continually seeking ways to better achieve agencies' missions and program results, in other words, they are seeking ways to improve accountability. A key factor in helping achieve such outcomes and minimize operational problems is to implement appropriate internal control. Effective internal control also helps in managing change to cope with shifting environments and evolving demands and priorities. As programs change and as agencies strive

to improve operational processes and implement new technological developments, management must continually assess and evaluate its internal control to assure that the control activities being used are effective and updated when necessary. The Federal Managers' Financial Integrity Act of 1982 (FMFIA) requires the General Accounting Office (GAO) to issue standards for internal control in government. The standards provide the overall framework for establishing and maintaining internal control and for identifying and addressing major performance and management challenges, and areas at greatest risk of fraud, waste, abuse and mismanagement. This report explores the Five Standards for Internal Control as identified by GAO for policymakers and program managers: - Control Environment - Risk Assessment - Control Activities - Information and Communications - Monitoring These standards apply to all aspects of an agency's operations: programmatic, financial, and compliance. However, they are not intended to limit or interfere with duly granted authority related to developing legislation, rule-making, or other discretionary policy-making in an agency. These standards provide a general framework. In implementing these standards, management is responsible for developing the detailed policies, procedures, and practices to fit their agency's operations and to ensure that they are built into and an integral part of operations. A how-to guide to small business anti-fraud protection and internal control Internal Control/Anti-Fraud Program Design for the Small Business is a practical guide to protection for businesses NOT subject to the Sarbanes-Oxley Act. Written by an expert with three decades of forensic investigation experience, this book is geared specifically toward private, non-public small businesses and their unique needs in the realm of fraud protection. Covering all elements of an internal control structure applicable to the small business community, this guide provides a step-by-step roadmap for designing and implementing an effective, efficient internal control structure/anti-fraud program tailored to your business's particular needs. Case studies are used throughout to illustrate internal control weaknesses and the fraud that can result, and follow-up analysis describes the controls that would have reduced the probability of fraud had they been in place. You'll learn how to analyze your company's internal control issues, and implement a robust system for fraud prevention. Guidance toward Sarbanes-Oxley compliance is readily available, but there is little information available for the many businesses not subject to the act —until now. This book is the step-by-step guide for instituting an internal control program tailored to your small business. Understand the five elements of internal control Avoid gaps in protection with relevant controls Design the ultimate anti-fraud program Implement internal control tailored to your needs The majority of small business owners simply do not know the elements of or implementation process involved in internal control, and Sarbanes-Oxley guidelines don't necessarily scale down. Internal Control/Anti-Fraud Program Design for the Small Business helps you design and install the internal control/anti-fraud protection your business needs.

"The purpose of this chapter is to provide an overview of assurance, attestation, and audit services. While the focus of this text is the audit of financial statements, in this chapter we define assurance and attest engagements, and differentiate among the types of assurance engagements. We also discuss why there is a demand for audit and assurance services, and then identify the separate roles of the financial statement preparer and the auditors. In addition, we introduce regulatory bodies and other organizations that impact the audit profession. We also explain what is communicated in the auditor's report as well as discuss the audit expectation gap"--

Corruption... How can policymakers and practitioners better comprehend the many forms and shapes that this socialpandemic takes? From the delivery of essential drugs, the reduction in teacher absenteeism, the containment of illegal logging, the construction of roads, the provision of water andelectricity, the international trade in oil and gas, the conduct of public budgeting and procurement, and the management of public revenues, corruption shows its many faces. 'The Many Faces of Corruption' attempts to bring greater clarity to the often murky manifestations of this virulent and debilitating social disease. It explores the use of prototype road maps to identify corruption vulnerabilities, suggests corresponding 'warning signals,' and proposes operationally useful remedial measures in each of several selected sectors and for a selected sampleof cross cutting public sector functions that are particularlyprone to corruption and that are critical to sector performance.Numerous technical experts have come together in this effort to develop an operationally useful approach to diagnosing and tackling corruption. 'The Many Faces of Corruption' is an invaluable reference for policymakers, practitioners, andresearchers engaged in the business of development.
